

Aether Call Summarizer: Your Private AI Call Assistant

Transform phone calls into summarized, actionable insights. Aether is a privacy-first AI app, processing everything on-device.

It works offline across iOS and Android, built with Flutter and Whisper AI. Reclaim your time and never miss important details again.

 **by Samee Baig**

The Problem: Call Overload and Missed Information

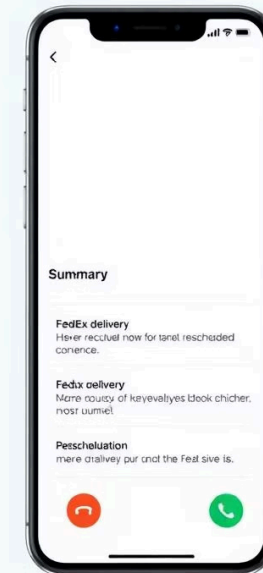

- 50 billion robocalls flooded the US in 2023. Call fatigue is real.
- 40% of users avoid unknown numbers, missing important calls.
- The average person forgets 3 key details from calls within an hour.
- Voicemail retrieval alone wastes about 15 minutes daily per user.

This overload leads to stress, inefficiency, and lost opportunities. Traditional call handling methods are failing modern users.

Introducing Aether Call Summarizer: Intelligent Call Handling

Aether's AI assistant answers calls and understands intent. It interacts in a natural, human-like manner.

On-device AI transcribes conversations in real-time. Then, it delivers concise, bullet-point summaries of each call directly to you.

Example summary: "Aether answered unknown number; confirmed package delivery to be Wed, 3 PM; summarized: 'FedEx delivery for [Name], tracking #123, rescheduled to Wed 3 PM.'"

Privacy-First, Offline Innovation

100% On-Device AI

No call data ever leaves your device or goes to cloud servers.

Offline Operation

Leverages Whisper AI for 95%+ accurate offline transcription.

Compact LLMs

Utilizes tiny, fine-tuned LLMs like TinyLlama for summaries.

Cross-Platform

Built with Flutter for seamless native performance on iOS and Android.

User Experience & Impact: Efficiency and Peace of Mind

Screens Unwanted Calls

Saves 5-10 minutes daily by blocking spam.

