Efa_إيفا!

How was your event ?

MISSION

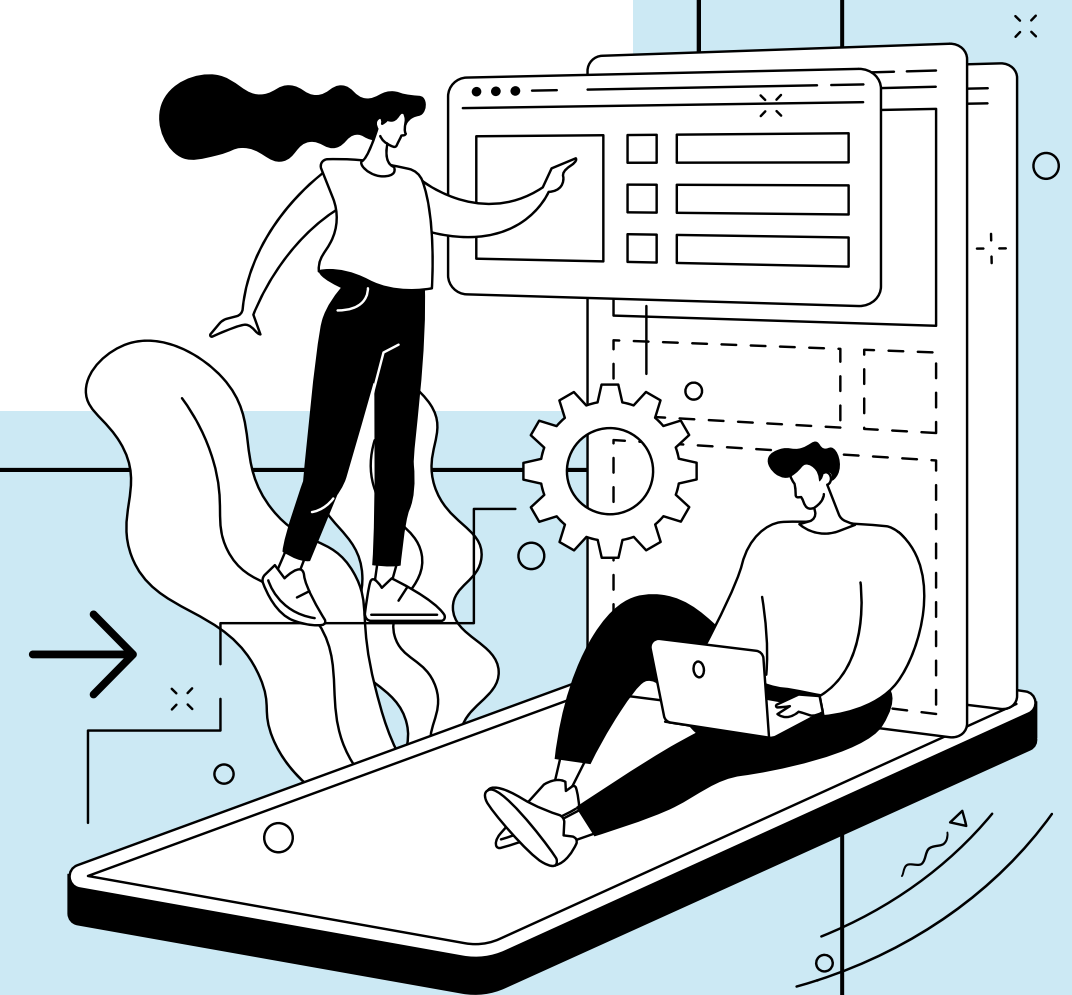

We help tech
conference organizers
to collect and analyze
feedback.

PROBLEM

Gathering and processing insightful feedback from a large amount of guests is nearly impossible.

Ahmad and Ana tried to do it by sending an email to the 215,000 attendees of Leap 2024... this is them in 2032 still processing the data manually.

Here's how event organizers gather feedback today:

FEEDBACK FORMS

Attendees fill out forms with pre-selected questions, **limiting personalization**

FOCUS-GROUPS

Small, in-person discussions provide rich detail but **are limited in reach**

DIRECT COMMUNICATION

Organizers reach out individually through email or calls, **a time-intensive method** for large events

SOCIAL MEDIA ACTIVITY

Organizers monitor online conversations, capturing real-time sentiment but **lacking structure**

SOLUTION

Efa

Events Feedback Assistant

✓ **GENERATE**

Efa generate a questionnaire based on the organiser's wish.

✓ **ENGAGE**

Attendees scan a QR code and chat with feedback bot.

✓ **ANALYSE**

Efa analyses the sentiment and provides key insights in a dashboard.

TARGET

→ TECH CONFERENCES

→ 2000+ ATTENDEES

→ SAUDI ARABIA

MARKET

2,000 EVENTS

were organized in Saudi Arabia in 2016 - 2024,
engaging over 46 millions attendees

SAUDI VISION 2030

launched by Saudi Arabia government, opens
opportunities for more events to be hosted in the area

