Active Automations

7

Running workflows

Create your own Workflow automation

Teach Mode

Teach your own agentic OS to replicate a task you do so that you never think of it again.

Enter workflow name...

Teach

Perform Default Workflow

Execute pre-built workflows to automate common tasks instantly.

Select a workflow...

Execute

Perform Custom Workflows

Describe any task in detail and let AI execute it for you.

Describe your task in detail... (e.g., 'Organize all PDF files in Downloads folder by date and move invoices to Finance folder')

Online

 Be specific about what you want to achieve for best results

Execute Query

THE PROBLEM

Almost 70% of freelancers report digital overwhelm and burnout

Repetitive setup tasks (files, notes, emails) eat into creative time

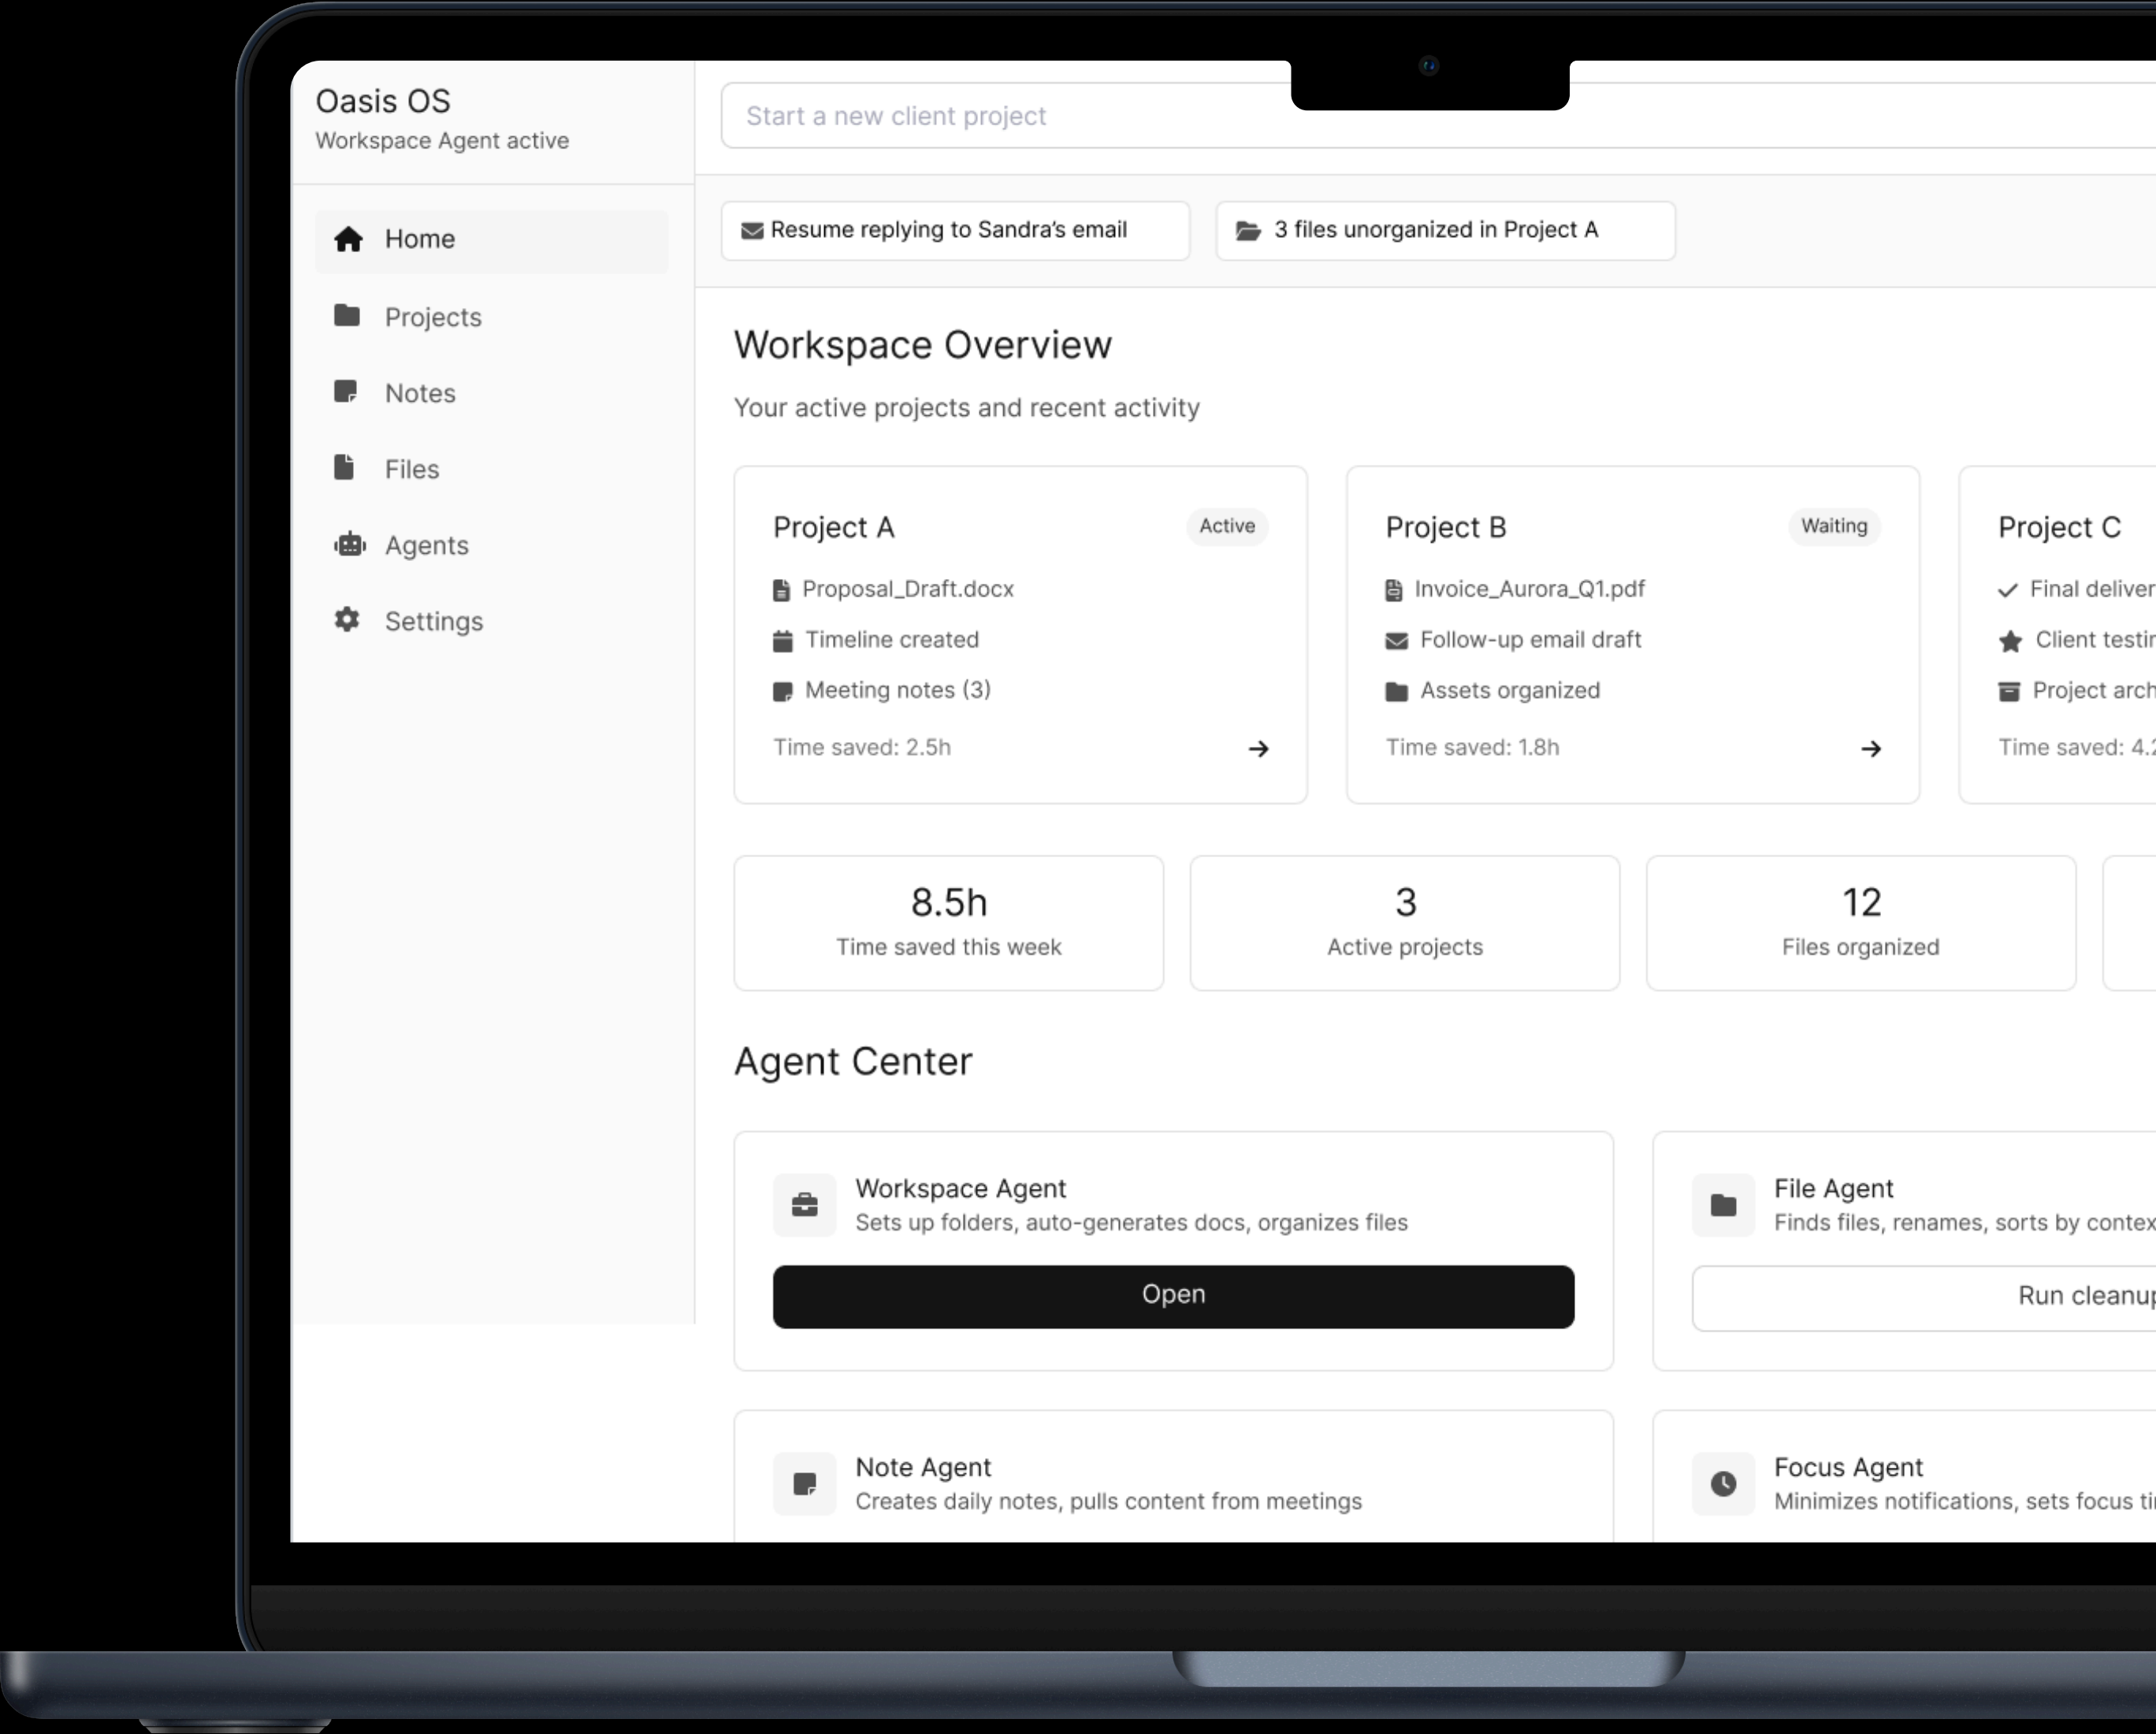

Switching between tools kills flow and focus

Burnout Trends Report, Reclaim, 2022

**People want to work
smarter, not harder; but
their tools haven't caught
up.**

MEET OASIS OS

