

Llama Lingo

A Language-Learning App
Built Around Meta's Llama 3.2
Vision Model

Vision-Capable LLMs Provide a New Way to Learn Languages

Instead of thinking about words and sentences in the abstract, we can have LLMs quiz us about objects in our immediate surroundings.

This makes for a more stimulating and memorable learning experience.

Llama Lingo is also modular: Using Llama Index, Llama Lingo can be made to work with any language - even low-resourced languages which are outside Llama's default capabilities! 😊

Demo:

Chat with Llama Lingo [↗](#)

Fill in the missing words: (in Spanish) 😊
