Features: Code sync

The image shows a screenshot of the Vibeman IDE interface. On the left, the 'Project Settings' panel is open, displaying configuration for 'Simple #3' on port 3100. The 'PROJECT NAME' is 'Simple #3', the 'PORT' is '3100', and the 'PROJECT PATH' is 'simple'. The 'DESCRIPTION' field contains 'Optional project description...'. The 'Git Configuration' section shows the 'REPOSITORY URL' as 'https://github.com/xkazm04/simple' and the 'BRANCH' as 'master'. The 'Auto-sync on start' checkbox is checked, and a 'Vectorize' button is visible. On the right, the main IDE window shows the 'Code Structure' panel with a tree view of the project files and folders, including 'simple', 'public', 'src', 'app', 'next-env.d.ts', and 'next.config.ts'. The 'Backlog' panel on the right lists tasks such as 'Implement Dark Theme Styling', 'Restructure Page to 3x3 Grid', and 'Optimize CSS for Grid Layout'. A white arrow points from the 'PROJECT PATH' field in the settings to the 'Code Structure' panel.

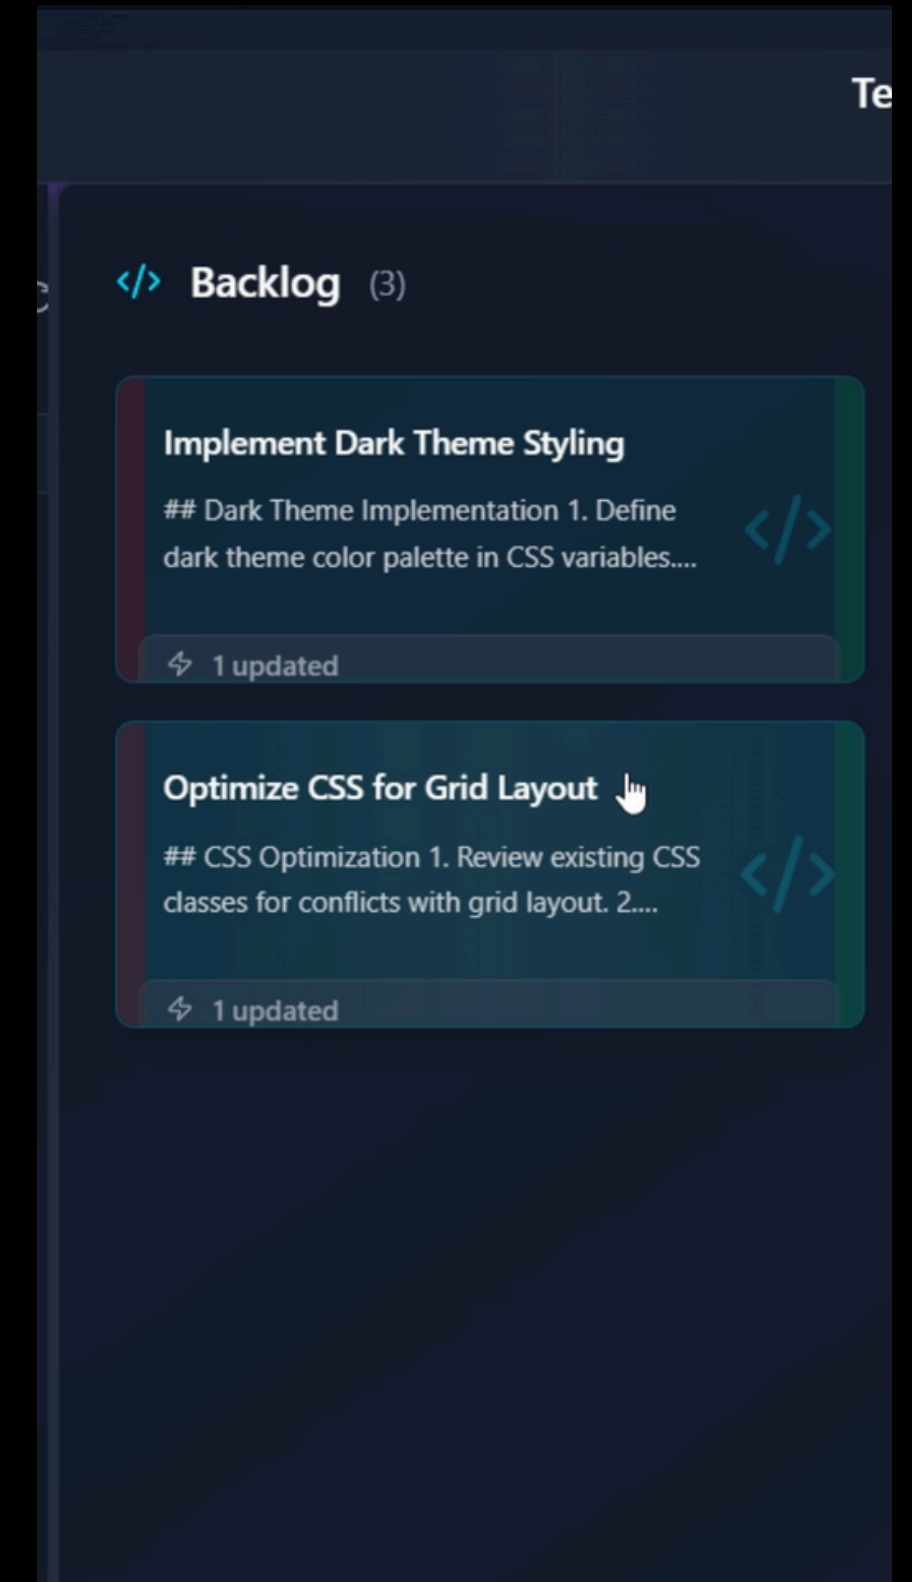

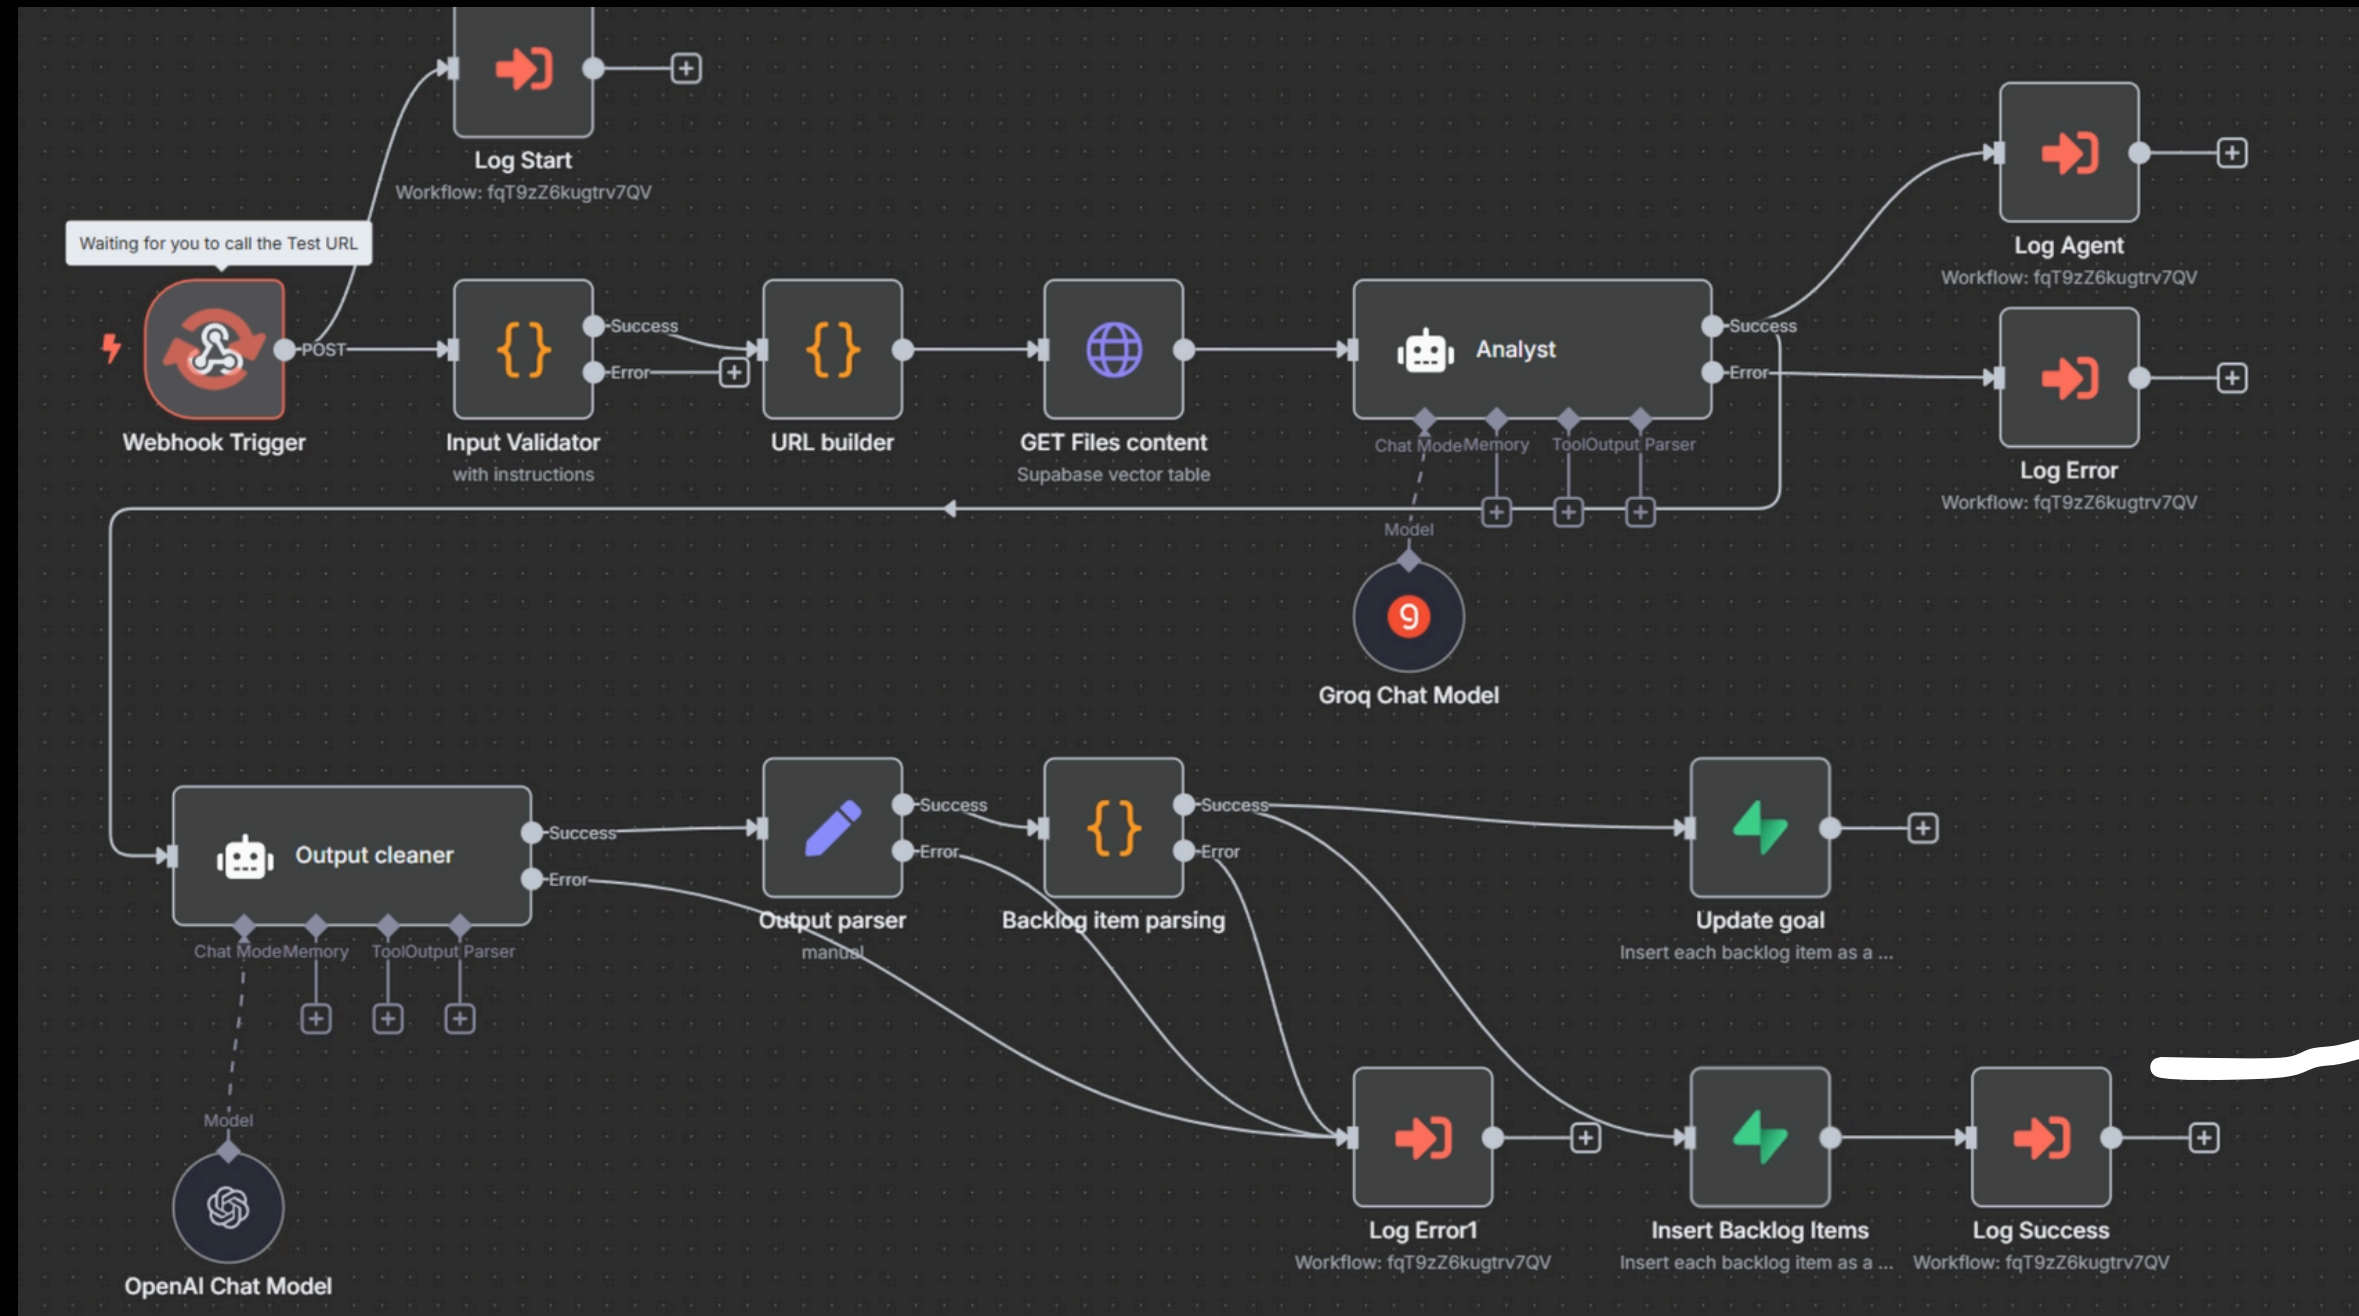

- Local sync

- Github sync

- Repo vectorization

Description

Grid Layout Implementation

Wrap existing content in a grid container.
Define grid template areas for 3x3 layout.
Assign grid areas to child elements.

```
<div className='grid-container'>
  /* existing content */
</div>
```

```
.grid-container {
  display: grid;
  grid-template-columns: repeat(3, 1fr);
  grid-template-rows: repeat(3, 1fr);
  height: 100vh;
}
```

