

Mediterranean AI

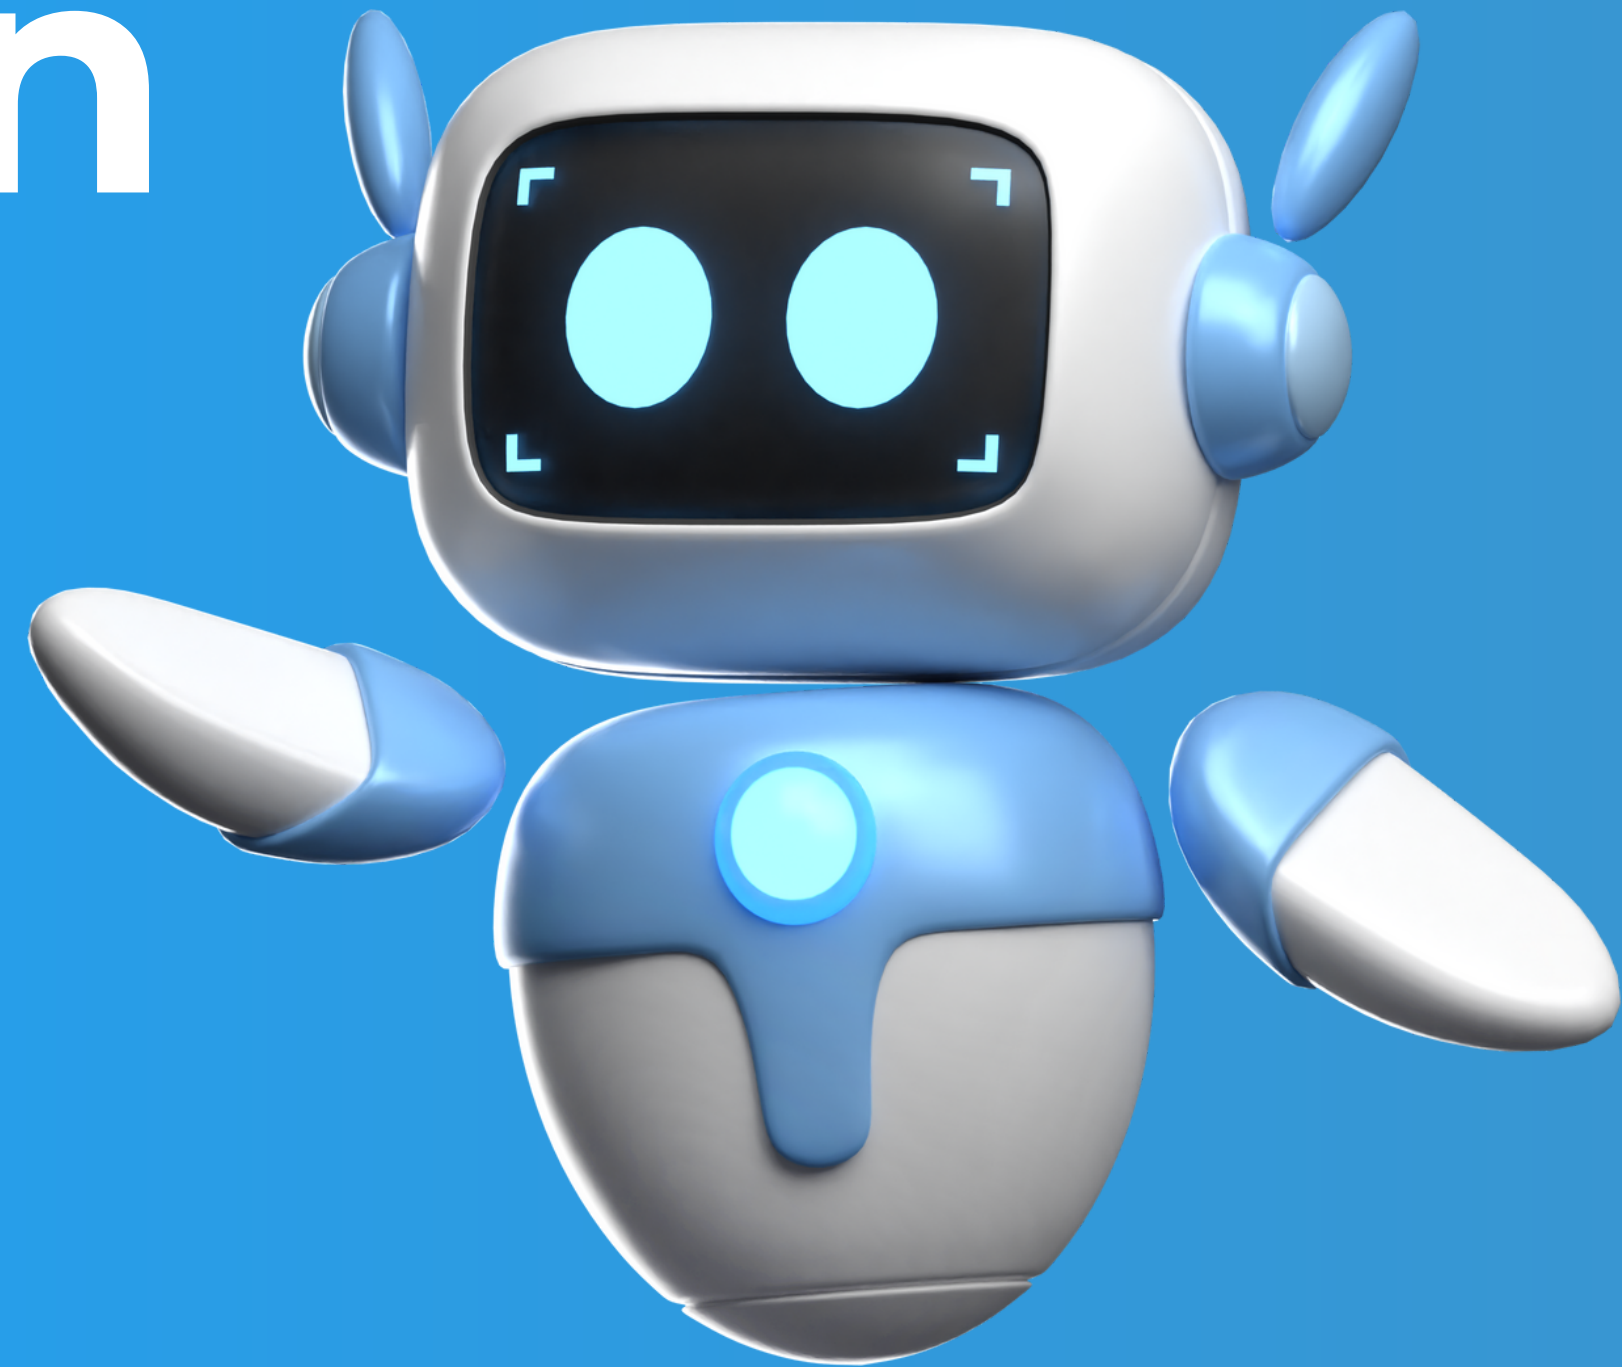

CogniSmile

Introduction

Welcome! We are **Mediterranean AI**, and we're passionate about fostering children's creativity and love for learning.

Problem

01

Screen time concerns

Parents worry about excessive screen time but struggle to find engaging alternatives.

02

Passive learning

Traditional learning methods can be static and fail to capture children's attention.

03

Lack of personalization

Current educational apps often lack tailor-made content that resonates with individual needs.

Our Solution

Generate personalized stories

