- Concept
- Brand Survey

Q2

- Brand Awareness & Marketing
- Component Research
- Cost Analysis

Q3

- Testing functions
- Apps interaction
- Product Handling
- Launch

Products

TorchON (Data)

Tonic-AI (Apps)

Tower (Hub)

What we do

- We make products for ai-driven analysis of real-world data
- We build our company around mission-driven engineering
- We meet the problems where they live
- We design technology that makes AI work for you (rather than making you work for AI solutions)

With good data and the right technology, people and institutions today can still solve hard problems and change the world for the better.

Thank You
