

# Nutrition Guru

Your true health companion

# Some problems

## Awareness

People are not aware of the products they are using and the nutrition important for their health.

## Personalization

Every person's nutrition needs are different according to their activity, age, health condition, location, etc.

## Misinformation

People are making videos on YouTube and blogs without proper scientific knowledge about nutrition.

## User Friendly

Personalized nutrition is not user-friendly, as we have to go to the doctor.

## Finance

Fulfilling nutritional needs is expensive for some people.

## Trust

Supplements and nutrition products are being sold without any kind of verification, so there is no trust.

# Two parts

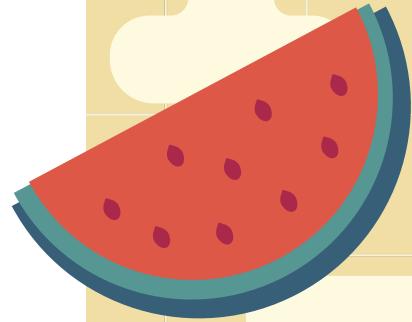

## Premium Services

This part consists of some health awareness services like Nutritionist AI, Calorie Predictor, and Diet Planner, which will help many people know and take proper nutrition according to their condition and needs.

## Store

Nutrition Store, which is an e-commerce service where people can find and buy products that fulfill their nutrition needs. Health awareness services will be free of charge so that anyone can be aware of nutrition and their health.

# Three Services

## Nutritionist AI

Nutritionist AI takes nutrition label of any product as input and outputs the health insights of that product.

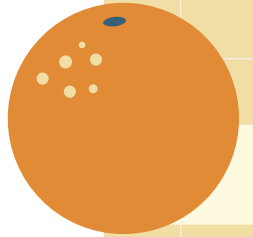

## Calorie predictor

Calorie predictor takes image of any food and outputs the calories in that food.

## Diet planner

Diet planner gives personalized diet to anyone according to some questions asked and by analyzing some research papers.