Children choose values and an image, and AI creates unique stories based on their input.

Interactive experience

Engaging visuals, an audio narrator, and quizzes bring stories to life and deepen understanding.

Personalized learning

Stories adapt to the child's age, level, and chosen values, fostering critical thinking and skill development.

Draw-to-Story

Children draw their own pictures, and AI generates a story, image enhancement, and audio narration based on their creation.

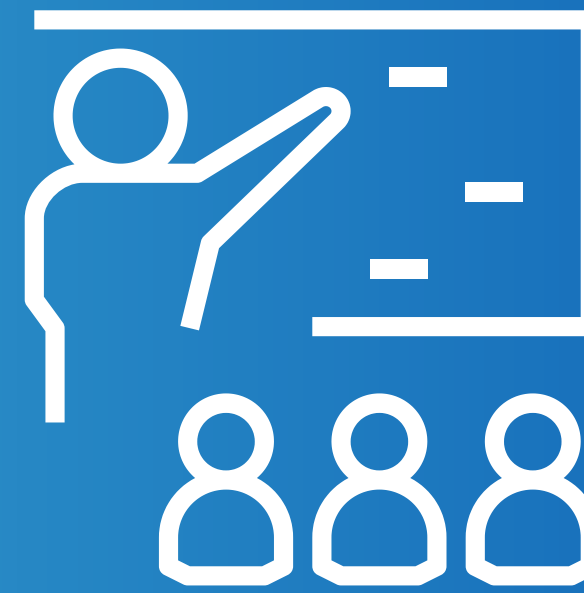

Quizzes

Quizzes assess comprehension and offer personalized feedback, promoting knowledge retention.
