Tech Stack

- Frontend: Flutter for a smooth and engaging user experience.
- Backend: FastAPI for efficient and robust functionality.
- AI Technologies: GPT-4 Turbo, GPT-4 Vision, DALL·E, Clarifai Text-to-Speech.
- Cloud Infrastructure: GCP for hosting APIs and data storage.
- Evaluation: Utilizes Pinecone Vector Database for the retrieval augmented generation system, evaluated with Tonic AI.

Future Potential

- Implement features tailored for broader mental health support.
- Collaborate with mental health professionals for specialized content.
- Introduce gamified elements to enhance user engagement.
- Create challenges, achievements, or reward systems tied to positive habits.
- Enhance AI algorithms for deeper insights into user emotional patterns.
- Provide personalized recommendations based on data analysis.
- Explore the use of VR for immersive meditation experiences.
- Provide users with a more immersive and calming environment.
- Improve Meditation customizations further.

Thank you!
