HEALTHWISE

YOUR HEALTH. OUR MISSION.

THE PROBLEM

Rapid spread of infectious diseases outpaces detection and response.

Lack of integrated systems for real-time symptom tracking.

Insufficient tools for symptom reporting and preliminary diagnosis.

OUR SOLUTION

Symptom Reporting

Easy and intuitive
via a chatbot.

Recommendations

Next steps and
specialist suggestions.

Health Alerts

Epidemic pattern
identification for
rapid response.

Data Analysis

Real-time tracking of
symptoms across locations.

SYSTEM AGENTS

Chatbot Agent

Interacts with users and coordinates with other agents.

Validation Agent

Checks if the query makes sense and identifies any missing or unclear information.

Knowledge Agents

Retrieve relevant medical data from various sources.

Aggregation Agent

Combines data from knowledge agents into actionable in sights.

Logging Agent

Stores and processes detailed reports for visualization.

Visualization Agent

Visualizes outbreak data and enables deeper analysis.

KEY STAKEHOLDERS

Health Authorities

Including epidemiological institutes, for faster outbreak detection and response.

Government Agencies

Local and national, to inform policy decisions and allocate resources effectively.

Medical Researchers

For access to real-time data and insights to advance medical knowledge.

Emergency Responders

To prioritize actions during health crises.

Patients

Empowered with personalized health insights and timely support.

IMPACT

Increased public awareness of health trends.

Faster detection of outbreaks.

Empowering individuals with health insights.

HEALTHWISE

YOUR HEALTH. OUR MISSION.
