Welcome to

LINGOGRADE

AI-powered speech analysis for real-time feedback on pronunciation, grammar, and fluency. Speak confidently and learn faster—perfect for all levels!
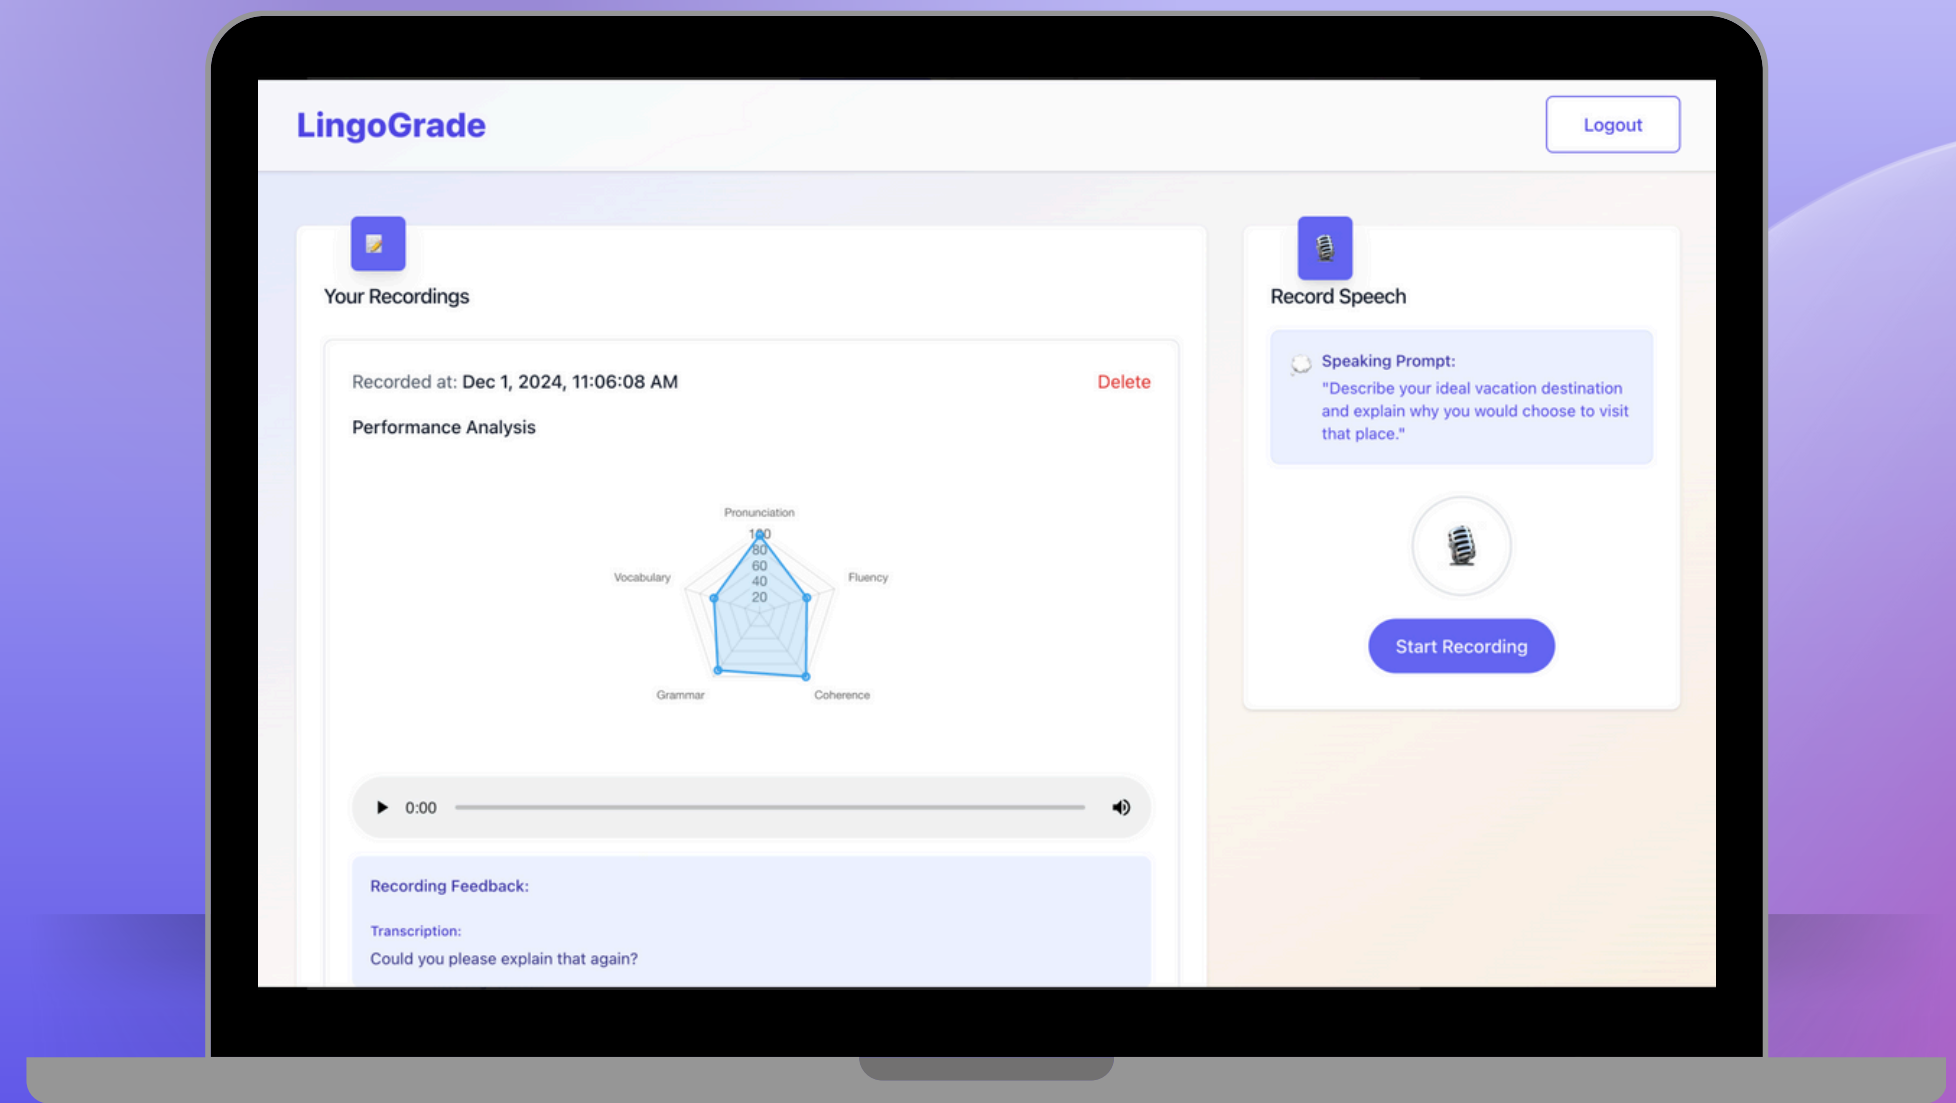