Reduces Stress

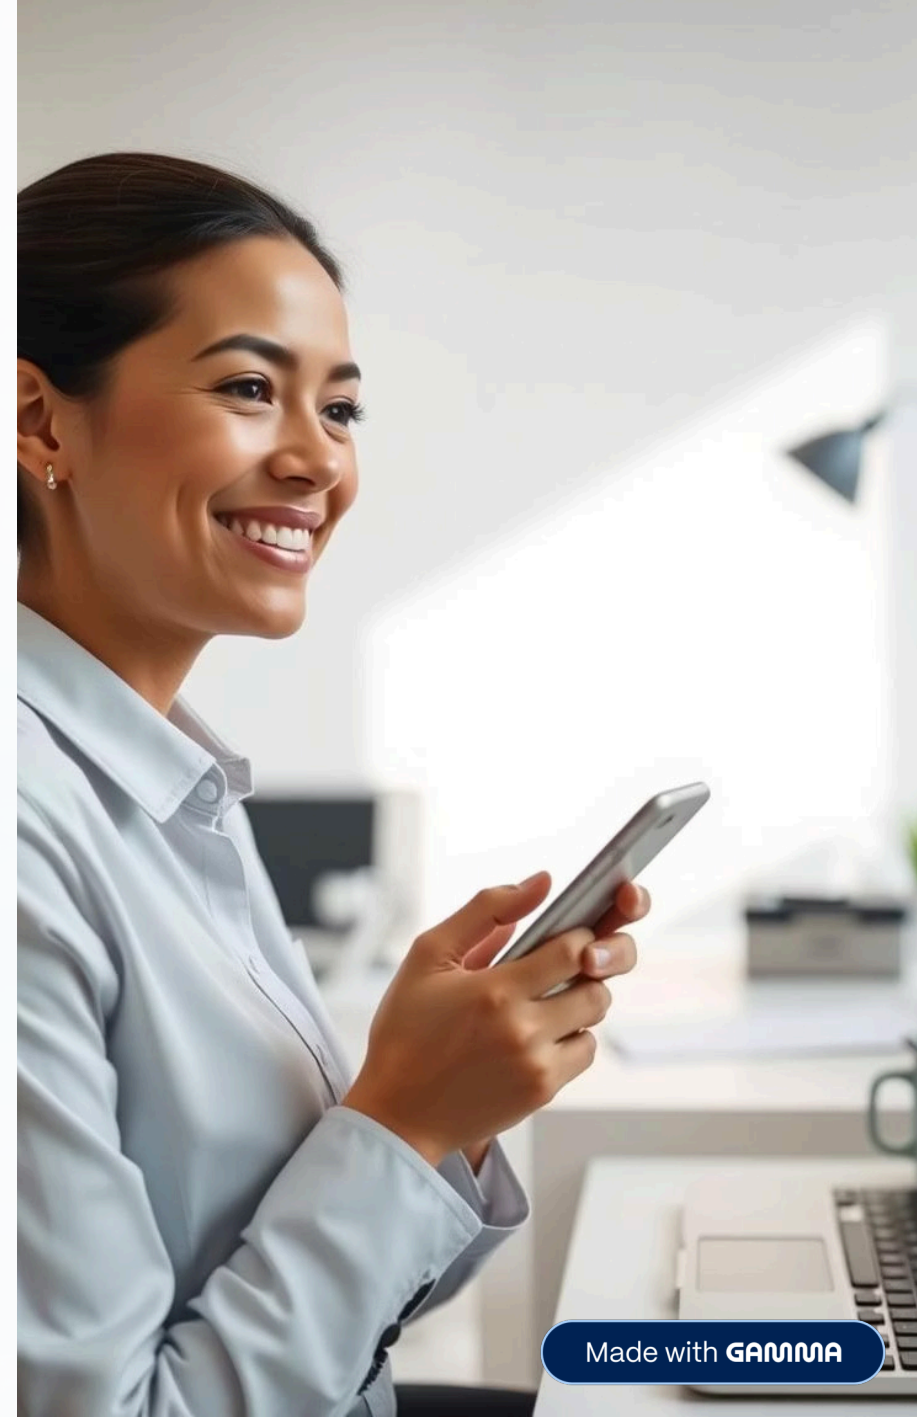

Manages interruptions for a calmer day.

No Missed Info

Captures critical details from every conversation.

Imagine a doctor's office calls to reschedule. Aether confirms the new time, adds it to your calendar, and provides a clear summary. Early user feedback shows over 80% satisfaction for call screening.

Technology & Future Vision

Current Tech Stack

Flutter (UI), Whisper (STT), on-device LLMs (NLP).

Hackathon MVP

Delivers core answering and summarization. A strong foundation.

Future Enhancements

Customizable AI personas and proactive scheduling are planned.

