

AI TOUR GUIDE

RAB2

LEAP24 AI Oasis Hackathon

MARCH 2024

Challenges

Opportunities for change

01

Tourism potential

Cities are more than their best-known landmarks, but new travelers usually don't have access to a city hidden gems

02

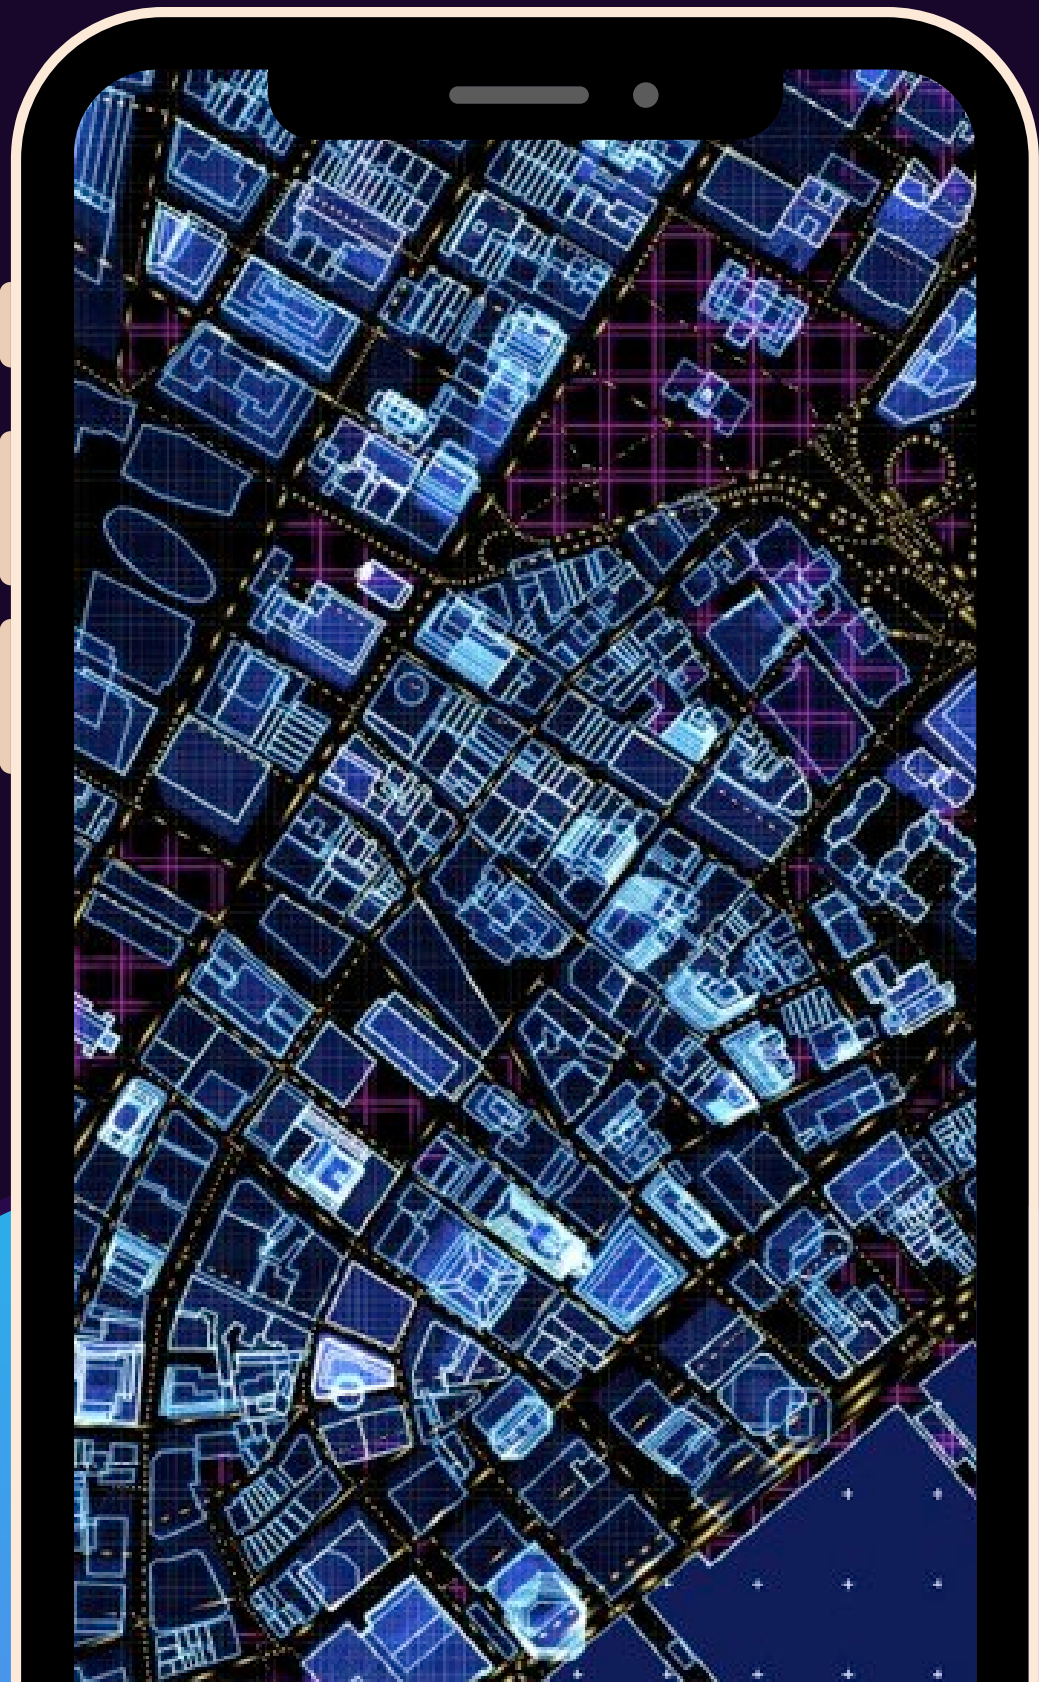

Solo travel

People traveling alone might be open to meet fellow travelers with common interest

03

Planning

Without knowing the city is hard to plan the best tour within your time, distance and interests.

The solution: RAB2

Your cognitive touring companion

Cognitive city implementation that includes physical totems and digital twins of the visitors

- **Customized tours**

See what you really want to see

- **Social experience**

Share your experience and meet people like you

How it works

- Enter your social networks and additional info
- RAB2 will suggest a tour itinerary based on your interests and social media posts
- Enjoy your tour!
