

Advanced RAG Hackathon | April 2024

Team AINNOV

Accelerate innovation
funding with AI

Introduction

Companies engaged in research and development (R&D) must submit **technical reports** for their **administrative procedures**.

Problem

Writing these reports is **complex**,
time-consuming, and **expensive**.

1. Data
Is unstructured

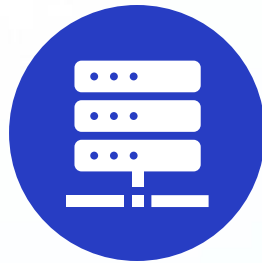

2. Techs are not legal
experts

3. Consultants are not
tech experts

Solution

A data-driven genAI software for reports generation.

1. Data
Extraction

2. Report
Structuration

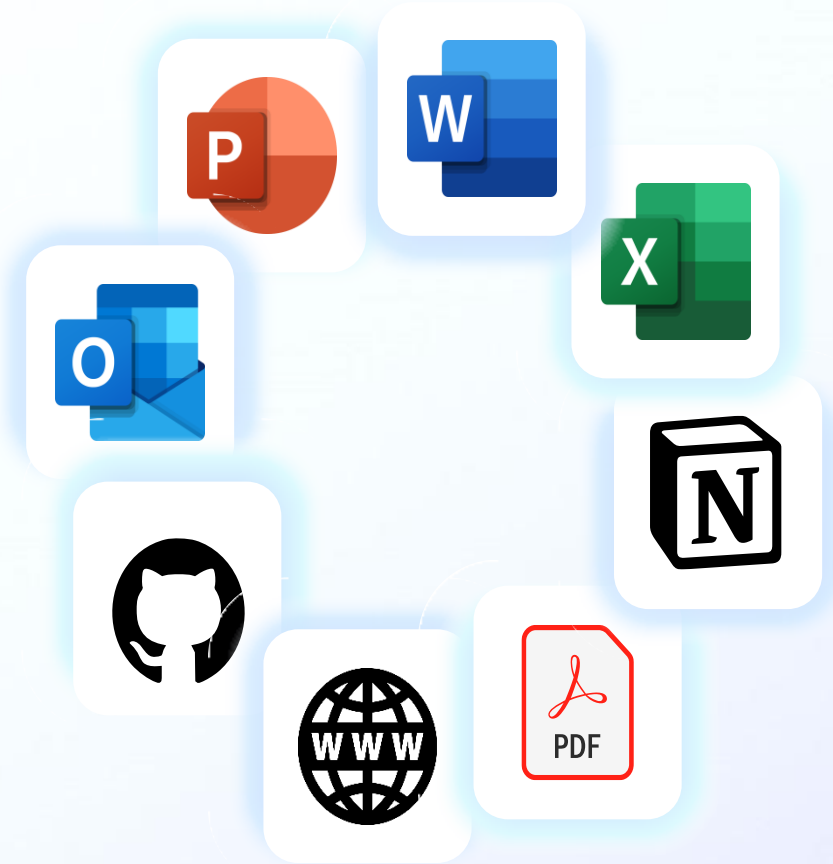

3. Supervised
generation

Technologies

- Vectara
- Java Script
- GPT 4
- Langchain
- Llama index
- TogetherAI
- TonicAI

1. Development steps identification
2. Developments substeps identification
3. Dynamic frontend

Business Model

CATEGORY

Innovation Consulting Firm,
CEO or Digital manager

FIELD

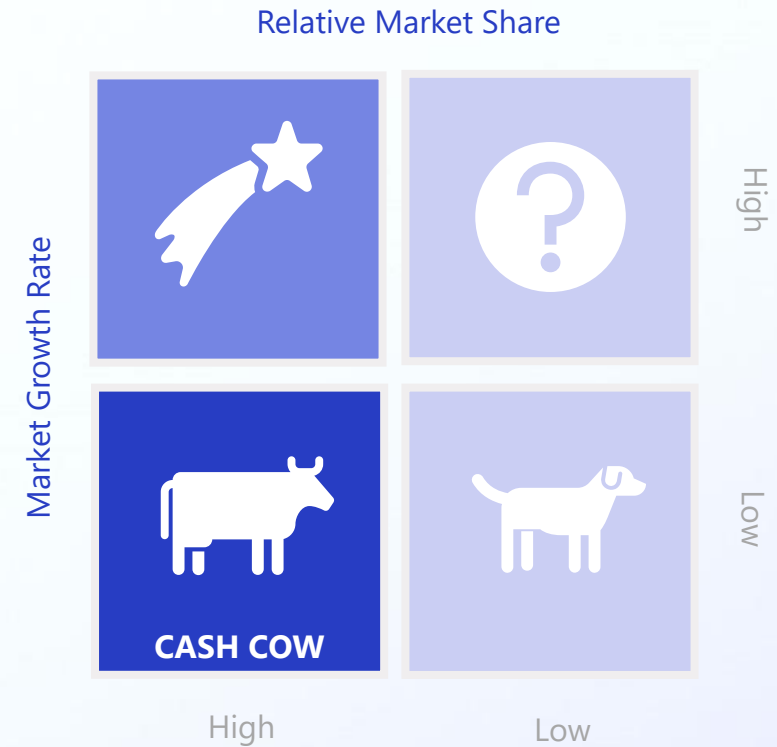

Taxes, legal,
funding

CAPACITY

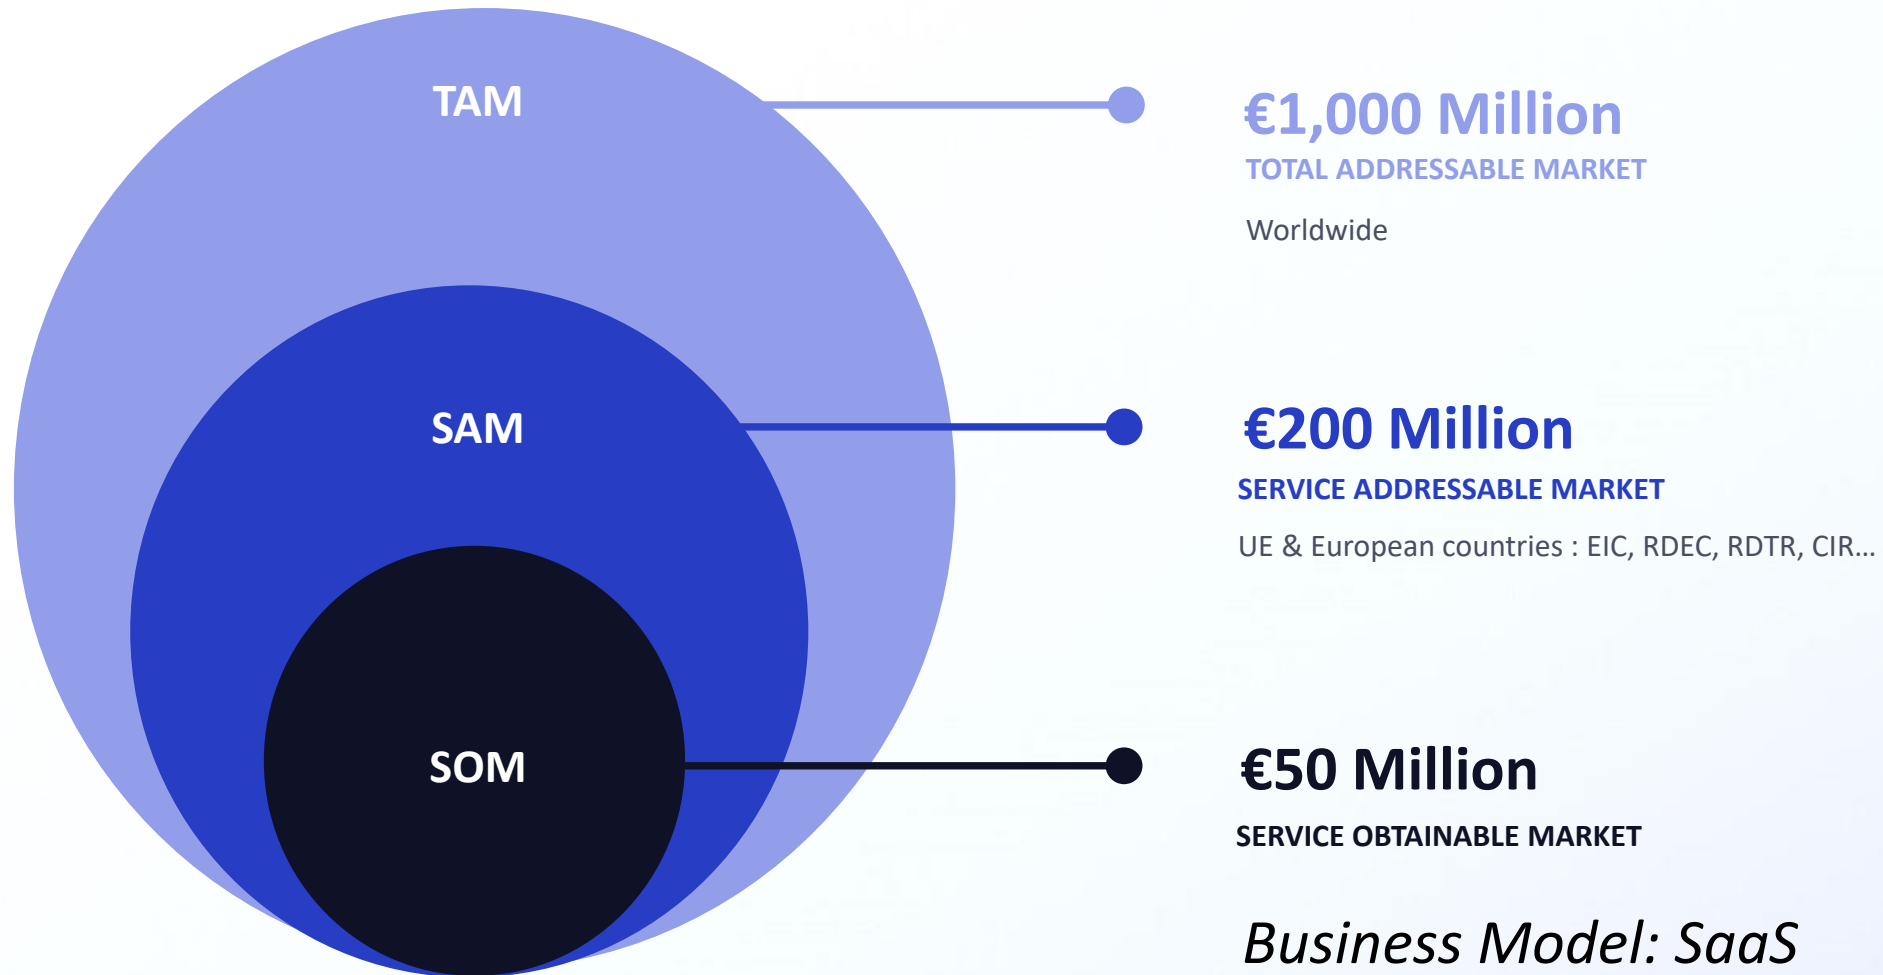

5-500 collaborators

NEED

Higher productivity

Market Size

Demo
