- ✓ Literature Review
- ✓ Methodology
- ✓ Analyse The Results
- ✓ Results Discussion
- ✓ Conclusion

What is the problem that needs to be solved?

Writing research requires:

- (1) High skills.
- (2) Time-consuming.
- (3) Money to pay for professional help.

Segment 2

Segment 3

TEAM

Tayseer Magzoub

Senior software developer

Python programming

Dr. Hamdi Alhakimi

Workshop Mentor

Medical statistician and Expert in
the application of AI in medicine

Why we are different?

**First Chatbot
specialized in
health research**

**Chat and
analyse
research data**

**Expert approval
for AI
generated
drafts**

Market

Total Addressable Market

Health researchers: professionals, trainees, and students. In Europe, there are >150,000 full-time health researchers, of them 12,700 in the Netherlands. There are about 2,600 medical schools worldwide

Serviceable Available Market

Researchers indexed in databases such as Researchgate, ORCID, and Prospero (millions)

Serviceable Obtainable Market

Researchers who I have worked with for the last 10 years, through emails and phone numbers (*more than 3,000 researchers*)

Business Model

AI generated drafts

Customers should **subscribe** (we have 3 subscribed customers)
+
Pay as you go

Human Expert Approval

Customers ask for expert help and pay **per hour** at a competitive rate (30-50 Euro per hour)

Publishing

In the future, customers can publish and they will pay publishing fees

Marketing Strategy

Social media

Whats-app, Telegram and tweeter are so effective

(Thousands of researchers are accessible)

Emails

Personal and mass emails

(Ten thousands of researchers are accessible)

Events

Events, webinars, and lectures

(Hundreds of researchers are accessible but so effective)
