Problem Statement

Navigating historical landmarks is challenging for those unfamiliar with their significance. Automated tools for image recognition and contextual information extraction are lacking, that are hindering users from fully appreciating these sites

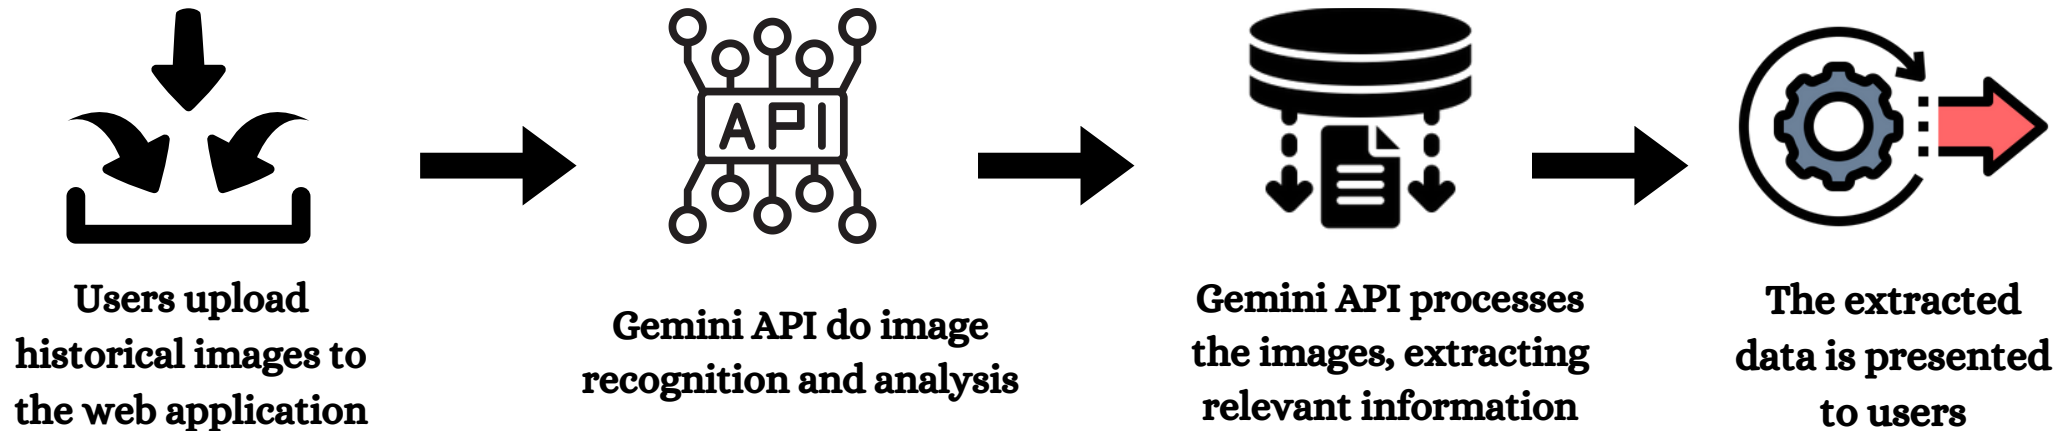

Solution

We are introducing a user-friendly web app legacy locator. It offers seamless image recognition and provides instant details on landmark names, locations, attractions, and reviews, democratizing access to comprehensive historical information.

Conclusion

- Legacy Locator transforms historical tourism by connecting users with landmarks through advanced technology.
- With further enhancements and widespread adoption, this platform anticipates enriching countless individuals' experiences, fostering exploration and cultural appreciation on a global scale.
