To innovate and create solutions that will shape the future of English proficiency test learning

Table of contents

About This Project

This Project is based on my research. It provides a comprehensive benchmark of the impact of IBM Watsonx Assistant on English proficiency test learning.

The Purpose

Problem Statement

Innovative Solutions

Discover Business Potential

Flowchart of actions

The purpose

I committed to empowering foreigners' student to have or improve the English proficiency test skills. By leveraging technology, I aim to revolutionize English proficiency test learning, shaping a future of English proficiency test learning that is interactive, effective, and available worldwide.

● PROBLEM STATEMENT

Expensive English proficiency test courses

Limited Personalized Attention

Reduced Interactive English proficiency test Learning

Solution

SELF LEARNING

I develop effective and interactive self learning solution to help student get more knowledge to pass English proficiency test.

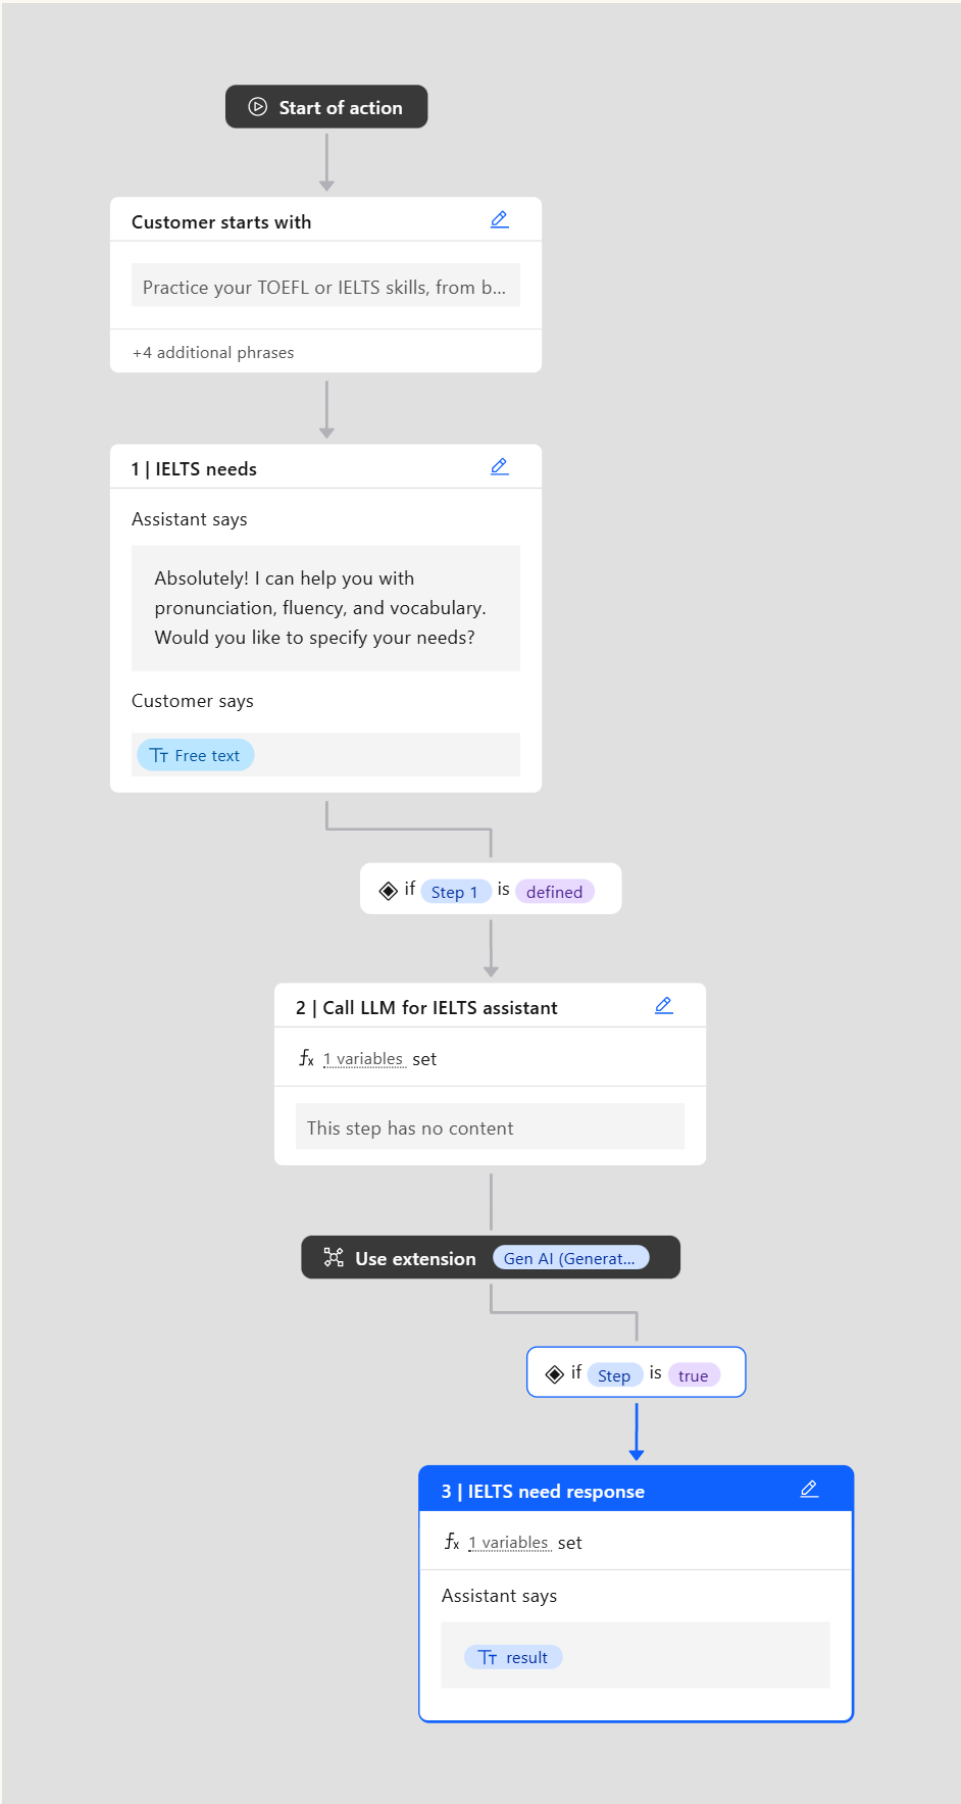

● Business Potential

English proficiency test- takers worldwide

High demand English proficiency learning tools

A Growing market for AI
