Reimagining Event Experiences, Intelligently.

RAISE AI Hackathon 2025

The Event Dilemma

70%

of professionals attend events that don't align with their career goals

(Bizzabo, 2023)

1 in 3

say irrelevant events hurt productivity

(Forrester, 2022)

$600M/year

is wasted globally on low-impact professional events by enterprises alone.

(Allied Market Research)

"We attend, we smile, we network — but leave asking 'Was it even worth it?'"

Too many events. Too little ROI.

Introducing **EventIQ**

Reimagining Event Experiences, Intelligently.

An AI assistant that helps you decide if an event is worth your time — based on your LinkedIn profile, goals, and event agenda.

3 Reasons People Love It

Smart Fit Recommendations

Analyzes your professional profile and matches it with event content to find perfect alignment with your career trajectory.

Time ROI Clarity

Calculates potential return on time investment based on your goals, networking opportunities, and skill development potential.

Networking Intelligence

Identifies valuable connection opportunities by analyzing attendee lists and speakers against your professional network gaps.

How It Works

Tech Stack Components

Prompt Prototyping

NativelyAI Conductor was used to scaffold agent logic and prompt structures. It also helped with early UI interaction flows.

AI Workflows

Langflow, an open-source visual builder, was used for LLM orchestration in the tech stack.

Model Provider

Groq, utilizing LLaMA 3.1 8B-Instant, was selected for its low-latency inference capabilities.

Context Parsing

MCP Server Fetch was used for extracting structured data from LinkedIn and event pages.

EventIQ - AI-Powered Event Evaluation Assistant

User · Frontend App (UI) · Langflow AI Workflow · MCP Server Tool · Groq LLM Agent · NativelyAI Conductor

Input Phase

Enters LinkedIn URL, Career Goal, Event Link

Early Development (Prompt Prototyping)

(Early stage only)

Test prompts and logic

Final Version Flow

Send LinkedIn URL, Career Goal, Event Link

Langflow Toolset

Fetch structured data from LinkedIn and Event page

Return structured profile and event details

Analyze fit, generate insights

Return Goal Fit, Network Boost, Brand ROI, Summary

Return insights & verdict to frontend

• Display: Goal Fit, Network Boost, Brand ROI, Summary

Real-Time AI, Real Value

One-click evaluation powered by Groq

Behind the scene: From Chaos to Clarity...
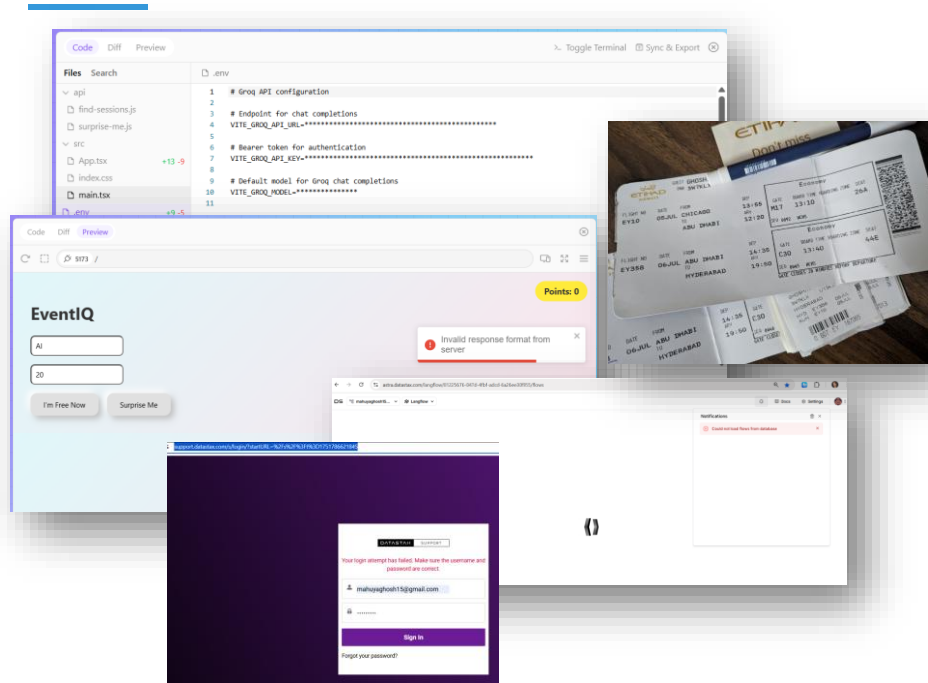

When nothing worked... and then everything did!

Ctrl+Z was our best friend. ☺

Started with just two buttons — *'I'm Free'* **and** *'Surprise Me'*.
Turns out, the real surprise was how many things could break at once.

July 6th. Abu Dhabi Airport. Flight EY358.
Somewhere between Gate 5 and a terminal timeout, I got locked out of my own app mid-debug. That login screen? Mocked me the whole flight.

When I was *this* **close to quitting...**
Mid-air, mid-debug, mid-meltdown — I almost gave up.
But scrolling through Discord, seeing messages from mentors like Emmanuel, Tommy, and Inaam... gave me just enough spark to hang on.
One more try — and Groq magic kicked in ✨

Thank You!