OVER 1,000 COMPANIES

are operating as Events management providers
in Saudi Arabia

COMPETITOR

TYPEFORM

ZOHO SURVEY

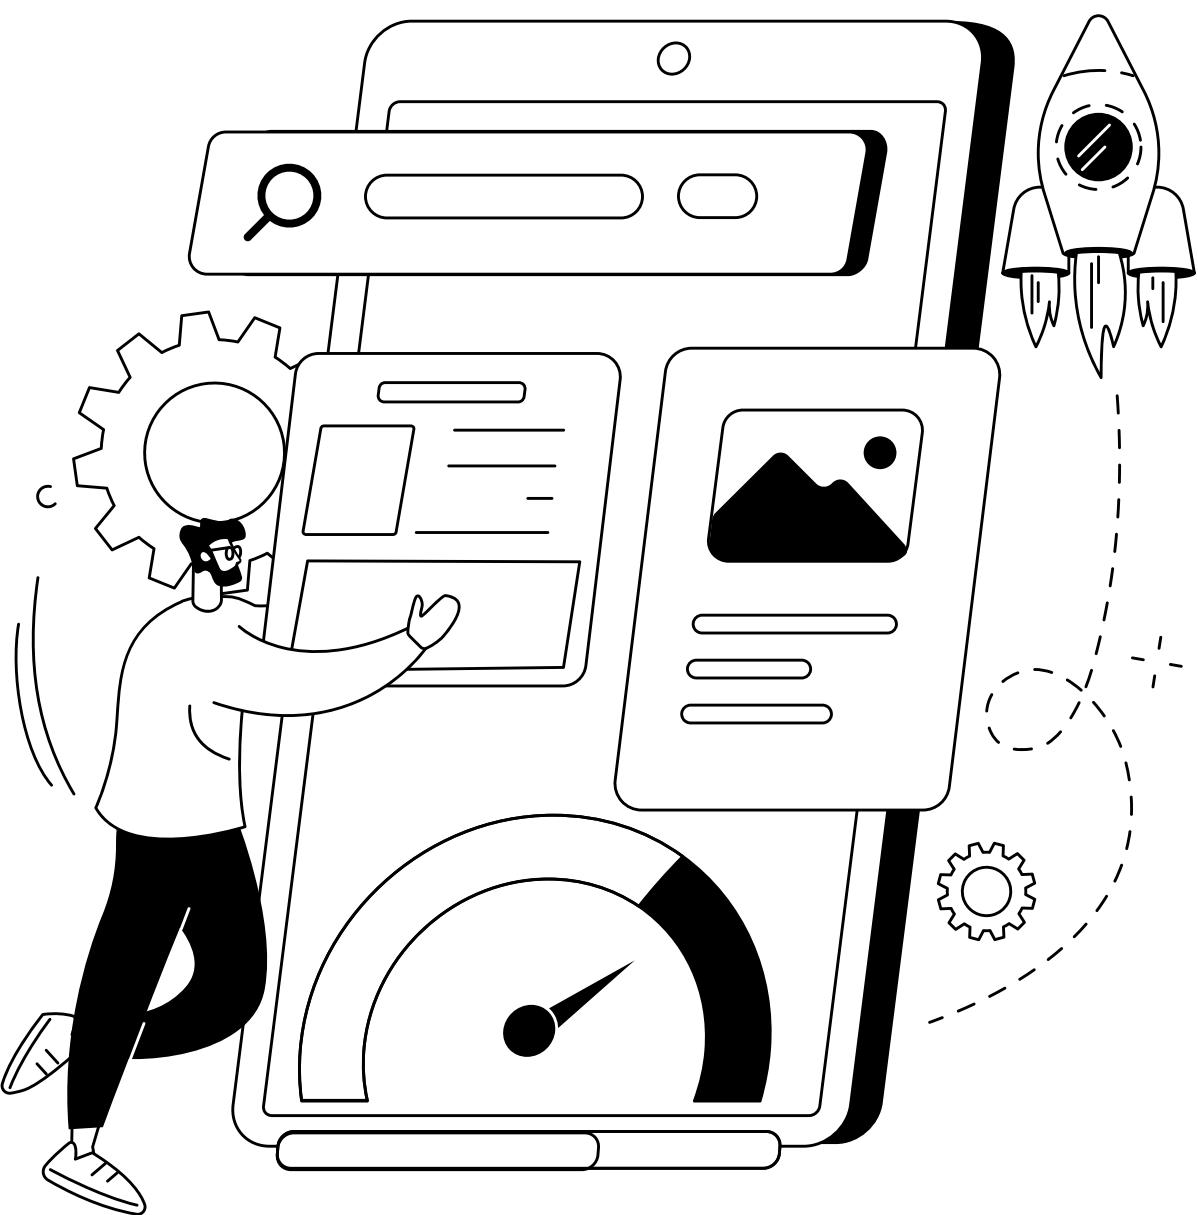

SURVEY MONKEY

Each of the platforms have **strong forms capacity**, offering interactive UI and brand integrations. However, none of them is focused on Event industry to offer specific level of needs organisers have.

Efa is the feedback chatbot, that allows full customisation, together with advanced insights gathering.

DEMO

The screenshot displays a web browser window with the URL `gemini-ultra-hackathon-tau.vercel.app`. The application title is **EFA (Events Feedback Analysis)**. The navigation menu includes **Chat**, **QrCode**, and **Dashboard**. The chat interface shows a user profile for **Efa (Event Feedback Analysis) @AJINKYA3D**. The chat history includes:

- A system message (marked with a blue star) with the text `Enter Your Name` inside a white input field.
- A user message (marked with a grey profile icon) with the name `Hassan` inside a white input field.
- A system message (marked with a blue star) with the text `...` inside a white input field.

At the bottom of the chat area, there is a text input field with the placeholder `Type message here...`. In the bottom right corner of the browser window, there is a watermark for **Activate Windows** with the text `Go to Settings to activate Windows.`
