Personalized Digital Material Making App

Presented By : Muhammad Mudassir Raza
From Team PanjatanAI

AGENDA

THE PROBLEM

Your Are Digital Marketing Specialist . You need create different post for digitalized the client work.

So what you do ?

1) Create Content writing Separately.
2) Background Separately .
3) Then Combine by add text to background

So it take a lot time !

MY SOLUTION

```
User Input → GPT-4 Turbo → Content
User Input → Dalle -e - 3 → Image
Content → Custom Function Using Pillow Library which do :
Image → Custom Function Using Pillow Library which do :
```

Custom Function Using Pillow Library which do :

Content

+

Image

=

Post

HOW APP LOOK LIke

There is input box for to write prompt.

There are three buttons .

1) Generate (for prompt generation)

2) Clear (for Clear text field)

3) Regenerate (regenerate same prompt)

Personalized Digital Material Making App

How to write prompt:

e.g1: Create a post for company name Markelytics. In this post write about the job opening for data engineers. Fresh graduates can also apply. Location in Karachi. Job Type: Hybrid. Contact: career@marketlytics.com

e.g2: Love is a beautiful thing in life. Create an image of love and write the best quote about love on the image.
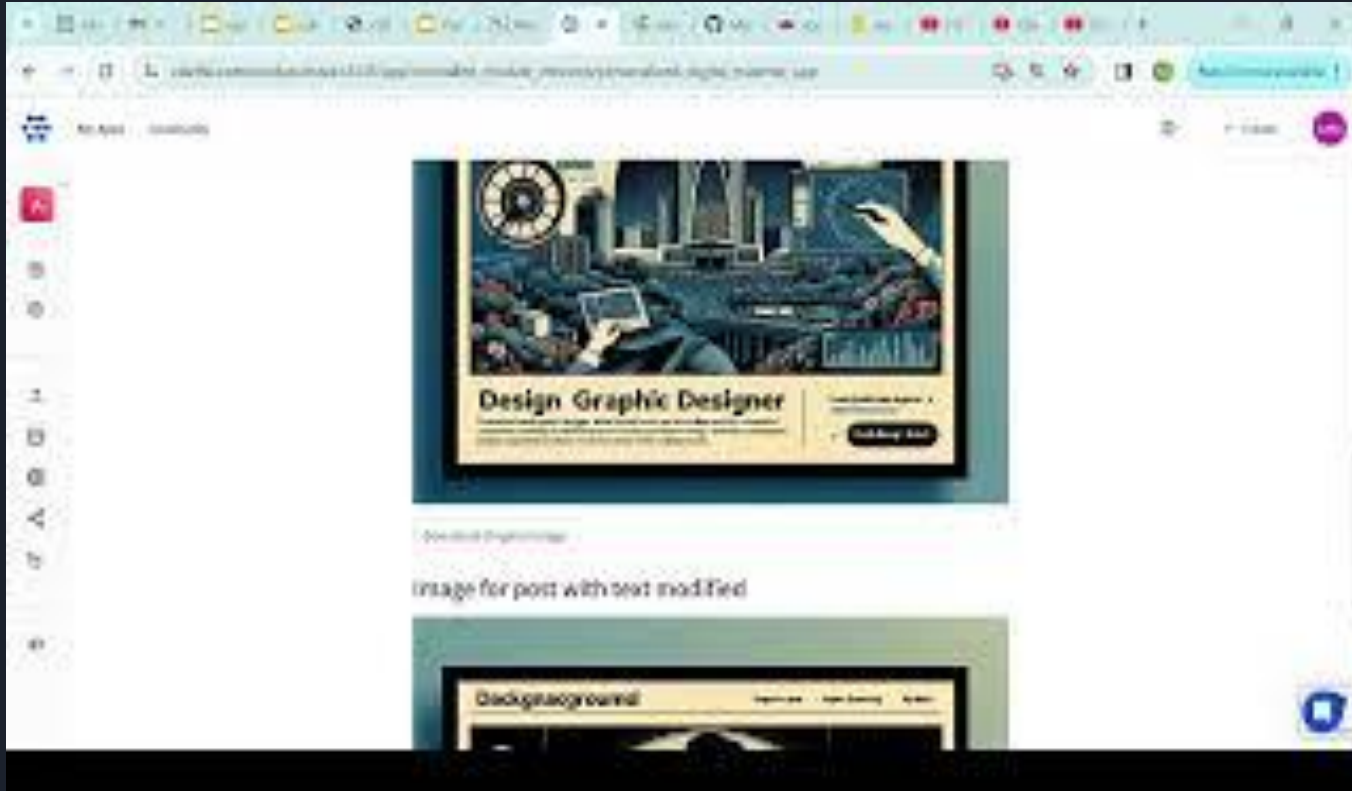

Enter your creative prompt:

[Generate]

[Clear]

[Regenerate]

DEMO OF APP
