Hello 🇬🇧

Hola 🇪🇸

مرحبًا 🇸🇦

Pẹlẹ o 🇧🇯

Coming soon

Blingbolt

Connecting Every Professional, traveler, and creator,
beyond Borders, beyond Words! for a seamless Global Collaboration.

Problem Statement

The Challenge of Multilingual Communication

- Global teams and travelers often face communication barriers.

- Misunderstandings due to language differences can hinder collaboration.

- Existing translation tools are often cumbersome and lack real-time capabilities.
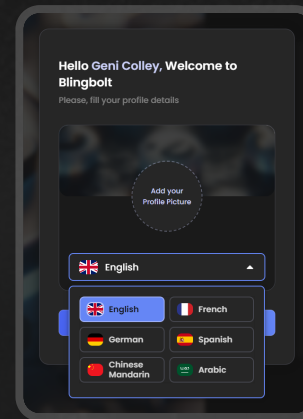

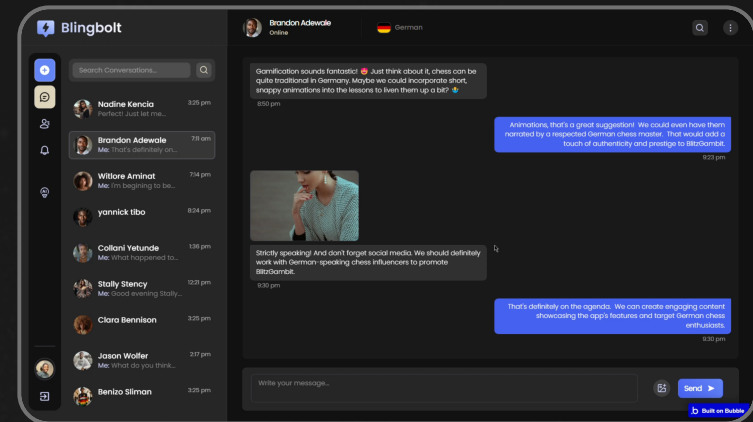

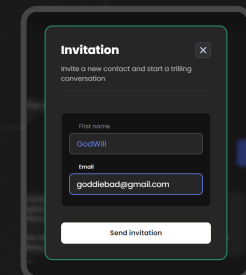

Solution

AI-powered messaging platform that translates messages into the recipient's chosen language instantly.

Supports local languages and beyond.

Enhances understanding and collaboration among diverse language speakers.

Blingbolt

Key Features

Instant Translation:

Send messages in your language; recipients receive it in theirs.

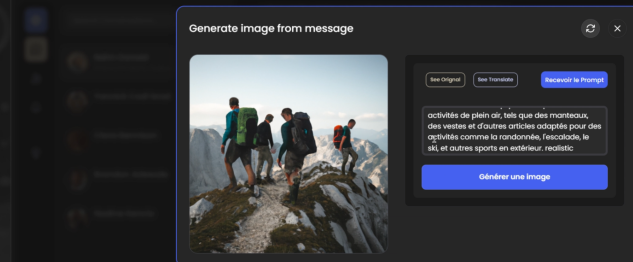

Chat with Images:

Understand and interact with images directly.
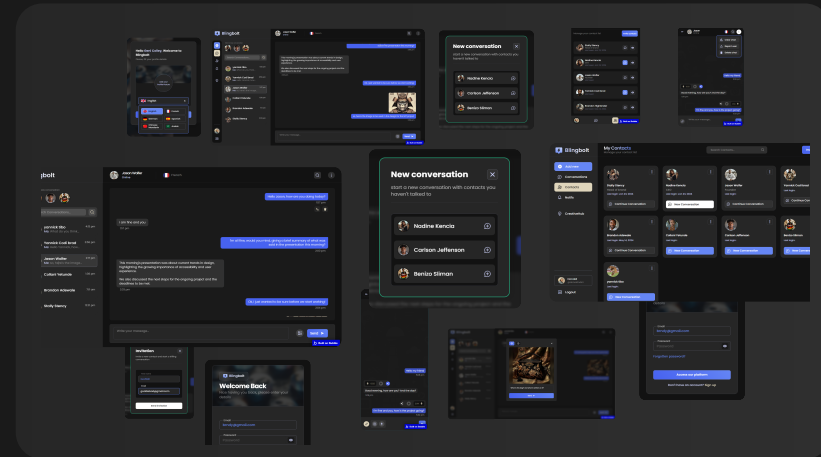

Key Features 2

AI-Generated Images:

Visual representations of messages for better context understanding and prompt generation for creating similar images.

User-Friendly Interface:

Built on bubble.io for seamless user experience.

Technological Stack

Cutting-Edge Technology Behind BlingBolt

- Utilizes Open AI's GPT-4o, GPT-4 Vision, DALL-E 2 & 3.

- Leveraging no-code platform Bubble.io for rapid development and deployment.

  Ensures robust and scalable communication solutions.

Target Audience

Who Can Benefit from BlingBolt?

Business Professionals:
Collaborating across global teams.

Creators:
Working on international projects.
