

# RECONCILAI

An AI assisted  
reconciliation service

## The Problem:

-  **Manual Reconciliation:** US & UK sole proprietorships grapple with time-consuming manual bookkeeping.
-  **Non-Digital Records:** Accountants face the tedious task of individually processing paper invoices and receipts.
-  **Lack of Digital Tracking:** Small businesses lack the digital bookkeeping systems that benefit larger companies.

## The Impact:

-  **Increased Workload:** Digital gaps hike accountants' work during busy tax periods.
-  **Time-Consuming Process:** Reconciliation takes time, sapping energy from other important work.
-  **Opportunity for Innovation:** Sole proprietors need a one-time, efficient software fix for reconciliation.

## The Solution:

- ✨ **Introducing ReconcilAi:** A revolutionary software solution designed to simplify the reconciliation process for sole proprietorships.
- 📱 **Easy to Use:** Our platform allows for efficient handling of 'one-offs', integrating seamlessly with existing non-digital records.
- 🔄 **Automated Reconciliation:** Leveraging advanced technology to minimize manual input, saving time and reducing errors.
- ✨ **Designed for Soloists:** Built for the 30 million US & UK sole traders, scaling up their accounting effortlessly.
