

# Project Vision

TRANSFORMING LEGACY CODE INTO MODERN  
SOLUTIONS

---

# The Challenge

Obsolete languages  
create maintenance  
hurdles.

Technical debt and  
escalating  
modernization.

---

## Our Solution:

1

Import projects and select code files for automated analysis.

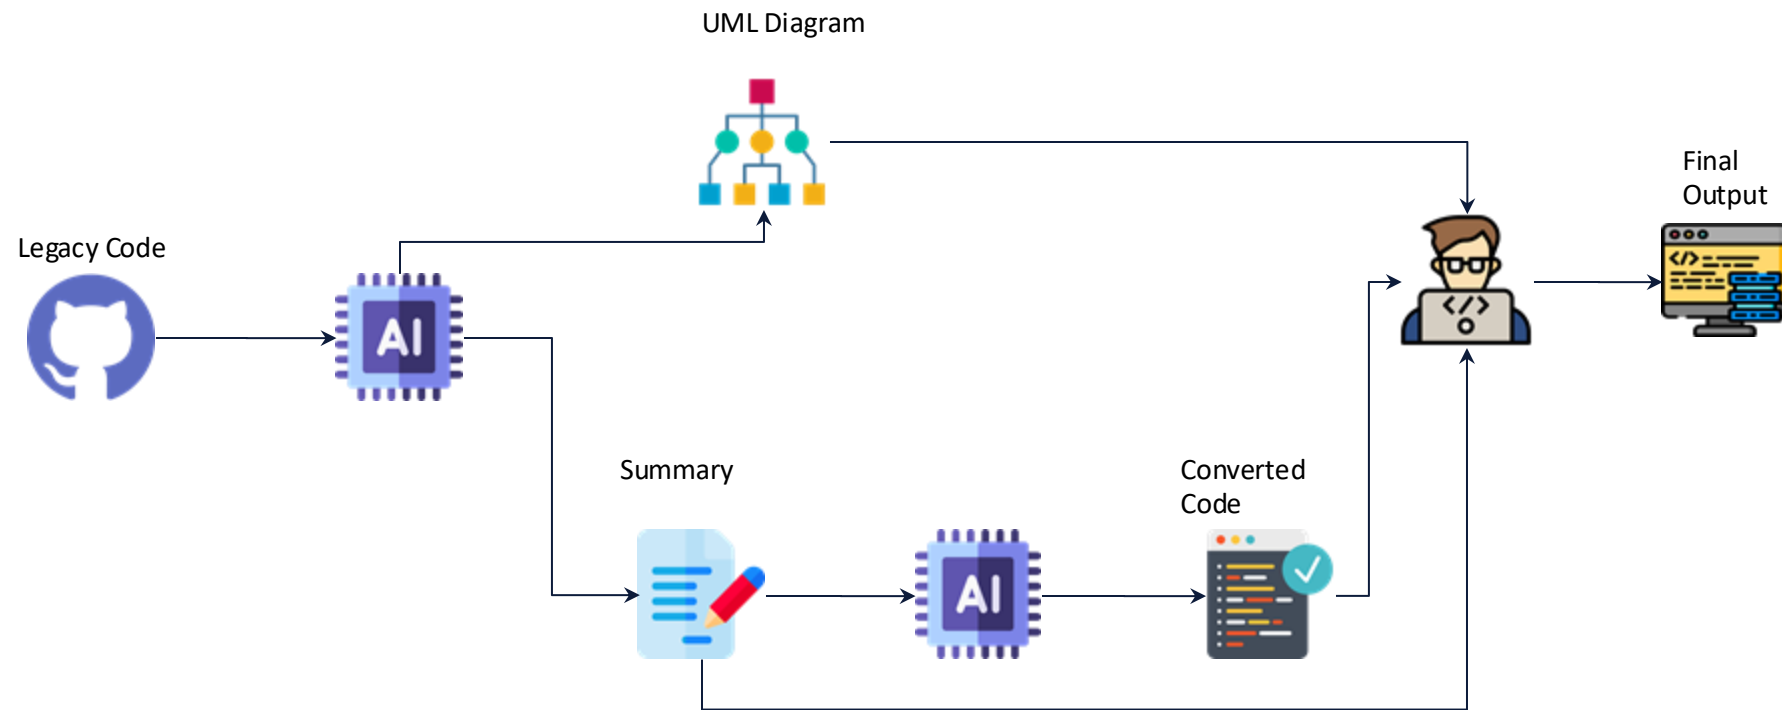

2

Generate use case and class diagrams plus comprehensive summaries.

3

Convert legacy code into a modern programming language effortlessly.

# Our Solution:

---

# Business Value

Unlocks new revenue streams by reducing modernization costs.

Minimizes risk and error during code conversion.

Opportunity for SaaS licensing, consultancy, and integration services.
