

THE GREEN OASIS

ABOUT THE TEAM:

SaudiCoders is a team of 5 students established in August 2023. The team aims to expand in the field of Computer technology in general.

TEAM MEMBERS:

- ABDULRAHMAN AHMAD
- MOHAMMED SAAD (Not Participating)
- MESHAL ALI
- YASER ALI
- THAMER MASHHOR (Not Participating)

THE TEAM'S GOALS INCLUDE:

- Developing computer science skills and knowledge.
- Participating in programming competitions.
- Creating innovative programming projects.
- Contributing to the open source community.
- Spreading awareness about programming in Saudi Arabia.

INTRODUCTION

This project revolutionizes sustainable agriculture, increasing plant production, and contributing to food security .

FEATURES

01

- **Reduced agricultural business costs:**

Achieved by Early diagnosis, .

02

- **Minimized loss:** achieved by providing plants with resources specific to their needs, reducing pest problems and improper practices.

03

- **Increased plant production:** achieved by creating the ideal environment for plant growth.

04

- **Contribution to food security:** achieved by producing high-quality food products.

THE GOALS

01

- Improving production and quality of plants

02

- Early Diagnosis of Problems

03

- Reducing costs and waste, and Increasing profitability

04

- Assisting expert and non-expert users

DEPEND ON

Sensor's tests :

- NPK test.
- Sunlight's intensity test.
- Soil moisture test.
- Temperature test.
- Camera capturing and recording.

AI models :

- Computer vision model.
- Images classification model.
- LLM model.

Datasets :

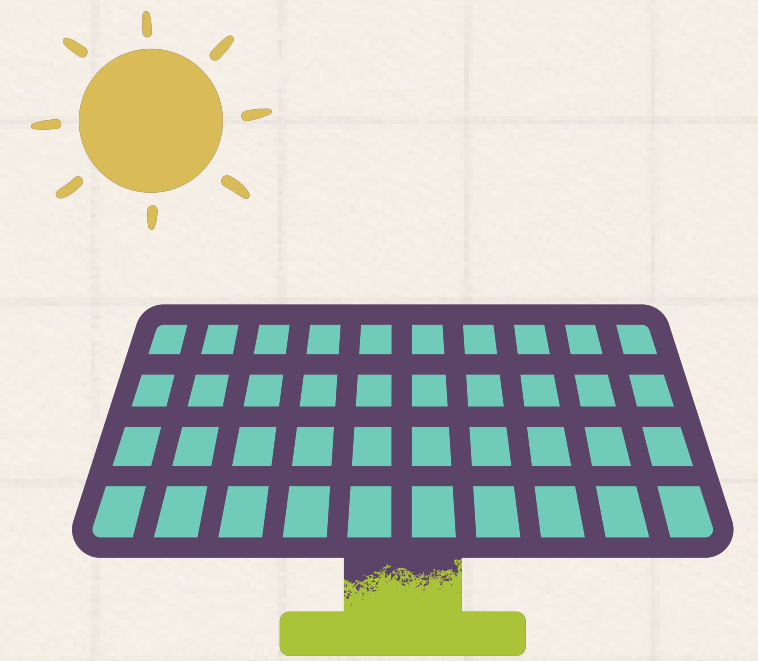

- A dataset of the plants best condition.
- A dataset of wilted and fresh plants .
- A dataset of pests and it's informations.

Energy :

- Solar energy

User platform :

- It depends on the user.
- Website or app or local computer(for businesses).

AGRICULTURAL AI TECHNOLOGIES MARKET STATISTICS

MARKET SIZE:

- The global agriculture technologies market was valued at USD 10.32 billion in 2023.
- The market is expected to reach USD 21.15 billion by 2028 at a Compound Annual Growth Rate (CAGR) of 12.7%.

KEY TECHNOLOGIES IN THE MARKET:

- Smart Agriculture: Involves using advanced technologies like IoT, AI, and Big Data to improve productivity.
- Digital Agriculture: Includes the use of Information and Communication Technologies (ICT) to collect, analyze data, and improve agricultural operations.

