

# summit

Event Networking made easier with AI.

# What Inspired The Idea

Despite all the planning and people, most attendees don't meet the right people. They miss out on opportunities—partnerships, hires, ideas—because current networking tools don't help prioritize who to talk to.

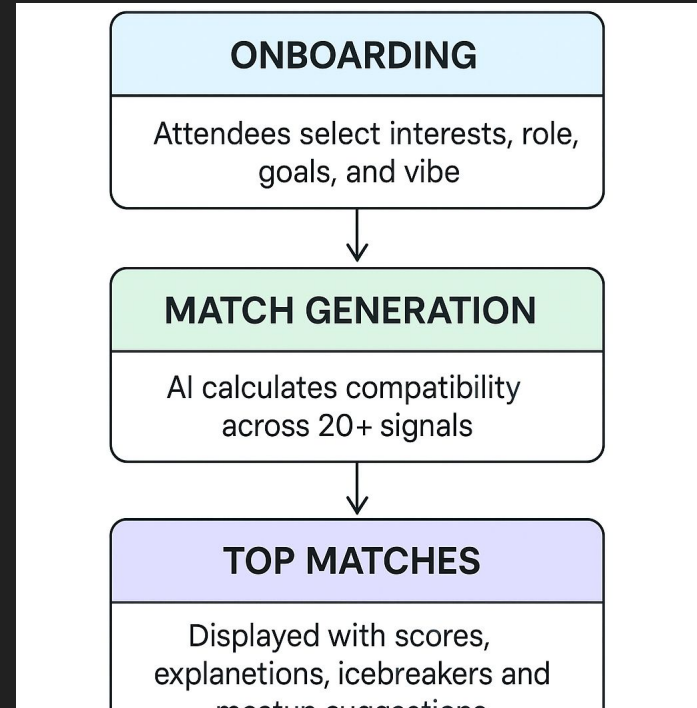

# What We Built

“Help me find the top 5 people I should meet today — and tell me why.”

We built Summit to solve exactly this. It's like Tinder + LinkedIn + Brain—showing you who's most worth your time, and why. Think intelligent intros, not cold networking.

# How It Works.

It starts with smart onboarding—then the engine compares you with others and finds high-signal matches. Everything is personalized and actionable.

# Tech Stack

FastAPI - Backend

Vanilla HTML, TailwindCSS and JavaScript - Frontend

Conductor

Groq - LLM Inference Provider

Render - Deployment Platform

THANK YOU.
