# Quizzes GPT

Create interactive quizzes with all type of Questions, and immediately get personalised feedback for each attempted question.

The PROBLEM

01.

Traditional quiz systems are outdated, time-consuming, and limit question types.

02.

Students find quizzes monotonous, leading to disengagement.

03.

Instructors spend hours crafting or manually grading quizzes.

Our Solution

AI-Driven Quiz Generation:

Generates diverse quizzes with MCQs, Free Text, and Coding questions.

Quiz Attempt & Grading:

Streamlines quiz-taking and grading through AI assessment. Provide students with an effortless experience. Save instructors valuable time.
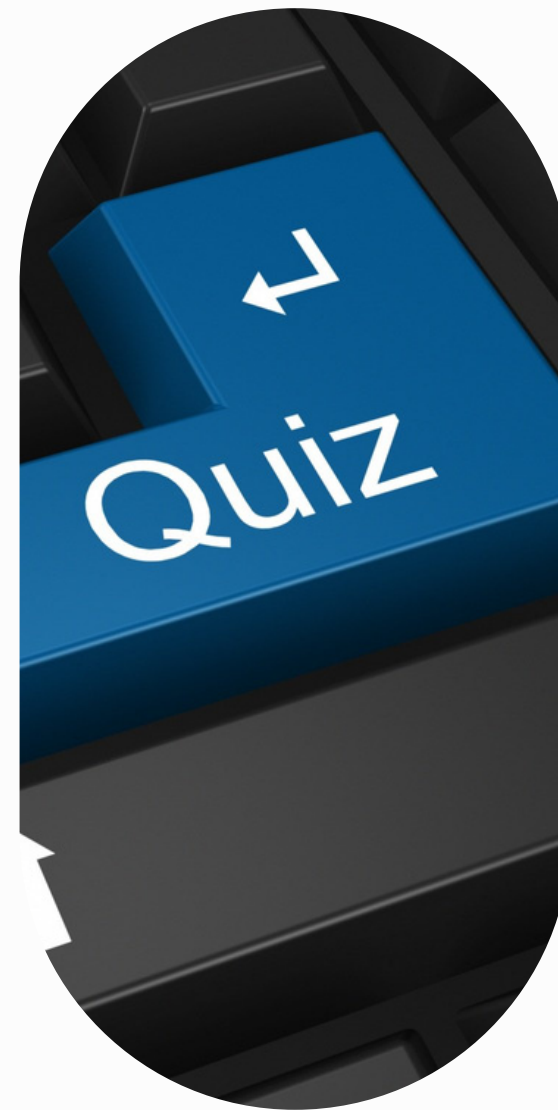

Personalized Feedback:

Delivers personalized feedback and resources for enhanced understanding. Create a more effective and tailored learning experience.
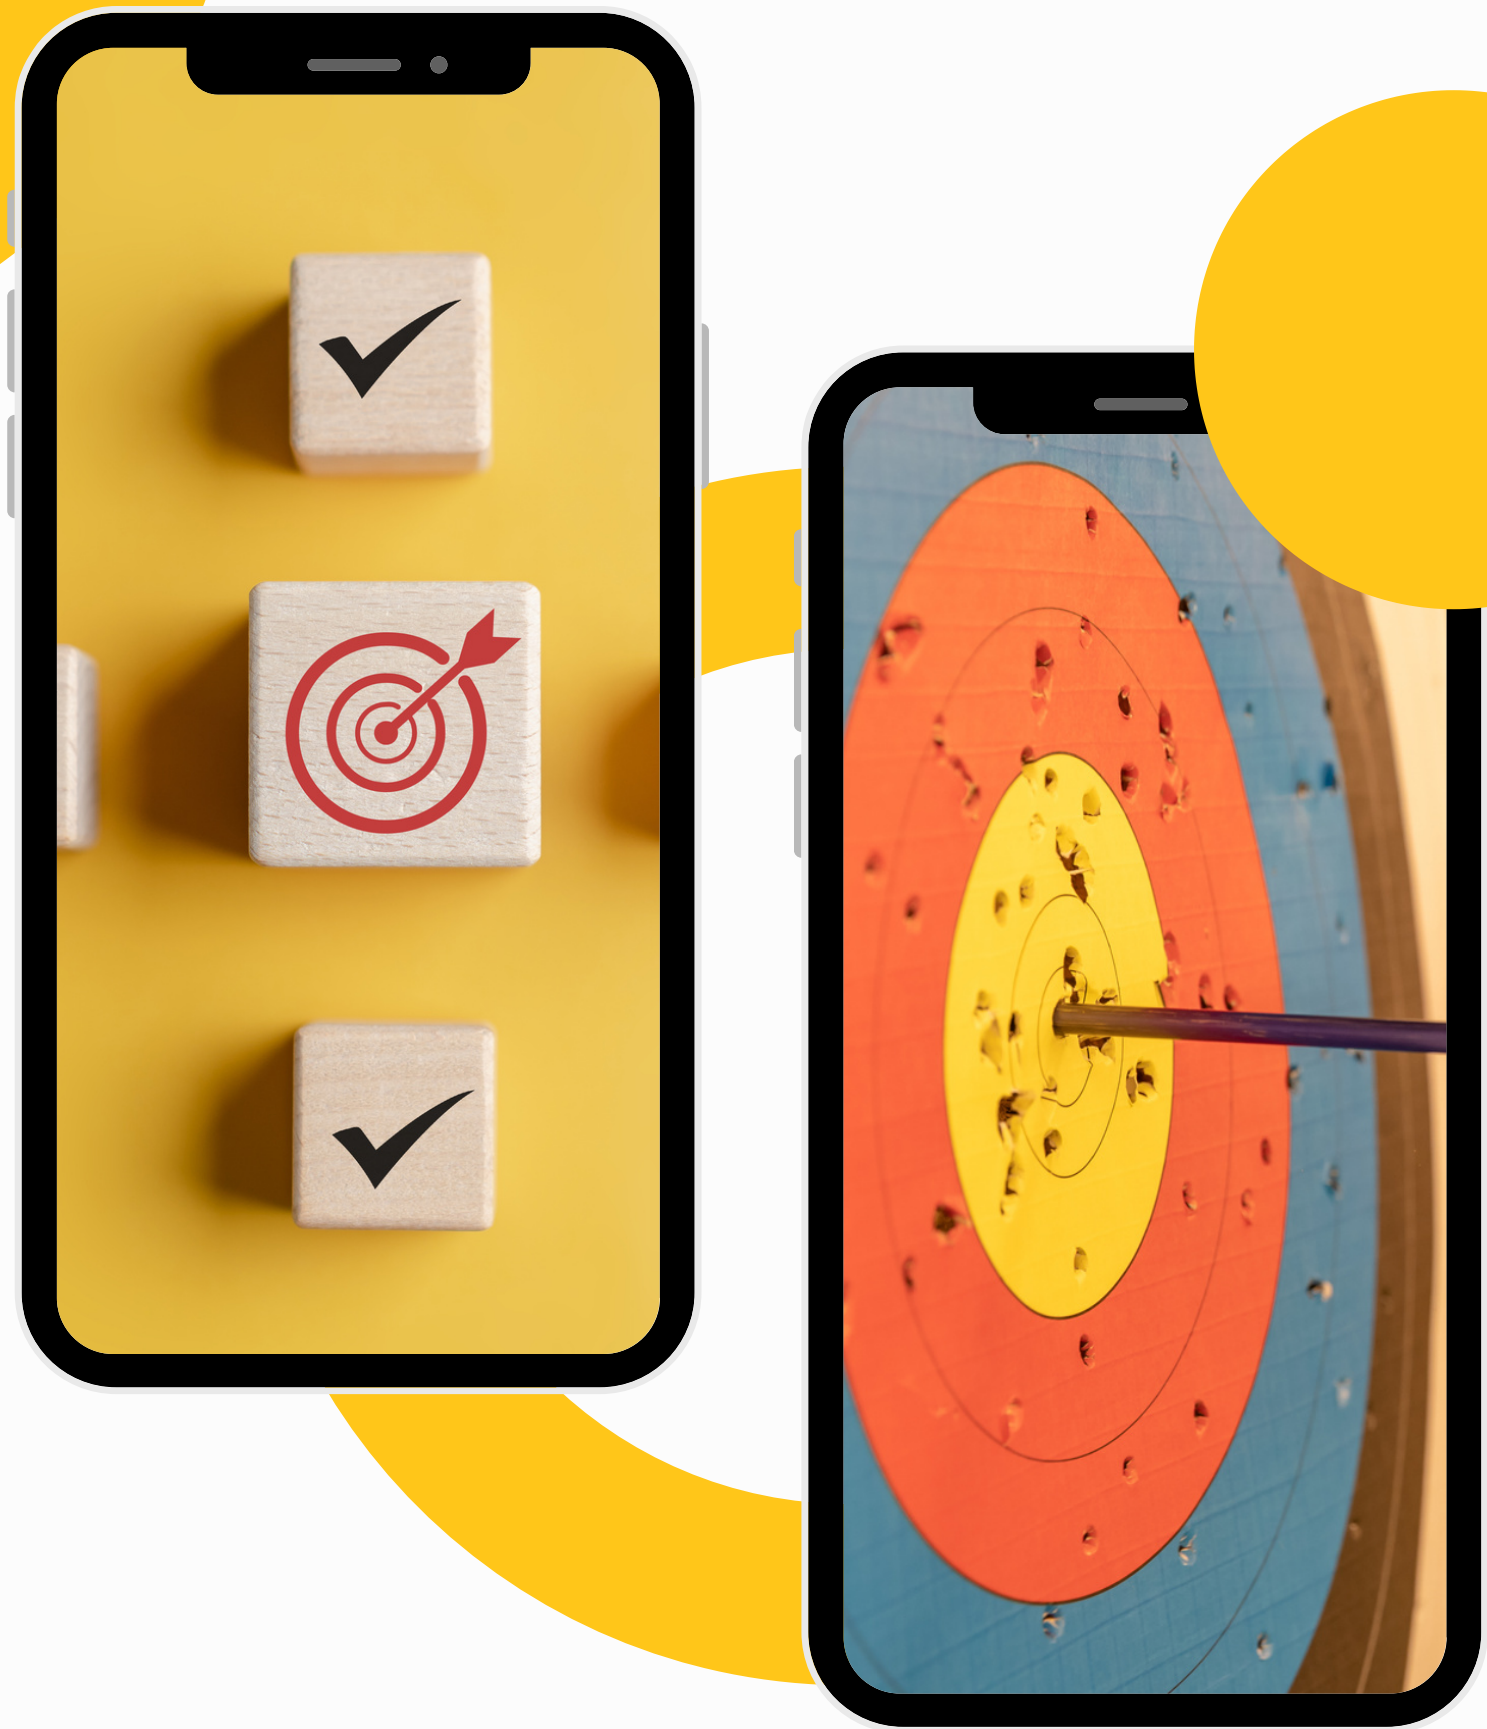

Why Now?

There are a lot of Quiz Systems that proves there's market need. And our market research suggests they all require us to think and Add Questions to Generate Quiz. And manually check them unless they are all MCQs.

-> OUR USP: Create interactive quizzes dynamically with all type of Questions, and immediately get personalised feedback & learning path for each attempted question.

Target Market

- **Educational Institutions**
- **Online learning platforms**
- **Corporate Training Programs**

BUSINESS MODAL

## Quiz Generation & Evaluation APIs

Automated quiz processes streamline instructor workload, freeing up time for strategic tasks and optimizing resource allocation.

Adaptive Assessment Platform

Personalized evaluation and adaptive learning foster improved comprehension, satisfaction, and overall student success.
