# PROBLEM/SOLUTION

## *Problem*

"The current method for diagnosing the root cause of car part failures is highly inefficient, lacking a centralized and user-friendly solution for issue identification"

"We are utilizing Langflow to develop an AI-driven chatbot. By providing a description of your problem, the chatbot can identify potential causes and offer effective solutions. The AI can also provide information about each vehicles within the brand."

## *Solution*

# B2B SUBSCRIPTION SERVICE

- Integration of AI Solution into Mobile Applications
- Scales and enhances brand mobile app capabilities
- Improves 24/7 customer service support on vehicular troubleshoot
- Decreases manpower and overhead costs associated
