# SURVEY

Q22: My student's teacher was prepared to teach dyslexic students.

# SURVEY

**Q40: My student was not taught at his/her appropriate intellectual level**

# PROBLEM STATEMENT

# Are Traditional Language Tests Sufficient for Assessing Children's Potential in Learning a New Language?

- [Shen & Park \(2020\)](#); using reading speaking questions are not enough for assessing kids' language capabilities
- They recommend a comprehensive approach for understanding kids' language abilities as they might have disorders

# Problem statement

- Children with language, reading disorders encounter challenges in education, hampering their ability to excel and achieve good grades

Without tailored educational intervention strategies, these difficulties persist into adulthood

- Consequently, the productivity of the population suffers as a result of these unaddressed issues

# Problem statement

Moreover, the repercussions extend beyond academics and seep into various facets of their lives. The stress can:

- disrupt their sleep
- This turmoil may escalate into depression
- further eroding their self-esteem

# Problem Statement

## Problems

Diagnosis now targets dyslexia subtypes,  
not just the binary classification issue.

Inadequate support for dyslexic  
individuals in education

Interactive education through engaging  
games and activities is overlooked.

# Problem Statement

## Problems

Diagnosis now targets dyslexia subtypes, not just the binary classification issue.

Inadequate support for dyslexic individuals in education

Interactive education through engaging games and activities is overlooked.

## Solution

Diagnosing & category reporting

Customized recommendations for each case

Interactive environment with feedbacks

# OBJECTIVES

# Our Aim

Making the world more fun and interactive while personalizing the environment for kids! Studies showed that:

- Technology
- 1 to 1 tutoring
- Fun activities help!

**Let's take a closer look at our objectives** ↻

# Our Objectives

Uncertainty about having specific areas of weaknesses caused by the disorders they have

Address and classify reading and linguistics challenges in children through a screening test

Lack of guidance on the specific areas of weaknesses

Generate detailed reports to guide users on actions and strategies for addressing identified challenges

Limited availability of personalized educational resources tailored to individual needs

Generate personalized games and activities for tutoring sessions based on the child's case

# Sustainable Development Goals

Our Solution targets 3 of the UN sustainable development goals

- Education by 80%
- Health by 20%
- can also be considered targeting “Reduced Inequalities”

**4** QUALITY EDUCATION

**3** GOOD HEALTH AND WELL-BEING

**10** REDUCED INEQUALITIES

# PROSPECTS

# Prospects

## Prospects:

**Education Sector:** Schools, learning centers, and educational institutions can integrate Nexia Tutor to support students with learning disabilities.