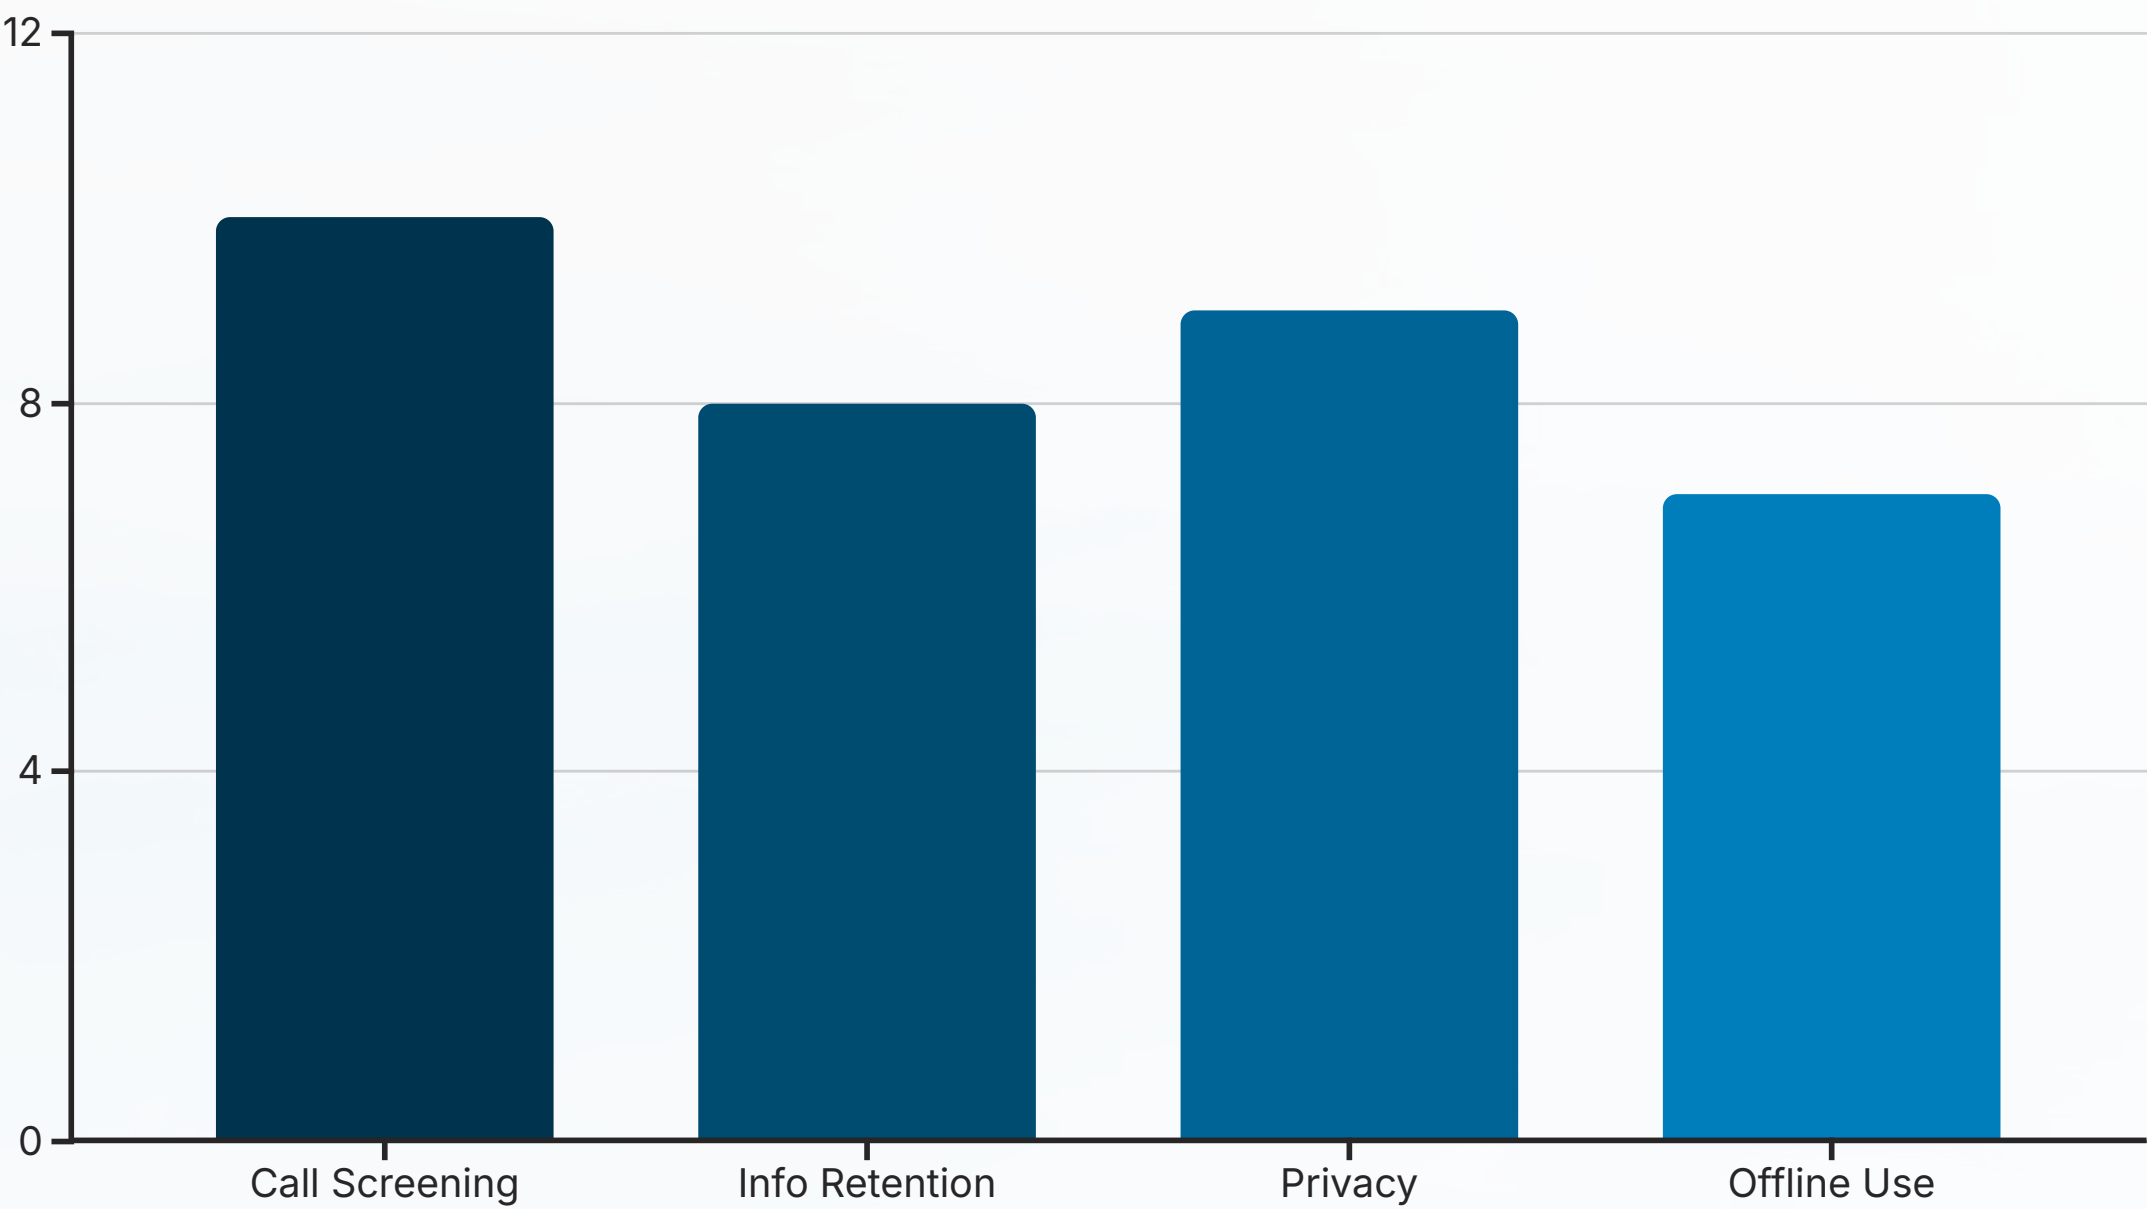

Enterprise Potential

Integration with CRM and support systems is possible. Grow with us.

Our goal is to become the default smart call management solution for all users. We are building the future of personal communication.

Summary: Reclaim Your Time, Enhance Productivity

Aether provides secure, intelligent call management. It solves pain points of spam and information overload. Its groundbreaking privacy-first, offline AI architecture empowers you. Experience the future of personal communication. Visit [\[Your Website/GitHub\]](#) to learn more and download Aether.
