

QUBIC DEX

Volatility is the new normal.
Survival needs prediction

TEAM – HADEAN EON

THE PROBLEM

Centralized exchanges fail users:

 Slow

 Custodial

 Not transparent

“Traders want true control & trustless execution.”

OUR SOLUTION

A decentralized exchange on Qubic Network

“Self-custody, instant trades, no middlemen”

HOW IT WORKS!!

- **CollateralVault** — store your crypto securely
- **PositionManager** — open & close trades
- **PriceOracle** — real-time price feeds
- **LiquidationEngine** — auto protects funds

TECH STACK

UNDER THE HOOD

- **Frontend:** Next.js, React, Tailwind
- **Smart Contracts:** C++ on Qubic
- **Wallet:** WalletConnect, MetaMask Snap
- **RPC:** Secure WebSocket connections

CORE FEATURES

AI powered early warning radar for financial disasters.

Core Idea:

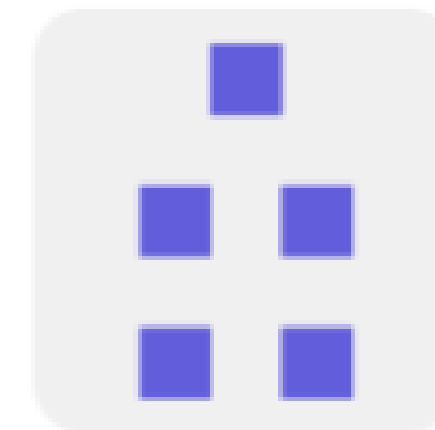

Predict and protect against rare, high-impact financial threats before they strike.

What It Does:

- Analyzes real-world news + personal finances
- Simulates worst-case scenarios
- Deploys AI-generated defense strategies in real time

BACKEND

Rudra-rps/ TradeDex

A Derivatives DEX prototype built with C++ and
simulated liquidation engine
