

WORD POWER AI

IT IS A PROTOTYPE THAT
LEVERAGES AI FOR
LEARNING COMMUNICATION
LANGUAGE EFFECTIVELY.

Introduction

- Communication language is a medium which we use to convey our thought process and interact in this world.
- There are about 7000 spoken languages in the world and about 300 writing systems [i](#).
- We learn this skill from early childhood in many forms and in many ways.

Problem Statement

- Current technology requires a lot of thought process and time to generate diverse learning exercises.
 - The theme is pre-built and monotonous .
- 

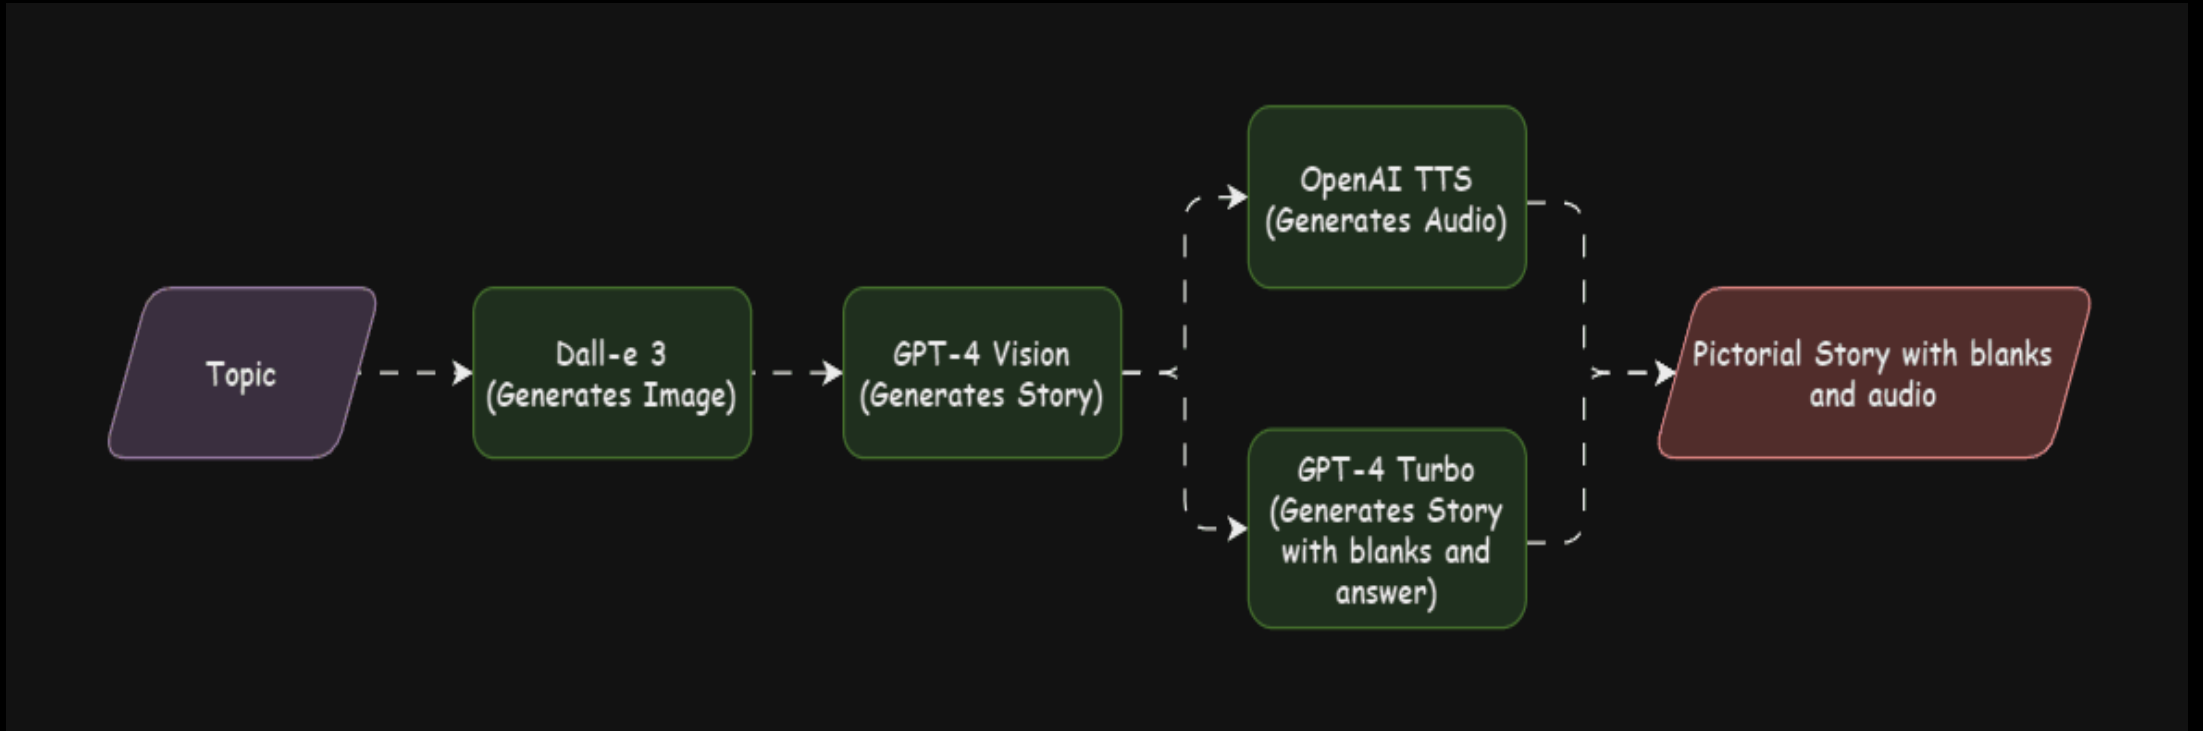

Solution

- A educational platform to generate all traditional learning methods in a more interactive way through AI.
- It is quick, easy and interesting.
- The themes are unique and diverse.

Workflow

Future Prospects

- To generate more learning exercises in many forms and languages.
- It can be extended to other learning skills like programming, science, etc.

Conclusion

- Word Power AI is a stepping stone towards building a unified platform for learning communication language with the help of AI.