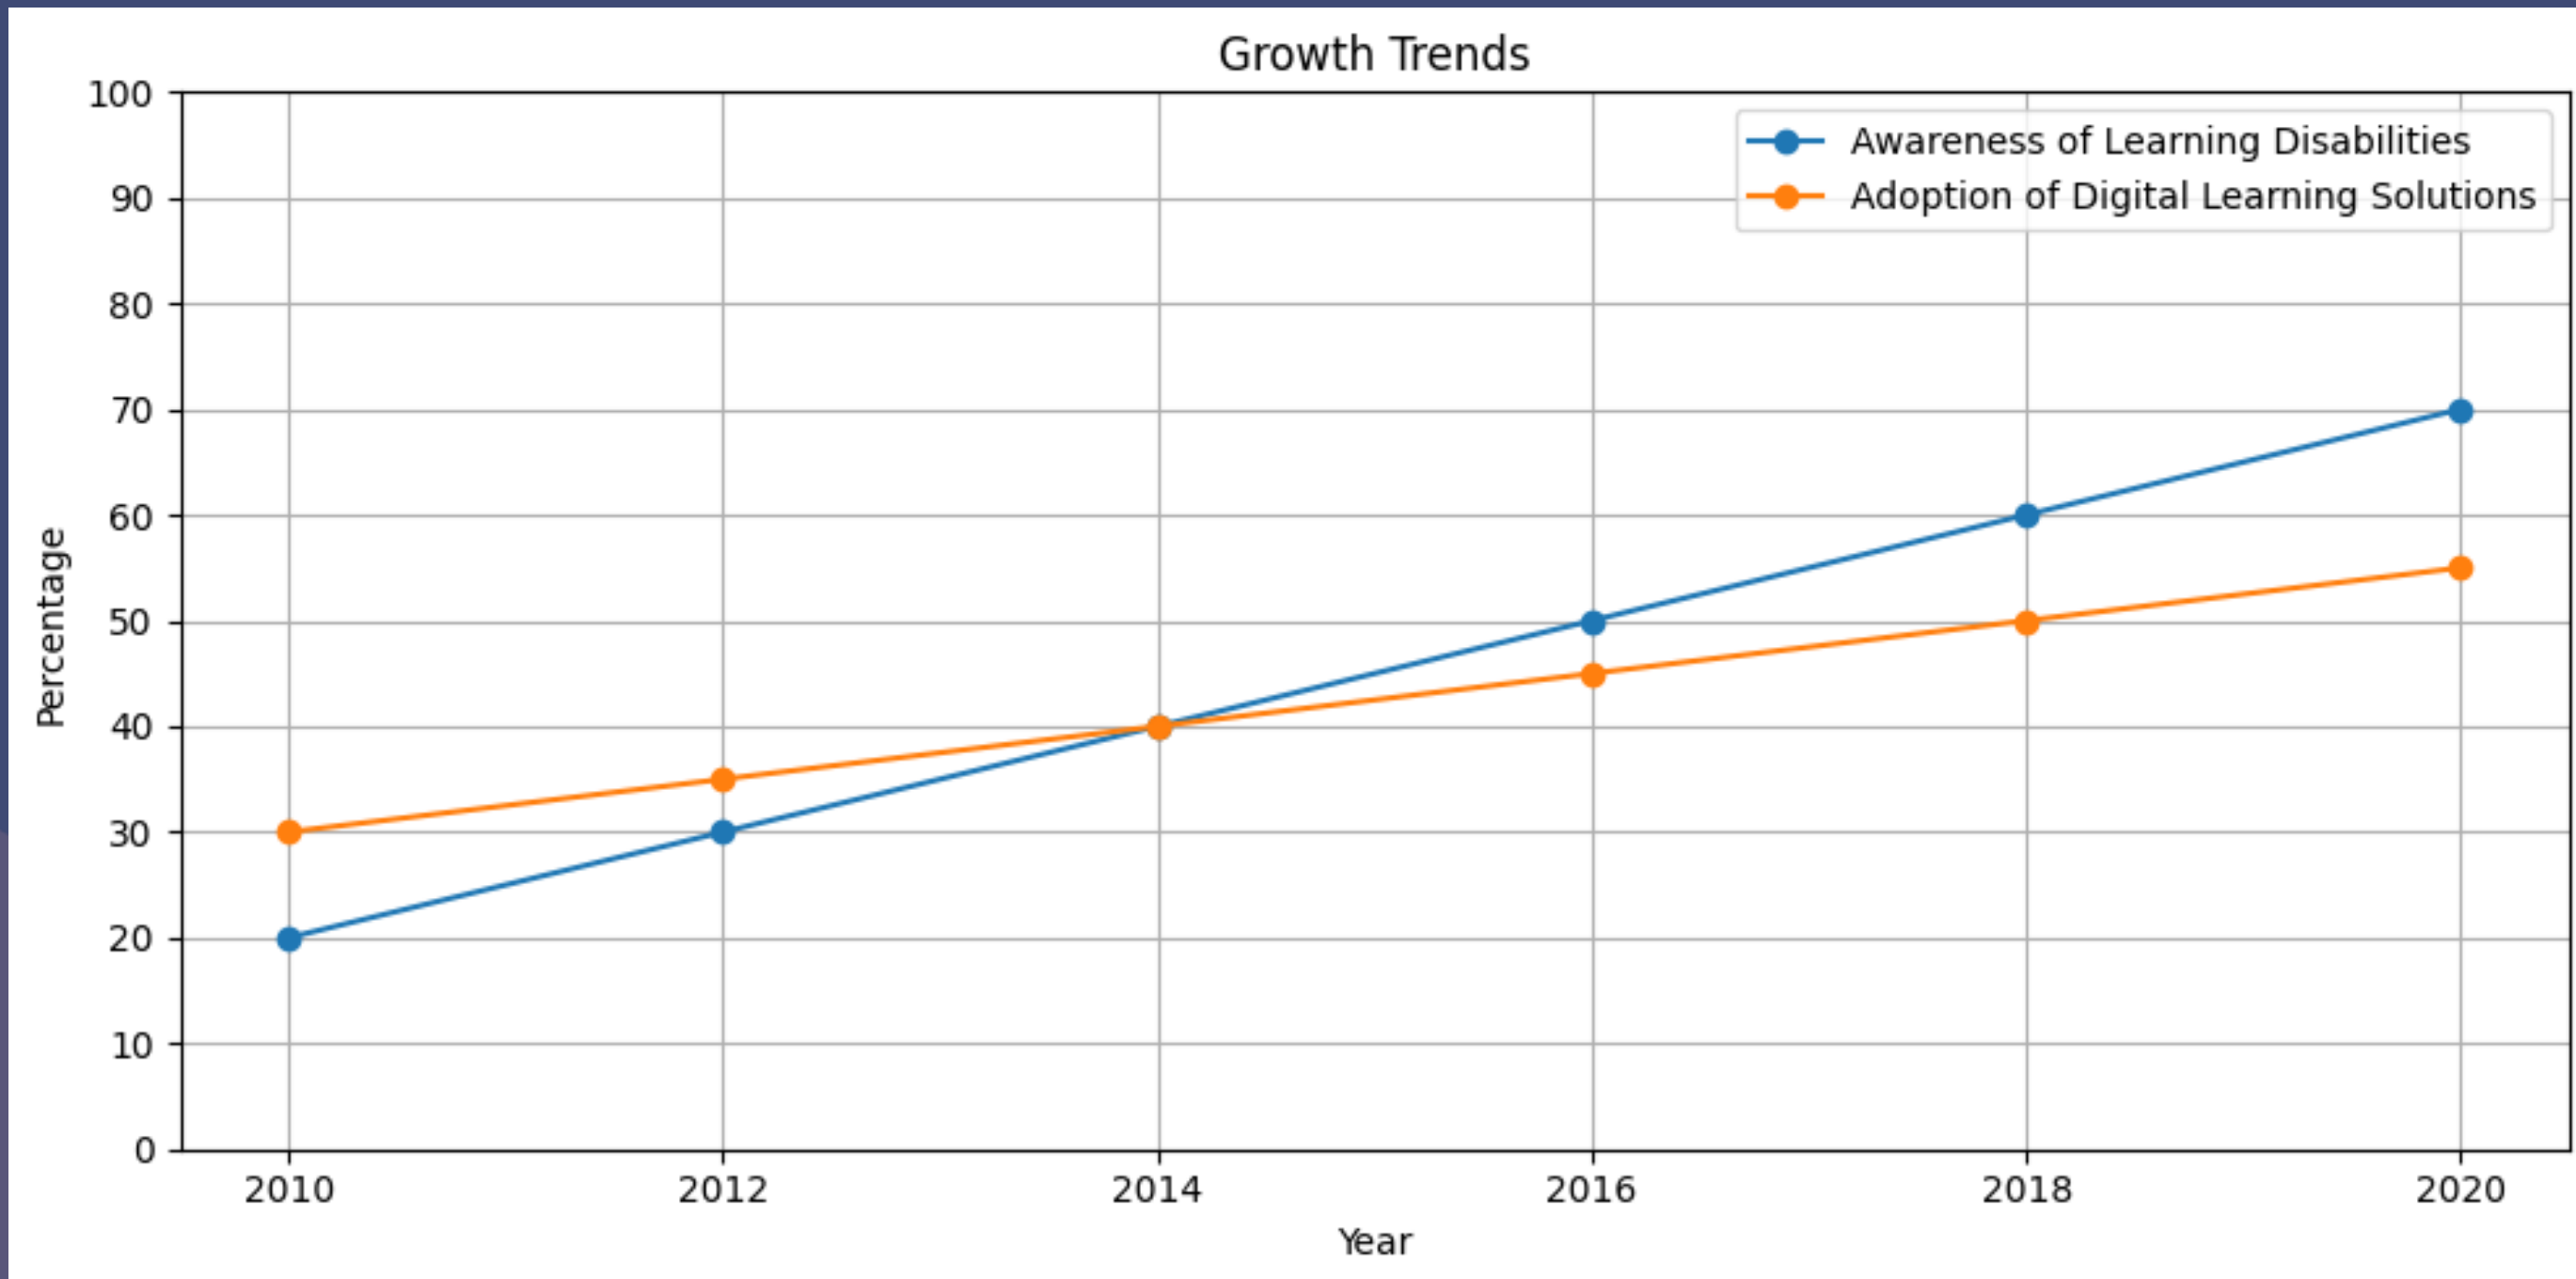

**Healthcare Sector:** Hospitals, clinics, and therapy centers can utilize Nexia Tutor as part of their intervention strategies for individuals with learning disabilities.

### Screening test report

Date: 7 Jan 2023  
Results report for: nancy@gmail.com

The following report presents **the outcomes of the dyslexia screening test**, designed to identify potential challenges in **reading, spelling, and memory** for children aged **5 to 11**. It is important to note that this screening is **not a diagnostic tool** but serves as an initial step in creating a tailored educational environment within the language learning system.

<b>Alphabetical awareness</b> expresses how the individual can work with sounds in spoken words	Risk
<b>Morphological awareness</b> expresses how the individual can work with sounds in spoken words	No risk
<b>Lexical awareness</b> expresses how the individual can work with sounds in spoken words	No risk
<b>Syntactical awareness</b> expresses how the individual can work with sounds in spoken words	No risk
<b>phormological awareness</b> expresses how the individual can work with sounds in spoken words	No risk
<b>Working Memory</b> expresses how the individual can work with sounds in spoken words	No risk
<b>semantic awareness</b> expresses how the individual can work with sounds in spoken words	No risk

A problem well stated is a  
problem half solved ! :)