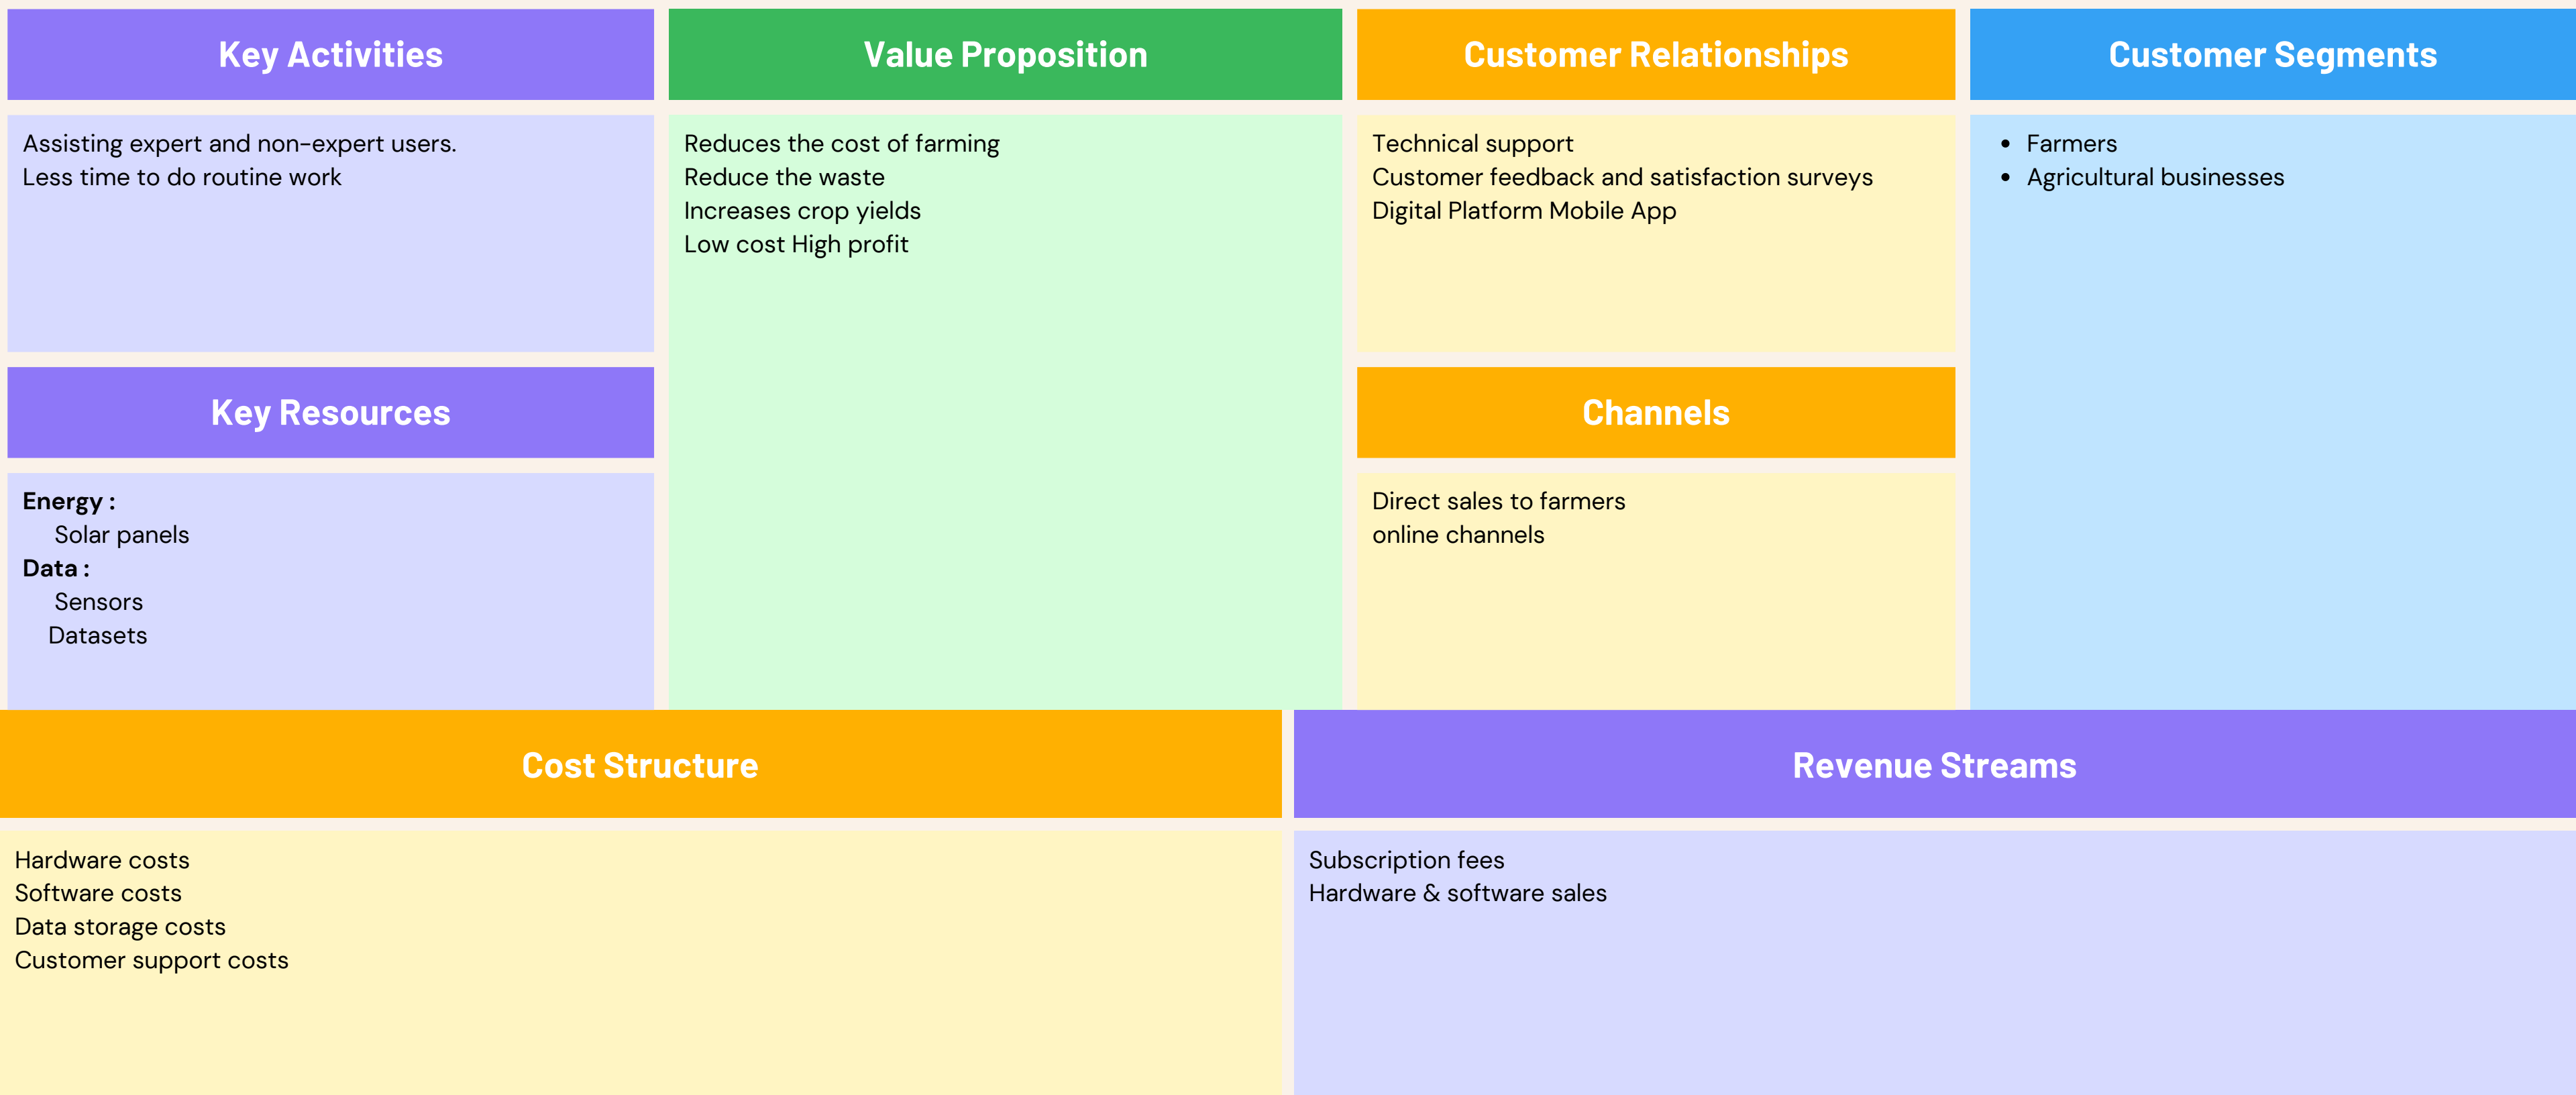

AGTECH CHALLENGES & SOLUTIONS:

CHALLENGES:

Promoting sustainability by reducing agriculture costs, reducing losses, increasing plant production, and contributing to food security.

SOLUTIONS:

- AI-powered NPK Management: Optimizes fertilizer use with data-driven recommendations for N, P & K, reducing waste and protecting the environment.
- Precision Agriculture: Improves resource management and yields with targeted irrigation and data-driven techniques.

Thank You For Li
