

Elevating Online Discourse with AI

**We're facing a time of
escalating polarization,
surface-level discussions,
and eroding empathy**

**While often seen as
part of the problem...**

AI can be a solution

AI has the potential to help us have more productive conversations that build understanding and collaboration, leading to healthier communication, relationships, and better decision-making.

Get people talking

Power up your posts to foster meaningful conversation

Paste your post here, emojis, #s, and all, and we'll let you know if it will inspire great conversation.

Analyze Post

convo score

Meet Convo, the AI tool revolutionizing online communication

Imagine your posts sparking vibrant, civil discussions. With Convo analysing your draft posts and revealing the secrets of engaging content, you'll inspire meaningful back-and-forth discussion on the topics that matter most to you.

**The AI tool that sparks productive
discourse for:**

Politicians

Community Managers

Thought Leaders

Social Media Managers

Celebrities

Evangelists

Brand Managers

Nonprofit Promoters

Advertisers

Increased civil discourse leads to...

...deeper connection, understanding, alignment, and collaboration between

- community members
- fans
- customers
- followers
- teammates

...and better decision making that serves more people

We've got the data

**Optimal number, placement,
and order of hashtags**

**Optimal sentiment
based on post content**

**Optimal length of content
based on content type**

We've studied hundreds of thousands of social posts to understand what makes them impactful—content length, sentiment, hashtags use, emoji combos, and much more. Convo reviews your post and suggests tweaks to give it the winning ingredients that ignite discussions.

**Understanding and observing
social media sentiment gives you
the power to predict markets**

**Imagine how much more you could
do if you create the conversation**