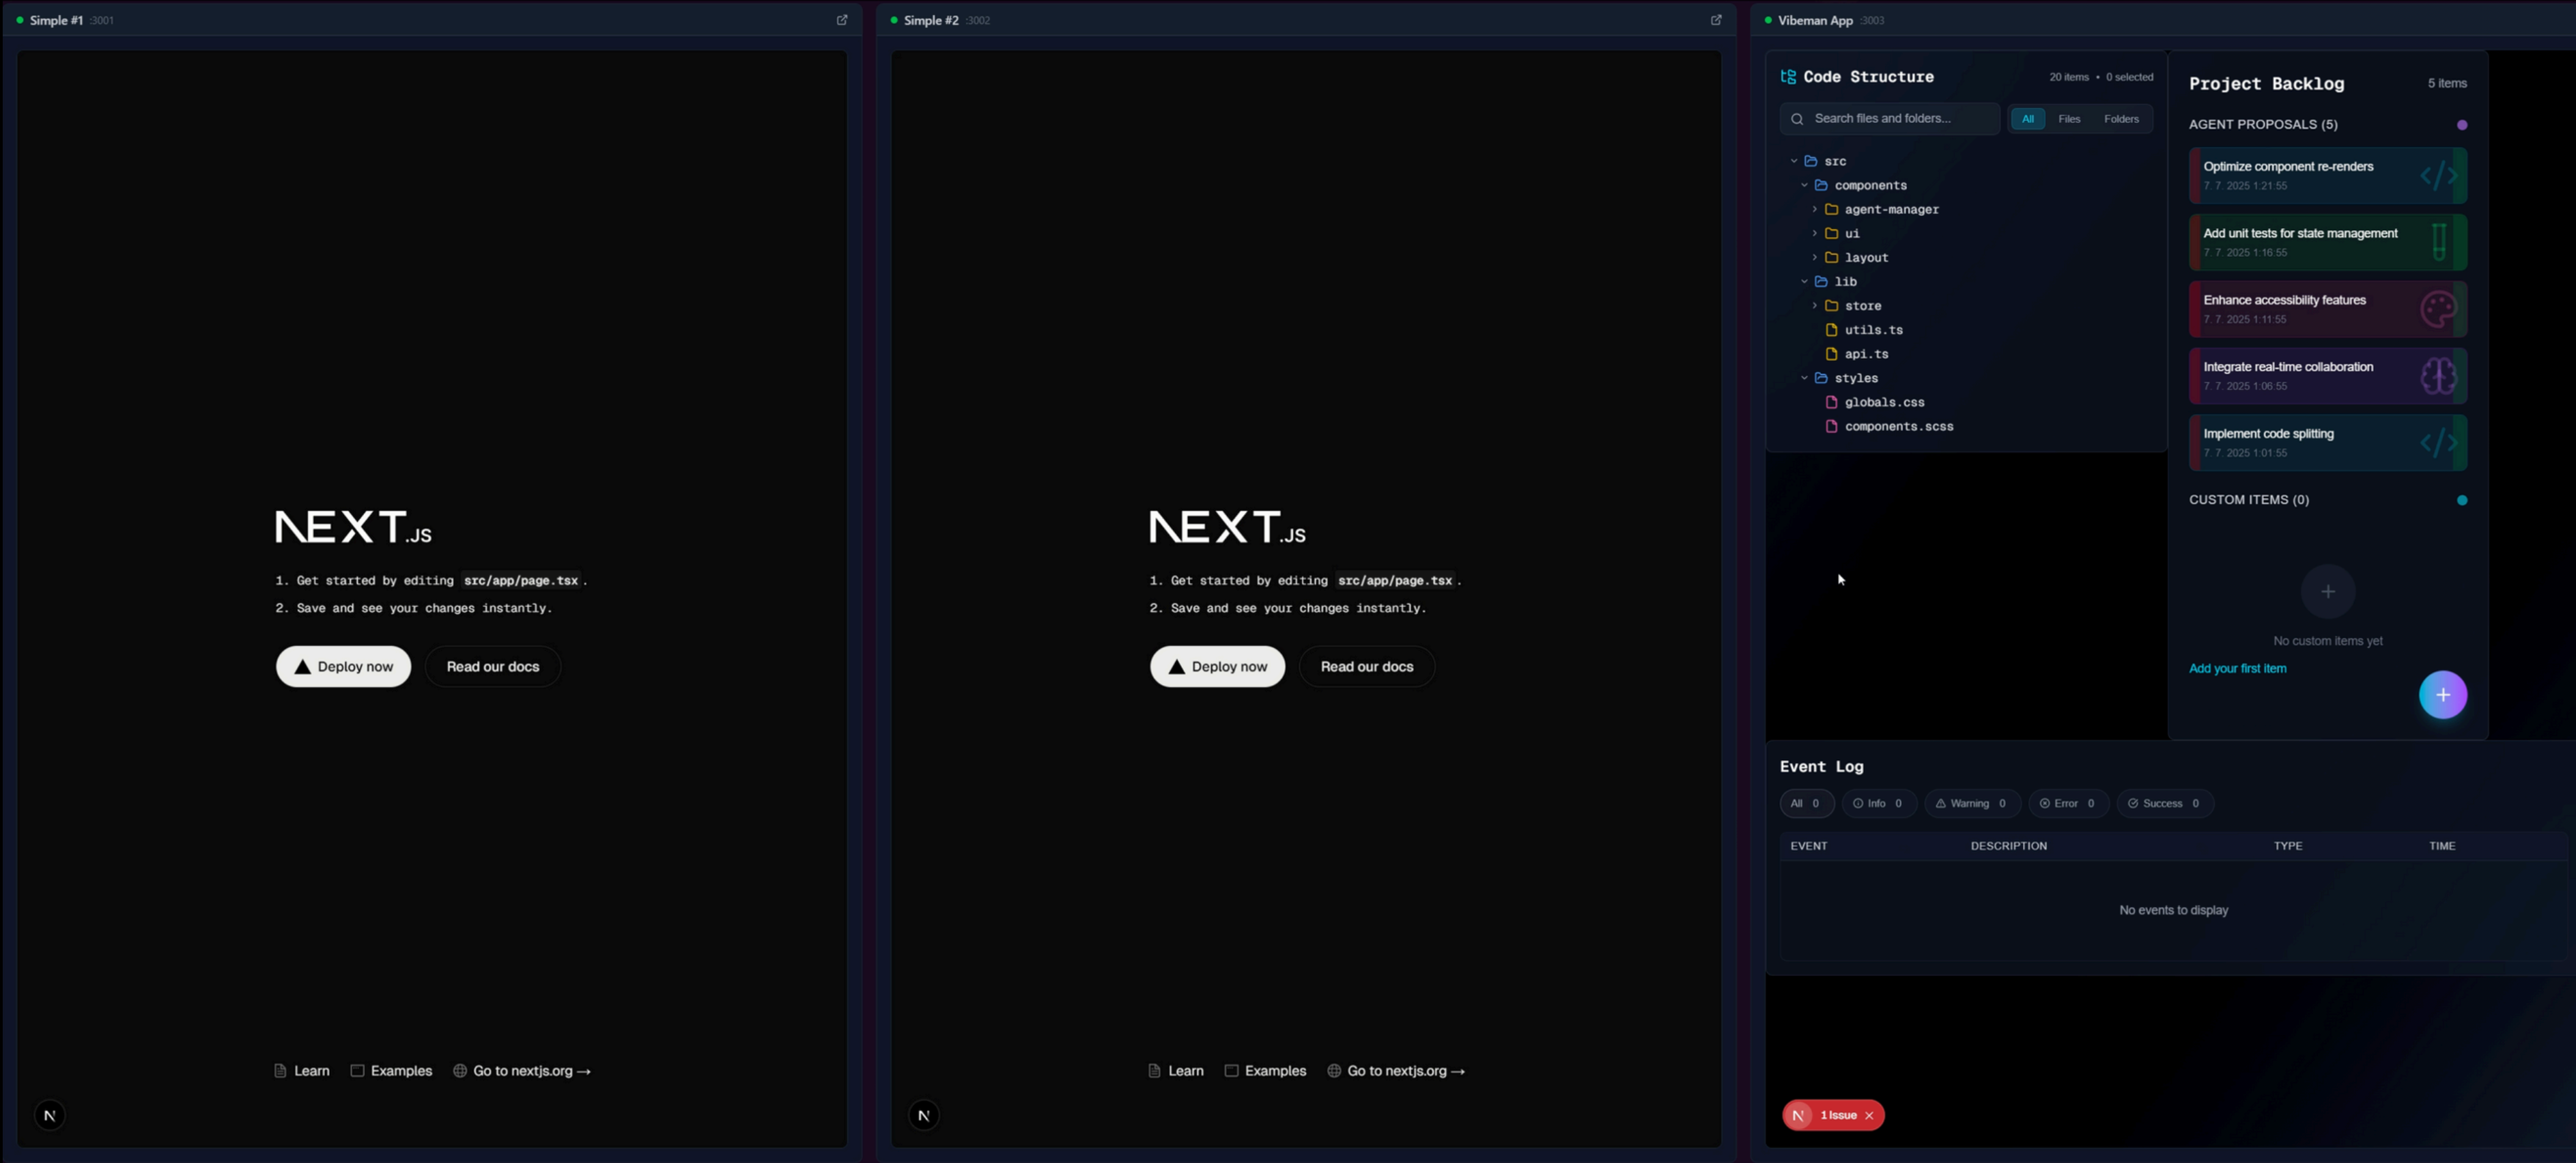

Update src/app/page.tsx with grid container and child elements.
