Overturned oil tanker explodes in Pakistan, killing more than 150

People described as rushing to highway to try to gather leaking fuel from crashed vehicle and being caught in blast

The fireball, after a tanker overturned on a road near Bahawalpur, left many injured, some with 80% burns. Photograph: Faisal Kareem/EPA

An overturned oil tanker exploded in a huge fireball in Pakistan on Sunday, killing more than 150 people, including many women and children, who had rushed to the site to collect fuel spilling from the crashed vehicle.

Witnesses described terrifying scenes at the site in the city of Ahmad Pur.

Presenting

AUTILENT

What is Autilent?

An **AI-Powered** Safety and Management Solution that detects risky situations and helps neutralize them in real-time.

Drowsy

Tailgating

Unauthorized Driving

Distracted

What is Autilent?

AI Enabled Safety Solution

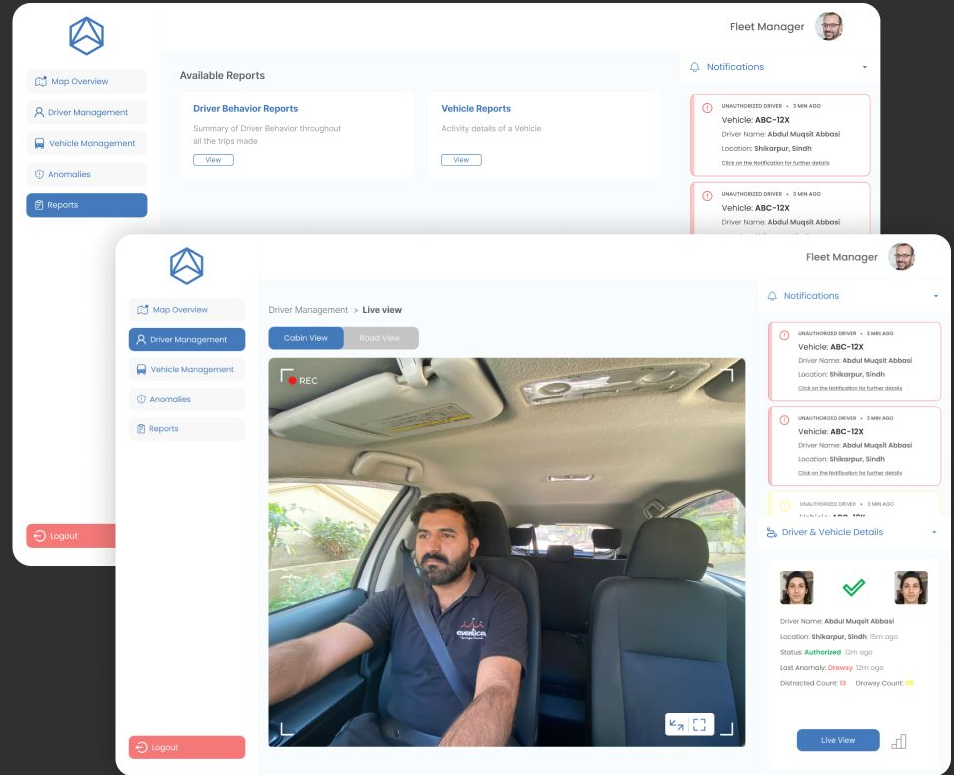

- A special dual-camera device powered by **Autilent's Proprietary AI**
- **Detects and reports** risky situations in real-time

What is Autilent?

Driver Centric Analytics

- Insights into **driver behavior**.
- **Hyper-personalized** training.
- **Enhanced Safety**.

Value Proposition for Autilent's Customer

Increased Profitability
for Customers

Protection of
Assets

Mitigate Driver
Risk

Customers and Market Size of each vehicle (MENA)

Conclusion

Autilent is on a **mission to save lives** and **valuable resources** using AI

Countries around the world are bringing in regulations to improve road safety using modern technology (EU is an Example)

Targeting **MENAP Region** which has more than 85 Million Commercial Vehicles
