

TeachWise

Twelve Labs Weekend Hackathon

The Team

It's only me 😄

Introduction

Have you ever wished for a smarter way to improve your teaching skills? Meet TeachWise, a practical solution designed to enhance the learning experience. With TeachWise, you can upload videos of your presentations or lessons and engage in meaningful conversations with the Twelve Labs Model. Receive tailored suggestions and insights to refine your teaching approach.

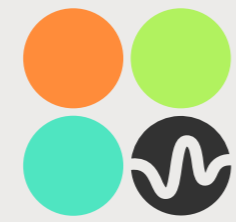

Why Education sector?

The education sector is ripe for innovation, with technology playing an increasingly vital role in modern teaching methods. However, many existing tools focus solely on content delivery, overlooking the crucial aspect of personalized feedback and improvement. TeachWise fills this gap by offering a platform where educators can receive targeted suggestions and enhancements for their teaching techniques. By harnessing the power of AI, TeachWise aims to empower educators to create more engaging and effective learning experiences for students.

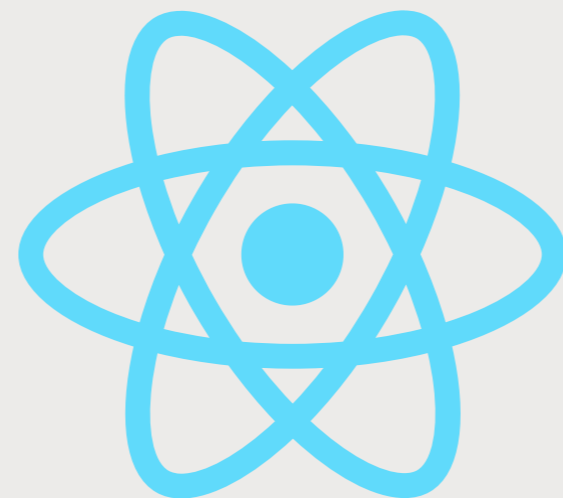

Limitations of TeachWise

- Hallucinations (As with any other solution out there)
- Technical constraints (Running on free resources, so slow)
- Limited Scope (Being a demo, it only showcases the possibilities of utilizing AI in education sector)

Tech Used

Twelve Labs

Thank you
