

A young girl with dark hair and a purple headscarf is looking through blue metal bars. Her face is partially obscured by the bars, and she has a serious expression. The background is a light-colored wall.

LITERAL

Saving Lives Through AI-Powered Asylum Preparation

The Reality

1 Interview

1 Chance

1 Life at Stake

1 Wrong Answer

It can mean the difference between life and death for an asylum seeker.
In 2023, over 75,000 asylum seekers were deported back to life-threatening situations.

1 MILLION +

Over a million asylum seekers are waiting for interviews...
Let that sink in, this more than the entire population of San Jose, Ca.
More than 380 thousand have been waiting for more than 2 years.

Department of Homeland Security

How Literal Helps

Literal leverages AI to decrease inconsistent testimonies.

The tool also empowers asylum seekers to help themselves with mock interview question training, testimonial evaluation and access to legal documentation which both hard to find and difficult to understand.

A chatbot interface that provides accurate mock interview questions can create better responses when in the stressful immigration interview.

It's like muscle memory for the brain.

- Improved psychological state
- More consistent responses
- Builds confidence by creating expectations

4.5 Years

The average wait time for asylum interviews is about 1,650 days
Imagine living that long with anxiety of a death sentence.

Impact

U.S. Citizenship and Immigration Service now has more than 1 million asylum cases pending.
800,000 have been pending for more than the statutory cap of 180 days.
380,000 individuals have been waiting for more than 2 years.
750,000 asylum seekers were deported in 2023

How Literal Works

A chatbot interface allows asylum seekers to get credible information and documentation regarding immigration interviews and hearings.

Input → AI Processing → Practice → Success

- As Easy as Having a Conversation
- Powered by Advanced AI (Llama 3.2)
- Uses Real Government Application

A chatbot interface allows asylum seekers to get credible information and documentation regarding immigration interviews and hearings.

Example of AI Features:

- Natural Language Interface (LLM)
- RAG Integration
- AI Assisted Diagnosis
- AI Agent-based Functions
- AI Driven Reports

Reward

I can only convey the reward for partners and investors using simple math.
Each \$1 invested = 1 person protected

Get Involved!

Become a partner and help Literal save lives.

Partnership Levels

Protector: \$500 = 500 lives

Guardian: \$5,000 = 5,000 lives

Champion: \$50,000 = 50,000 lives
