# Granitefit AI

AI-driven Employee Health & Well-being Platform  
Generative AI Hackathon with IBM Granite

# Problem Statement

- ▶ Issue: Sedentary lifestyles in modern tech workplaces lead to physical & mental health issues.
- ▶ Pain Points:
  - Long sitting hours 🪑
  - Eye strain 👁️
  - Poor work-life balance ⚖️
  - Mental health struggles 🧠

# Our Solution

- AI-driven Platform for workplace wellness.

## Provides:

- ▶ Reminders for movement, hydration & eye care.
- ▶ Work-life balance optimization.
- ▶ Mental health recommendations.

# Key Features

- 1 Smart Reminders - Alerts for breaks & posture correction.
- 2 Eye Protection AI - Screen brightness adjustments.
- 3 Work-Life Balance Assistant - Prioritizes tasks.
- 4 Mental Health Monitoring - AI-driven stress reduction suggestions.

# Tech Stack

## Programming Language

Python

## Frameworks/Libraries:

- **Streamlit** : For building the interactive web interface.
- **PyTorch** : For implementing the Deep Q-Network (DQN).
- **AI & ML**: IBM Granite AI, OpenAI GPT
- **Frontend**: Streamlit, React (planned UI enhancement)
- **Backend**: FastAPI, Flask
- **Database**: MongoDB, PostgreSQL
- **Cloud & Deployment**: IBM Cloud, AWS, Docker

## IBM Granite AI Integration

- **Used IBM Granite Models for:**
- **Health recommendations.**
- **Personalized AI-based reminders.**
- **Smart workplace assistant.**

# Models Used

## IBM GRANITE MODEL

- **Health IBM Granite AI Integration**
- **recommendations.**
- **Personalized AI-based reminders.**
- **Smart workplace assistant.**

# Use Cases

## Corporate Wellness

### Programs:

- **Corporate Wellness Programs:** AI-driven health tracking for employees to improve workplace wellness.

## Medical Reminders for Patients:

- Ensuring timely medication and health checkups.
- **Smart Office Assistance:** Automating meeting schedules, document creation, and voice-controlled tasks.
- 

## AI-Guided Fitness Coaching

- **Personalized AI-generated workout plans and progress tracking.**

# Business Market Value

## TARGET AUDIENCE:

**Corporate professionals, healthcare providers, and tech-driven organizations.**

- **Revenue Model**
- **B2B Licensing: SaaS-based subscription for enterprises.**
- **Freemium Model: Basic AI reminders for free, premium features for subscription.**
- **Partnerships: Collaboration with healthcare providers and HR tech companies**

## MARKET SIZE & GROWTH:

- **AI in Healthcare Market: Estimated to reach \$67.4 billion by 2027.**
- **AI in Workplace Automation: Projected to grow at a CAGR of 22.5%.**
- **Target Audience: Corporate professionals, healthcare providers, and tech-driven organizations.**

# Competitor Analysis

- BM Watson Health: Advanced AI solutions but primarily focused on clinical data analysis rather than personal reminders.
- Google Health AI: Strong in data analytics but lacks integration with workplace automation.
- Microsoft Cortana & AI Assistants: Offers general AI assistance but lacks deep health-focused capabilities.
- Startups in AI Wellness Tech: Many startups focus on AI health tracking but lack enterprise-scale automation solutions.

## ► How Alstronauts Stands Out

End-to-End Solution

Cost-Effective

Scalable and Modular

AI-Driven

User-Friendly Interface

# Future Vision

**Phase 1:** MVP Development & Beta Testing.

**Phase 2:** AI Enhancement with Deep Learning Algorithms.

**Phase 3:** Expansion into Global Markets & Enterprise Adoption.

**Phase 4:** Integrating AI Wearables & IoT Devices.

**Phase 5:** AI-driven game instructions using facial recognition technology.

**Eesha Tariq**  
AI/ML Engineer

**Shams Liaqat**  
Python Developer

# AI Ninjas Team

**Badar Ur Zaman**  
Full Stack Engineer

**GodFrey**  
AI Engineer
