MM BILLING SYSTEM

Done by-
SHRI VIGNESH S

The Gap in Billing Systems:

This presentation addresses the significant challenges faced by small businesses regarding outdated and expensive billing systems. It highlights the critical features lacking in current systems, such as **multi-user control**, **supplier dashboards**, and **stock tracking functionalities**. Additionally, it emphasizes the absence of flexibility for franchises and businesses with multiple branches and the need for **user-friendly** and **customizable invoice systems.**

MM BILLING OVERVIEW

Complete Management System
Integrates billing and inventory

Role-based Access
Owner, Manager, Staff roles

Multi-shop support
Admin can manage franchises

MM BILLING OVERVIEW

Sales Analytics Included
Track performance metrics easily

QR Billing Feature
Fast and efficient payment options

Customer dashboard access
Users can view their transactions

Comprehensive Features Overview

Smart Billing with QR/Product Search
Utilize smart billing features that include QR code scanning and product search capabilities to enhance transaction efficiency.

Role-Based Permissions &Multi-Shop Setup
Facilitate a multi-shop setup with role-based permissions, ensuring secure access and streamlined management across different locations.
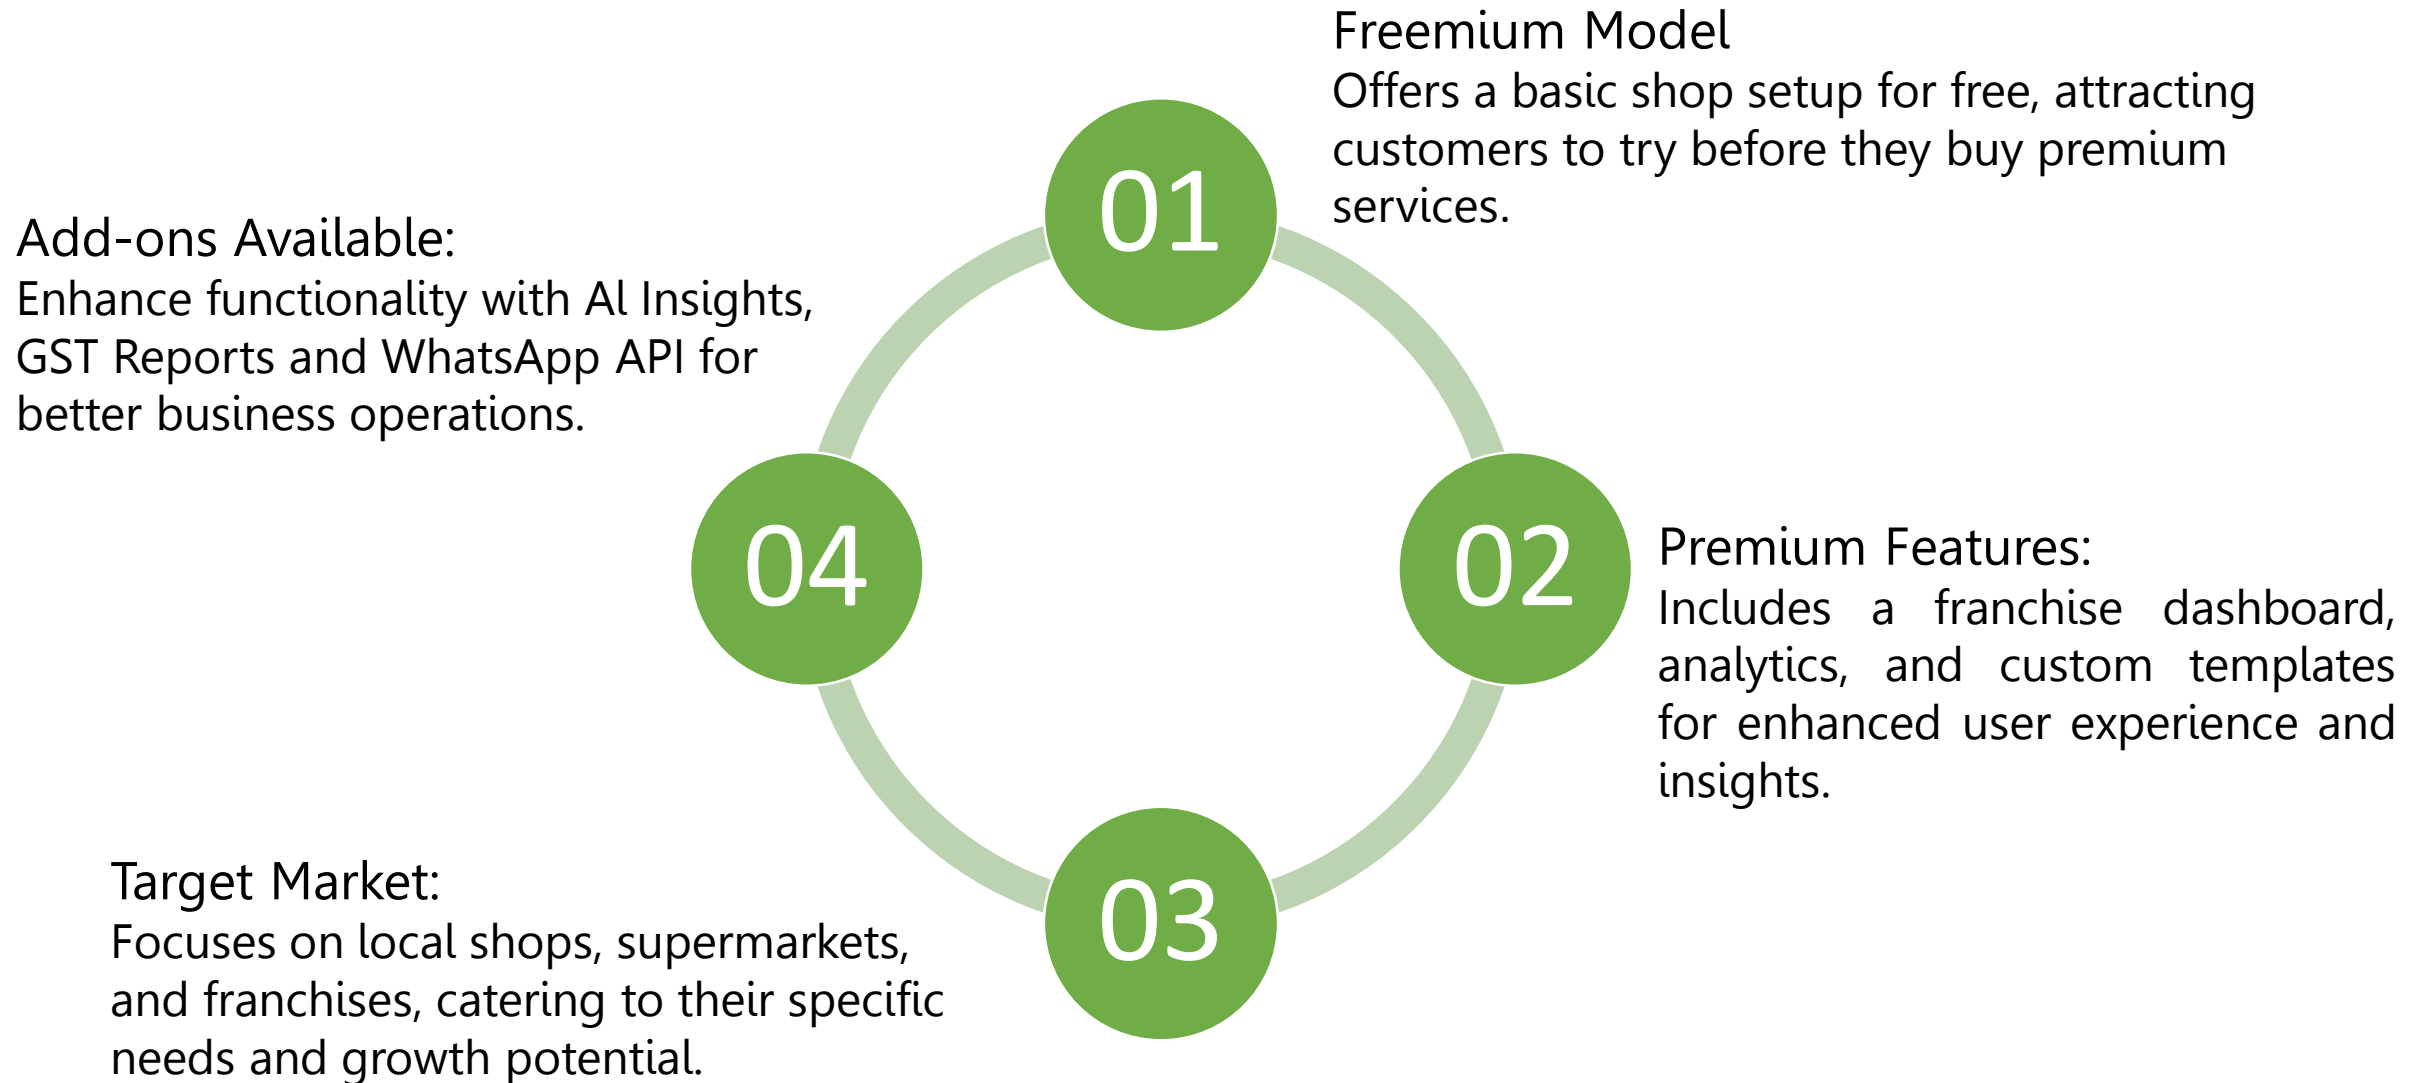

