146 mln \$

Serviceable Obtainable Market (SOM):

584 mln \$

Hemo+AI

Market Analysis

Online advanced symptom checker

- Ada
- Buoy - AI chat
- Isabel
- WebMD Symptom Checker
- Mayo Clinic Symptom Checker

Blood tests results interpreters

- Lab Informer - ChatGPT4 powered chat - not reliable
- Smart Blood Analytics Swiss SA (SBAS) - interpreting blood test results using AI (own model) - costly

Supplement recommender

- relieve - AI without blood test results analysis
- taskade - AI without blood test results analysis
- Baze - uses AI with blood test results analysis
- Bioniq - uses AI with blood test results analysis
- nutritionist on Instagram (in KZ)

Our Team

Alua Musralina

AI expert, full-stack developer

- 9 years of experience: sales, management, research and software development
- Software Developer at Daimler, AUDI
- Project Management and AI developer experience at German startups
- MIPT alumni, Applied Math and Computer Science, Russia
- The Golden Medal (Altyn Belgi) - the highest award for pupils of the Republic of Kazakhstan

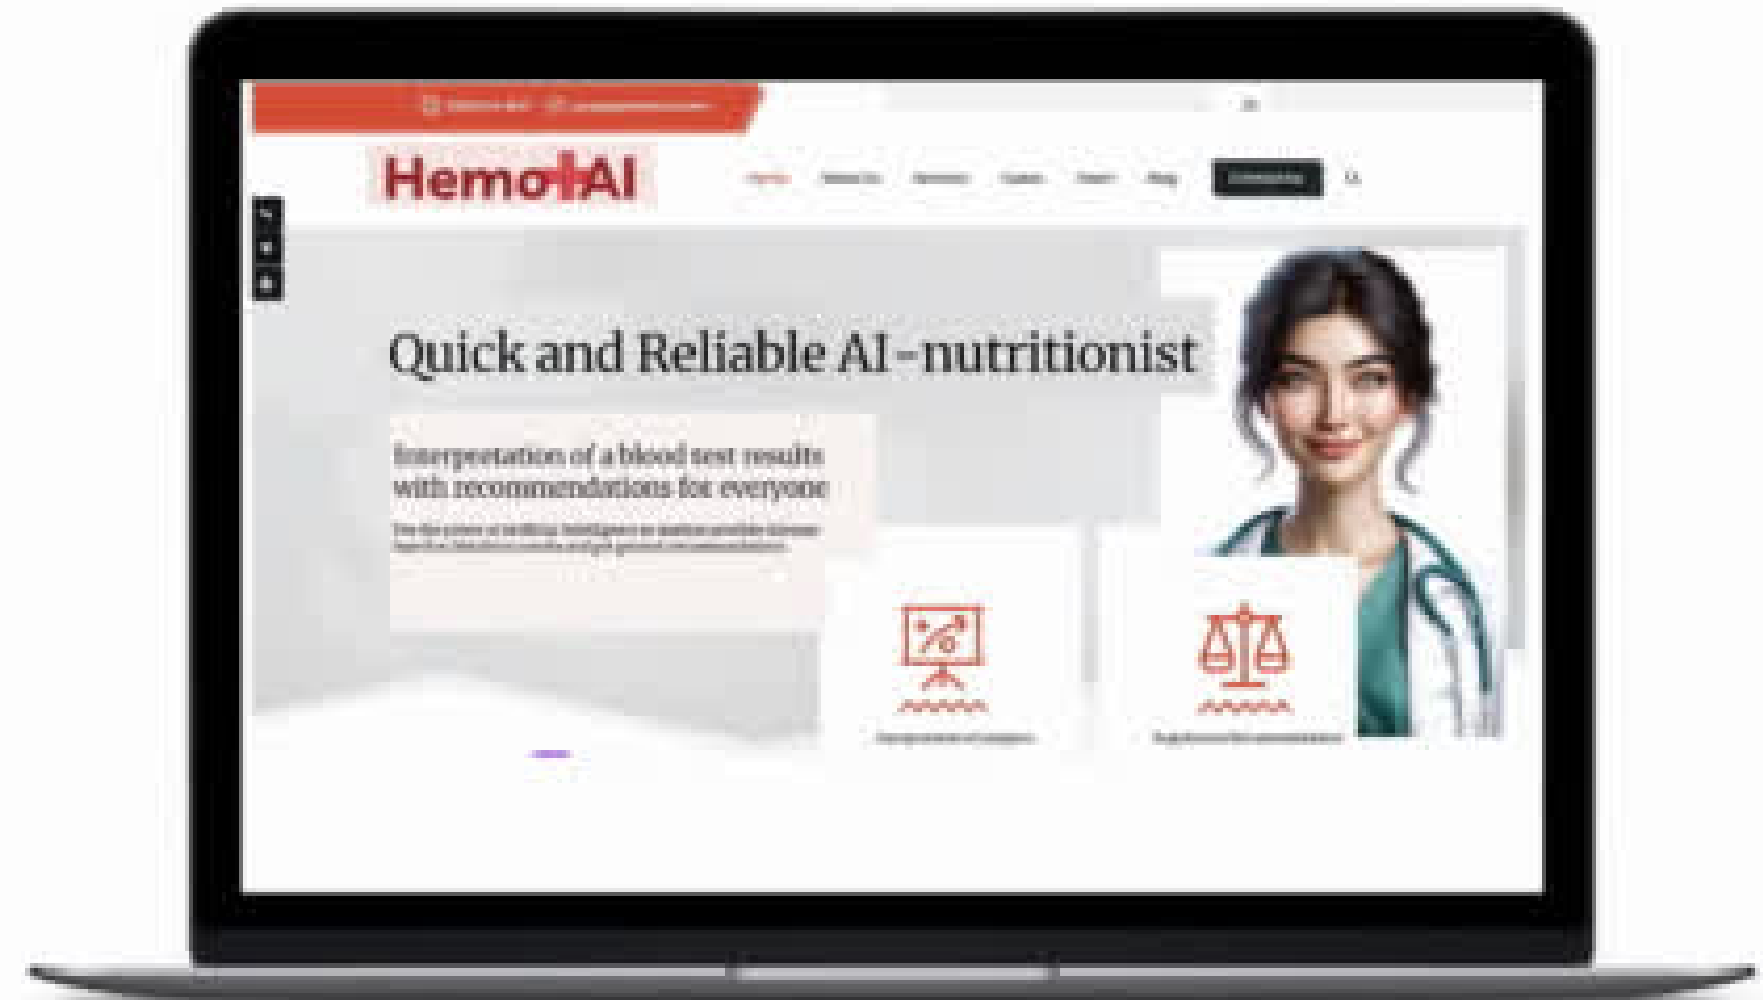

My story

- 8 years of treatment not the reason, but the consequences of the diseases in Germany and Kazakhstan, because of the lack of expertise of the blood tests results interpretations
- Spent 50 000\$ for treatments and medicines
- Blood tests results are lost or saved in different resources, which made it difficult in diagnosis or trends were avoided in final diagnosis.
