

TadawAi

Your Personal Health Assistant powered by GPT 4

In a study conducted in Saudi Arabia found that:

92.6%

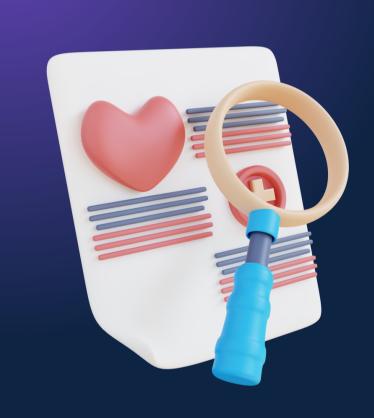

of the participants referred to the Internet for health information.

But...

what about misleading information & untrustworthy platforms?

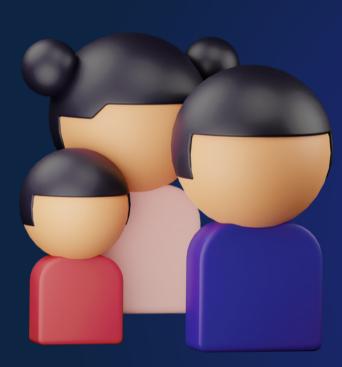

Inaccurate selfdiagnosis

Lack of knowledge of patient's medical history

Lack of knowledge of patient's family medical history

Solution

24/7 Health assistant

Precise diagnosis leveraging family health history

Physician workload optimization

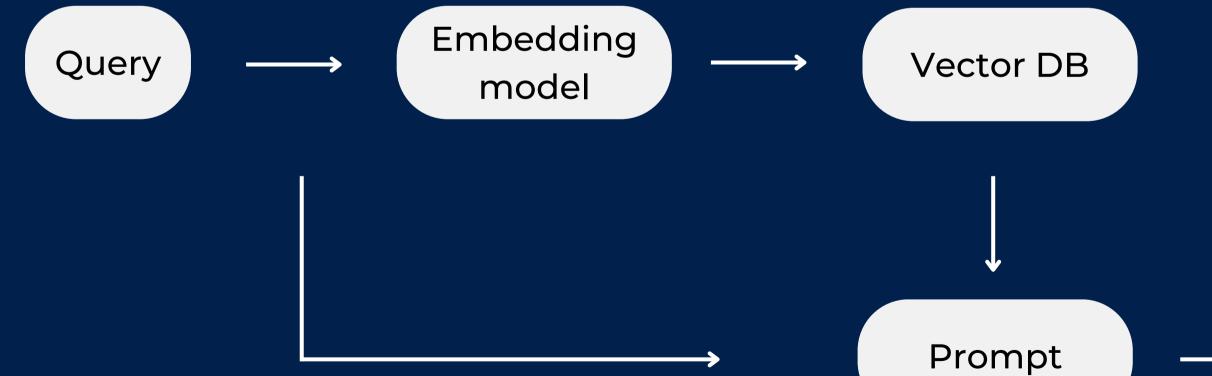

Early diagnosis & predictions

How TadawAi works?

Output

TadawAi

aims to assist physicians not to replace them

Our Goal

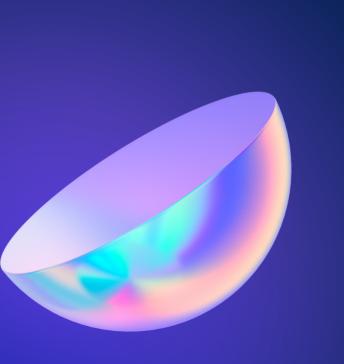

TadawAi aligns with the 2030 vision goals, aiming to improve healthcare access, service quality, and preventive measures against health risks.

Physicians

Chronic patients

Individuals seeking
General Health
Inquiries

Competitor analysis

	Sehaty	Tawakkalna	naphies	Sanar	TadawAi