Inventory, Supplier, Purchase& Return Management
Manage all aspects of your business within inventory, supplier, purchase, and return management functionalities integrated into one platform.

Custom Invoice Generator & Excel Import/Export
Create customized invoices easily and utilize Excel import/export for seamless data management and reporting.

Scalable SaaS with Freemium Model

01

Freemium Model
Offers a basic shop setup for free, attracting customers to try before they buy premium services.

02

Premium Features:
Includes a franchise dashboard, analytics, and custom templates for enhanced user experience and insights.

03

Target Market:
Focuses on local shops, supermarkets, and franchises, catering to their specific needs and growth potential.

04

Add-ons Available:
Enhance functionality with Al Insights, GST Reports and WhatsApp API for better business operations.

Empowering Local Retailers Digitally

1 Designed from a Shop Owner's Perspective:
Our platform is tailored directly for shop owners, ensuring ease of use and relevance.

2 Affordable Digitization for Local Stores:
We help local stores transition to digital operations without breaking the bank.

3 Franchise-Ready Setup:
Our solution is ready for multi-location retail brands, allowing seamless franchise expansion.

4 Insightful Dashboards:
Our dashboards provide critical insights that empower better business decisions.

AI-Powered Smart Building Solutions

Vibe Code Visualization:
With Vibe Code, structuring and visualizing component logic becomes intuitive, enhancing the overall efficiency of coding and debugging processes in project development.

Full-stack Project Achievements:
Leveraging advanced AI models such as Gemini, Sonnet 3.7, and OpenAI, the project was successfully completed solo in under 1 month, showcasing the power of AI in development.

AI-Powered Tools Overview:
The integration of Trae AI and Vibe Code facilitates the development of smart buildings by streamlining workflows and enabling efficient visualization of system logic.

Trae AI's Builder Mode:
Utilizing Trae AI's Builder Mode allows users to define workflows and system logic effortlessly, contributing to the seamless development of smart building functionalities.

Future Goals and Collaboration

Integrate GST filing into our Services:
Enhancing compliance by automating GST Filing processes for users.

Implement WhatsApp Integration for customer engagement:
Seamlessly connect with customers through WhatsApp for support and updates.

Collaborate with POS hardware vendors for better solutions:
Partnering to offer integrated systems that enhance retail operations.

Develop an AI chatbot for instant assistance:
Provide 24/7 support and improve user experience with an AI chatbot.

THANK YOU
