# Health Ranger

**A CoPilot for Community Healthcare Workers** 

•

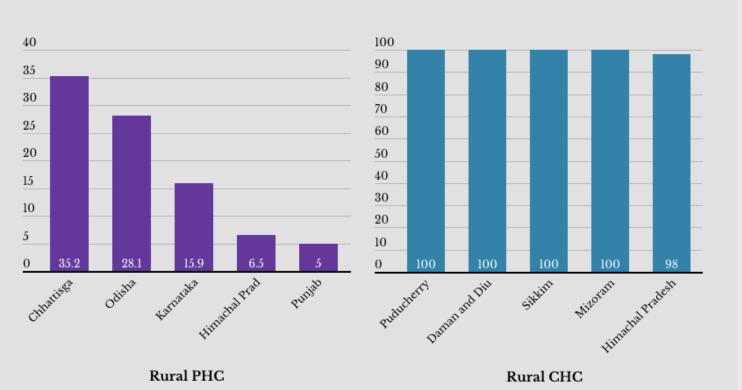

•

Saumo Pal

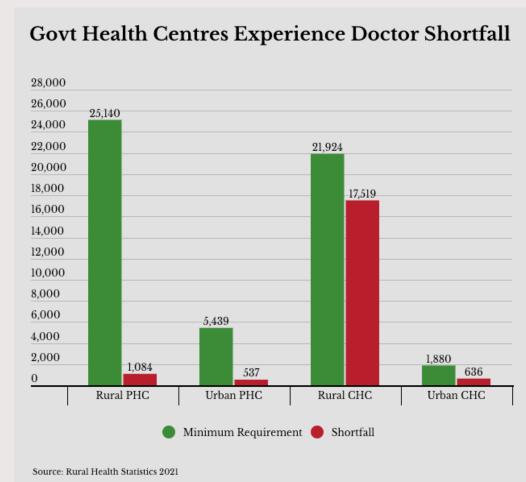

# Healthcare challenges

- Poor doctor to patient ratio
  (1:1500)
- Doctors overloaded; often with non-essential duties
- Low education and technology usage by patients in rural areas

- Doctor to patient ratio around 4.6:1000
- More non-medical staff involved in medical workforce
- Population highly techsavvy/educated

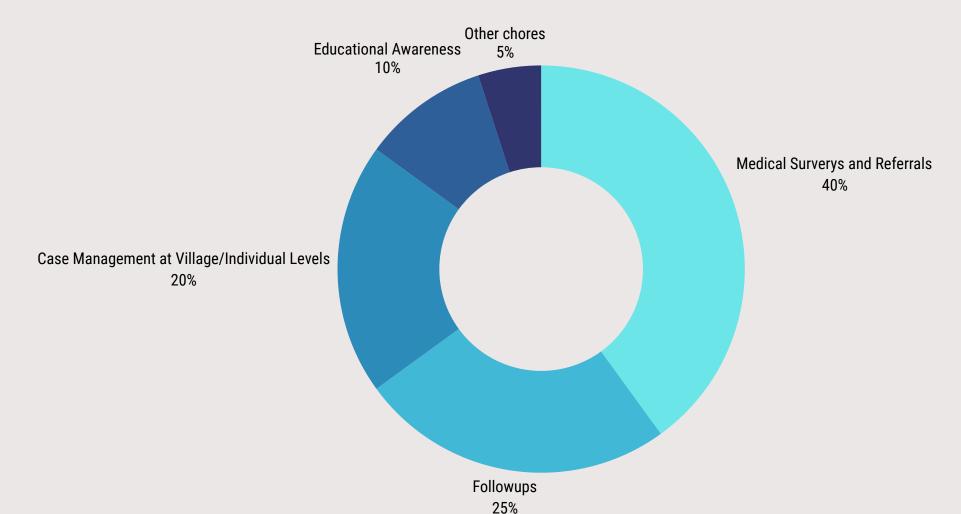

#### Parts of 💞, South 🖏, SE 🥵

 Poor doctor to patient ratio (worse than WHO recommended 1:1000)

# Community Healthcare Workers

#### Roles & Responsibilities

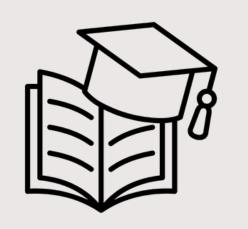

#### **Success Stories**

- In Rajasthan, CHWs have significantly reduced maternal mortality rates by 30% over the past five years by ensuring timely medical care and education on prenatal and postnatal health
- In Uttar Pradesh, CHWs have increased child immunisation rates from 60% to 85% through persistent community engagement and awareness campaigns
- In Kerala, CHWs played a crucial role in controlling the spread of COVID-19, with a 95% compliance rate for quarantine measures and a significant reduction in infection rates

## The Problems with CHWs

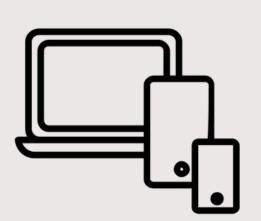

Not highly skilled/educated

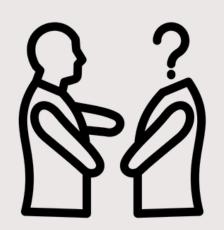

Poor ratio between CHWs and patients

Lack of proper digital tooling

Low to no documentation, lack of adherence by rural patients

# Enter HealthRanger

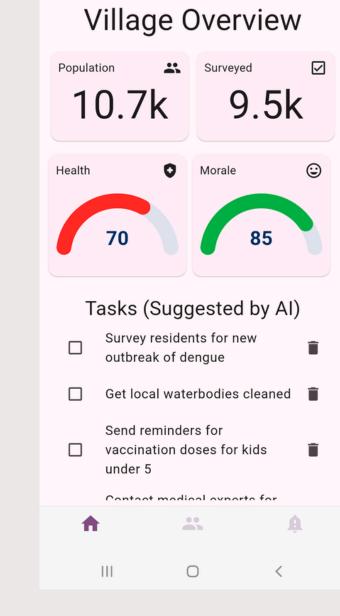

- A CoPilot built for CHWs
- Assists CHWs with
  - Regular surveys
  - Augments survey questions with real time intelligence
  - Helps with case management
  - Creates real time alerts to inform other
    CHWs/health ministry with updates on outbreaks
  - Automates followups/reminders for patients
- Shoutout to Gemini AI and Firebase tools
  - Long context windows
  - Multimodal and multilingual support
  - Firebase Genkit

# Demo and Basic Walkthrough
