Manufacturer Challenges

Growing demands for sustainable products and ESG compliance.

Challenges in reducing costs to maintain competitiveness.

Complexity in material selection and product optimization.

Difficulty in adhering to complex market regulations and norms.

Lack of knowledge and clear guidance in addressing the growing challenges and new technologies.

**Multi-agent solution working seamlessly
to empower manufacturers worldwide.**

How it Works

Ecosystem

USER

Once the user starts to use the app assistant...

It will gather user preferences, product details, etc...

ECOFACOR
AI Assistant
GPT

How it Works

Ecosystem

USER

**Autonomous
AI Material
GPT**

**It will activate an
autonomous AI Material**

It will Search and classify
potential materials according
to user and product
specifications.

**ECOFACTOR
AI Assistant
GPT**

**It will activate an
autonomous AI Supplier**

It will search and classify
potential suppliers using
user preferences, such as
geolocation and logistics...

**Autonomous
Ai Supplier
GPT**

How it Works

Ecosystem

 **PERSONALIZED MATERIAL DATABASE**

 **PERSONALIZED SUPPLIER DATABASE**

USER

The classified materials will be fed into the client's database

The identified and classified suppliers will be fed into the client's database

Autonomous

How it Works

Ecosystem

 **PERSONALIZED MATERIAL DATABASE**

 **PERSONALIZED SUPPLIER DATABASE**

USER

Now the model will be able to provide accurate material suggestions precisely tailored to the user's needs, considering all product specifications and user parameters

The model will be able to provide accurate supplier recommendations entirely based on user geolocation and logistic specifications

**ECOFACOR
AI Assistant
GPT**

Main Features

EcoFactor Team

Product Optimization AI

- Cost Reduction
- Material Replacement
- Product Optimization
- Sustainable Upgrade

ESG Guideline Advisor

- Check for ESG Compliance
- Optimize ESG reputation
- Advice for ESG project implementation

ChatGPT 4 | Direct Access

Paid members will be able to access chatgpt4 directly from our app, without the need to sign up to ChatGPT Plus account.

Smart Material DataBase

Smart database containing only materials relevant to the user's business, classified automatically by autonomous AI agents.

Smart Supplier Database

Smart database containing only relevant suppliers, considering geolocation and business characteristics, classified automatically by autonomous AI agents.

Technologies

EcoFactor Team

Idea & Research

- Paper and pencil :)
- Team brainstorming
- Google Scholar
- Research Gate
- Chat GPT Plus
- UI/UX Design: Adobe Illustrator

Frontend Development

- HTML
- CSS
- JavaScript
- Bootstrap5
- React.js.

Backend Development

- Open AI model GPT-3.5 Turbo
- Python Flask (for creating API)
- Weaviate vector database

Future Plans

EcoFactor Team

New Features

- AI Assistant for Regulatory Standards
- AI Assistant for Safety Standards
- AI Assistant for Quality Certifications

Segmented versions

ECOFACTOR will truly excel when we launch dedicated versions for each sector of the industry, providing even more precise and complex solutions for various stages of the production process.

- ECOFACTOR for Energy Sector
- ECOFACTOR for Automobil industry
- ECOFACTOR for Civil Construction
- ECOFACTOR for Eletronic industry