LINGOGRADE

Transforming Speech
in The Digital Age

In a world driven by technology, LingoGrade leads the way in educational innovation. Powered by the cutting-edge Gemma 2 AI model, our audio-based speech analysis tool harnesses the transformative power of AI to refine pronunciation, grammar, and fluency—shaping confident communicators for the future.

AI-Powered Speech
Analysis Tool

This tool is an interconnected network of digital tools and platforms that work together to enhance the learning experience. It combines components like AI-powered apps, virtual classrooms, content libraries, and analytics systems to provide personalised, accessible, and engaging education.

Performance Analysis

Record Speech

Speaking Prompt:
"Describe your ideal vacation destination and explain why you would choose to visit that place."

Start Recording

▶ 0:00

Recording Feedback:

Transcription:
Could you please explain that again?

How do we store your data?

- Database: User data is securely stored in an SQLite database for organised management.
- File Storage: Audio recordings are saved in a dedicated storage directory.
- Security: Data integrity and user privacy are prioritised, with safeguards in place to prevent unauthorised access.

LINGOGRADE

Shaping the Future

At LingoGrade, we are committed to shaping the future of language learning by harnessing the power of AI. Through cutting-edge technology, we aim to empower learners of all levels to master language skills, build confidence, and communicate effectively in an ever-evolving world.
