

Gatherly –

AI-Powered Discovery for Travel, Volunteering & Social Connections

The Problem

Users bounce between travel sites, volunteer listings, and socials

No unified way to find meaningful, personalized experiences

★ Generic results that ignore preferences or past activity

Users struggle to articulate what they want — traditional search requires exact filters, not ideas

Our Solution

Gatherly lets users simply describe what they want

★ Trips
♥ Volunteer roles

Call LLM + Knowledge Graph understands context and intent

Social matches
Personalized
itineraries

How It Works (Flowchart)

01 Prompt

02 Slot

03 Result

04 Ranked output

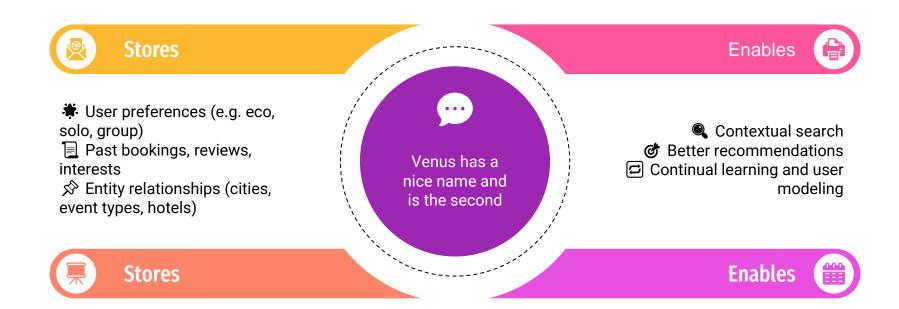

Intent & Slot Extraction (via Groq)

Query to DB via API

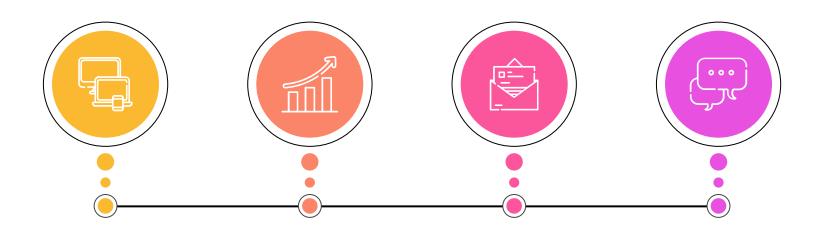

Enriched by Knowledge Graph (user prefs, reviews, history)

Returned to frontend

Knowledge Graph Intelligence

Revenue Model

Commissions
 (bookings for trips, restaurants, hotels)

B2B: Premium listings for organizers

☐ Smart recommendations → affiliate + ad placement

Deeper graph learning for proactive suggestion
