# IELTS Progressor

This web application uses Generative AI to personalize tests that assess your IELTS proficiency level. Based on the results, it creates customized articles within your "Growth Zone," helping you improve your English skills effectively.

START

Kick off with a medium-level paragraph.

Step1

Find out your IELTS score estimate.

Step2

Highlight any words that trip you up.

Step3

Get reading materials that feel just right—challenging yet doable.

Step4

Keep at it! Practice with new passages until you've had enough.

Step5

You're done! Great job pushing your limits!

IELTS is a standardized test designed to measure the language proficiency of people who want to study or work in environments where English is used as a language of communication. It covers four language skills – Listening, Reading, Writing, and Speaking. The IELTS test is jointly managed by the British Council, IDP: IELTS Australia and Cambridge Assessment English. It was established in 1989 and has since become one of the most widely recognized English language tests globally. IELTS is accepted by most Australian, British, Canadian, Irish, New Zealand and South African academic institutions, over 3,000 academic institutions in the United States, and various professional organizations across the world. It is also a requirement for immigration to some countries such as Australia, New Zealand and Canada. The test is designed to assess the language ability of candidates who need to study or work where English is the language of communication. There are two versions of the IELTS: Academic and General Training. The Academic version is for test takers who want to study at higher education or professional registration level, while the General Training version is for those who want to migrate to an English-speaking country or train or study at below degree level.