A proactive, local-first AI agent desktop,
built for focus, flow, and automation

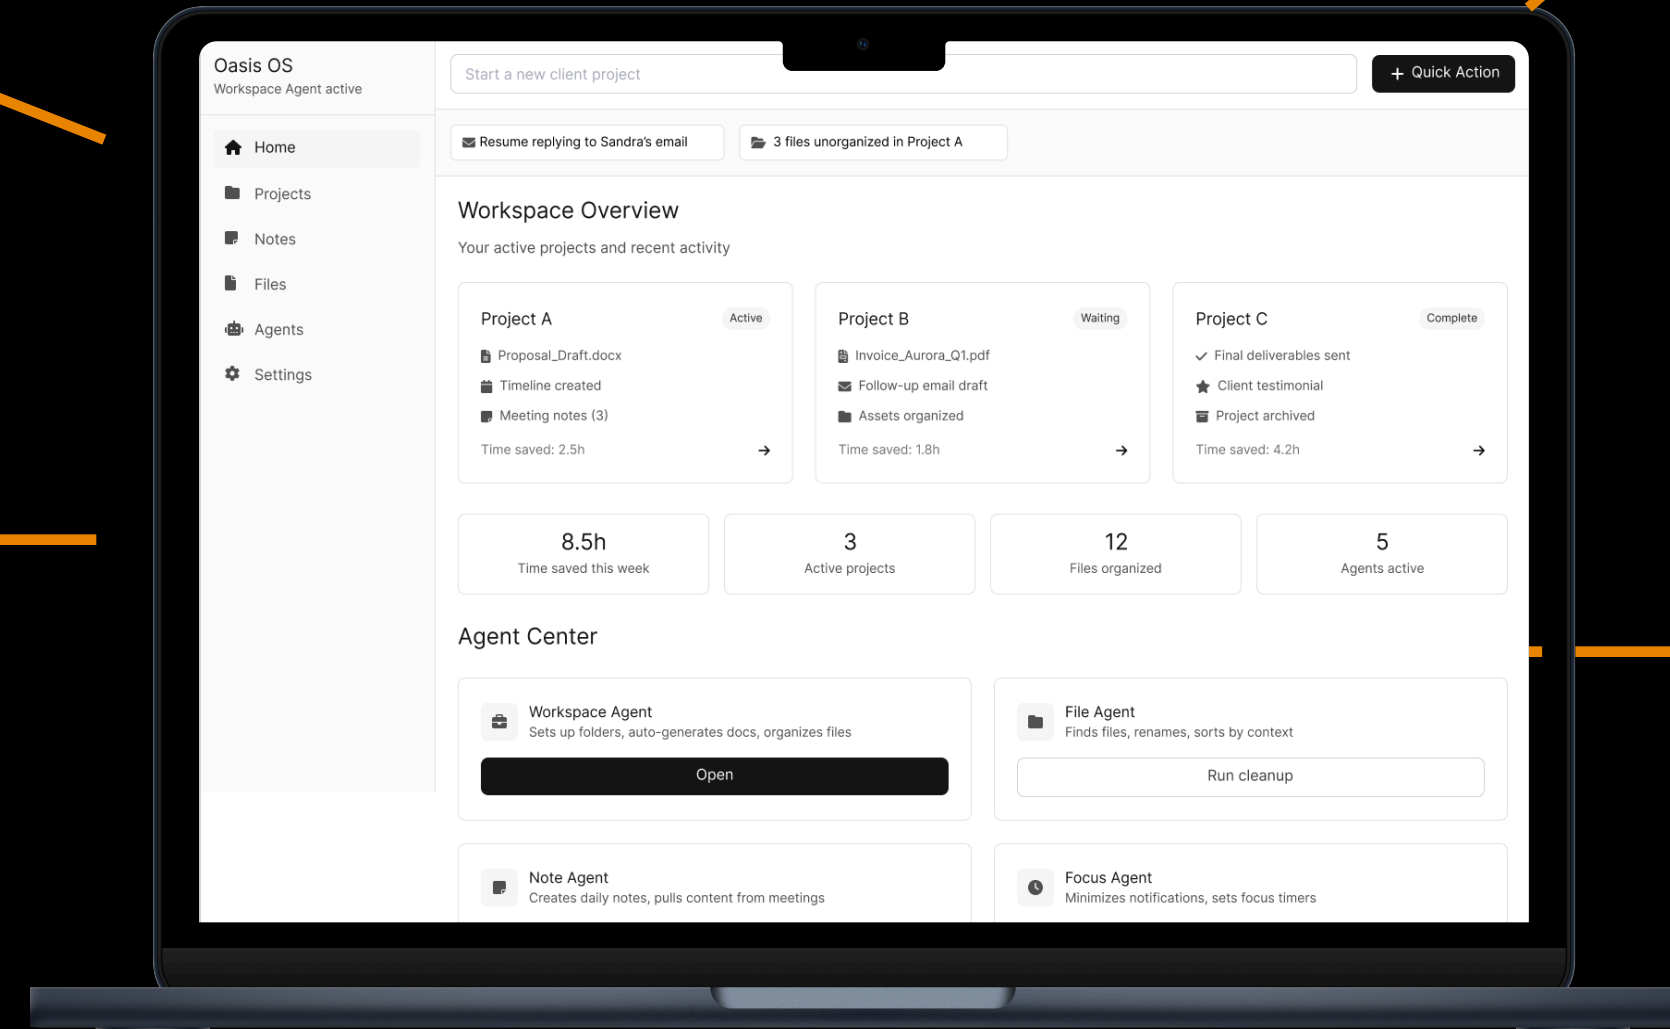

HOW IT WORKS

Agent S1 based smart graphsearch, worker and executor agents and retrieval from previous tasks

NextJS frontend and FastAPI Backend

Agent computer interface for different OS specific workflows

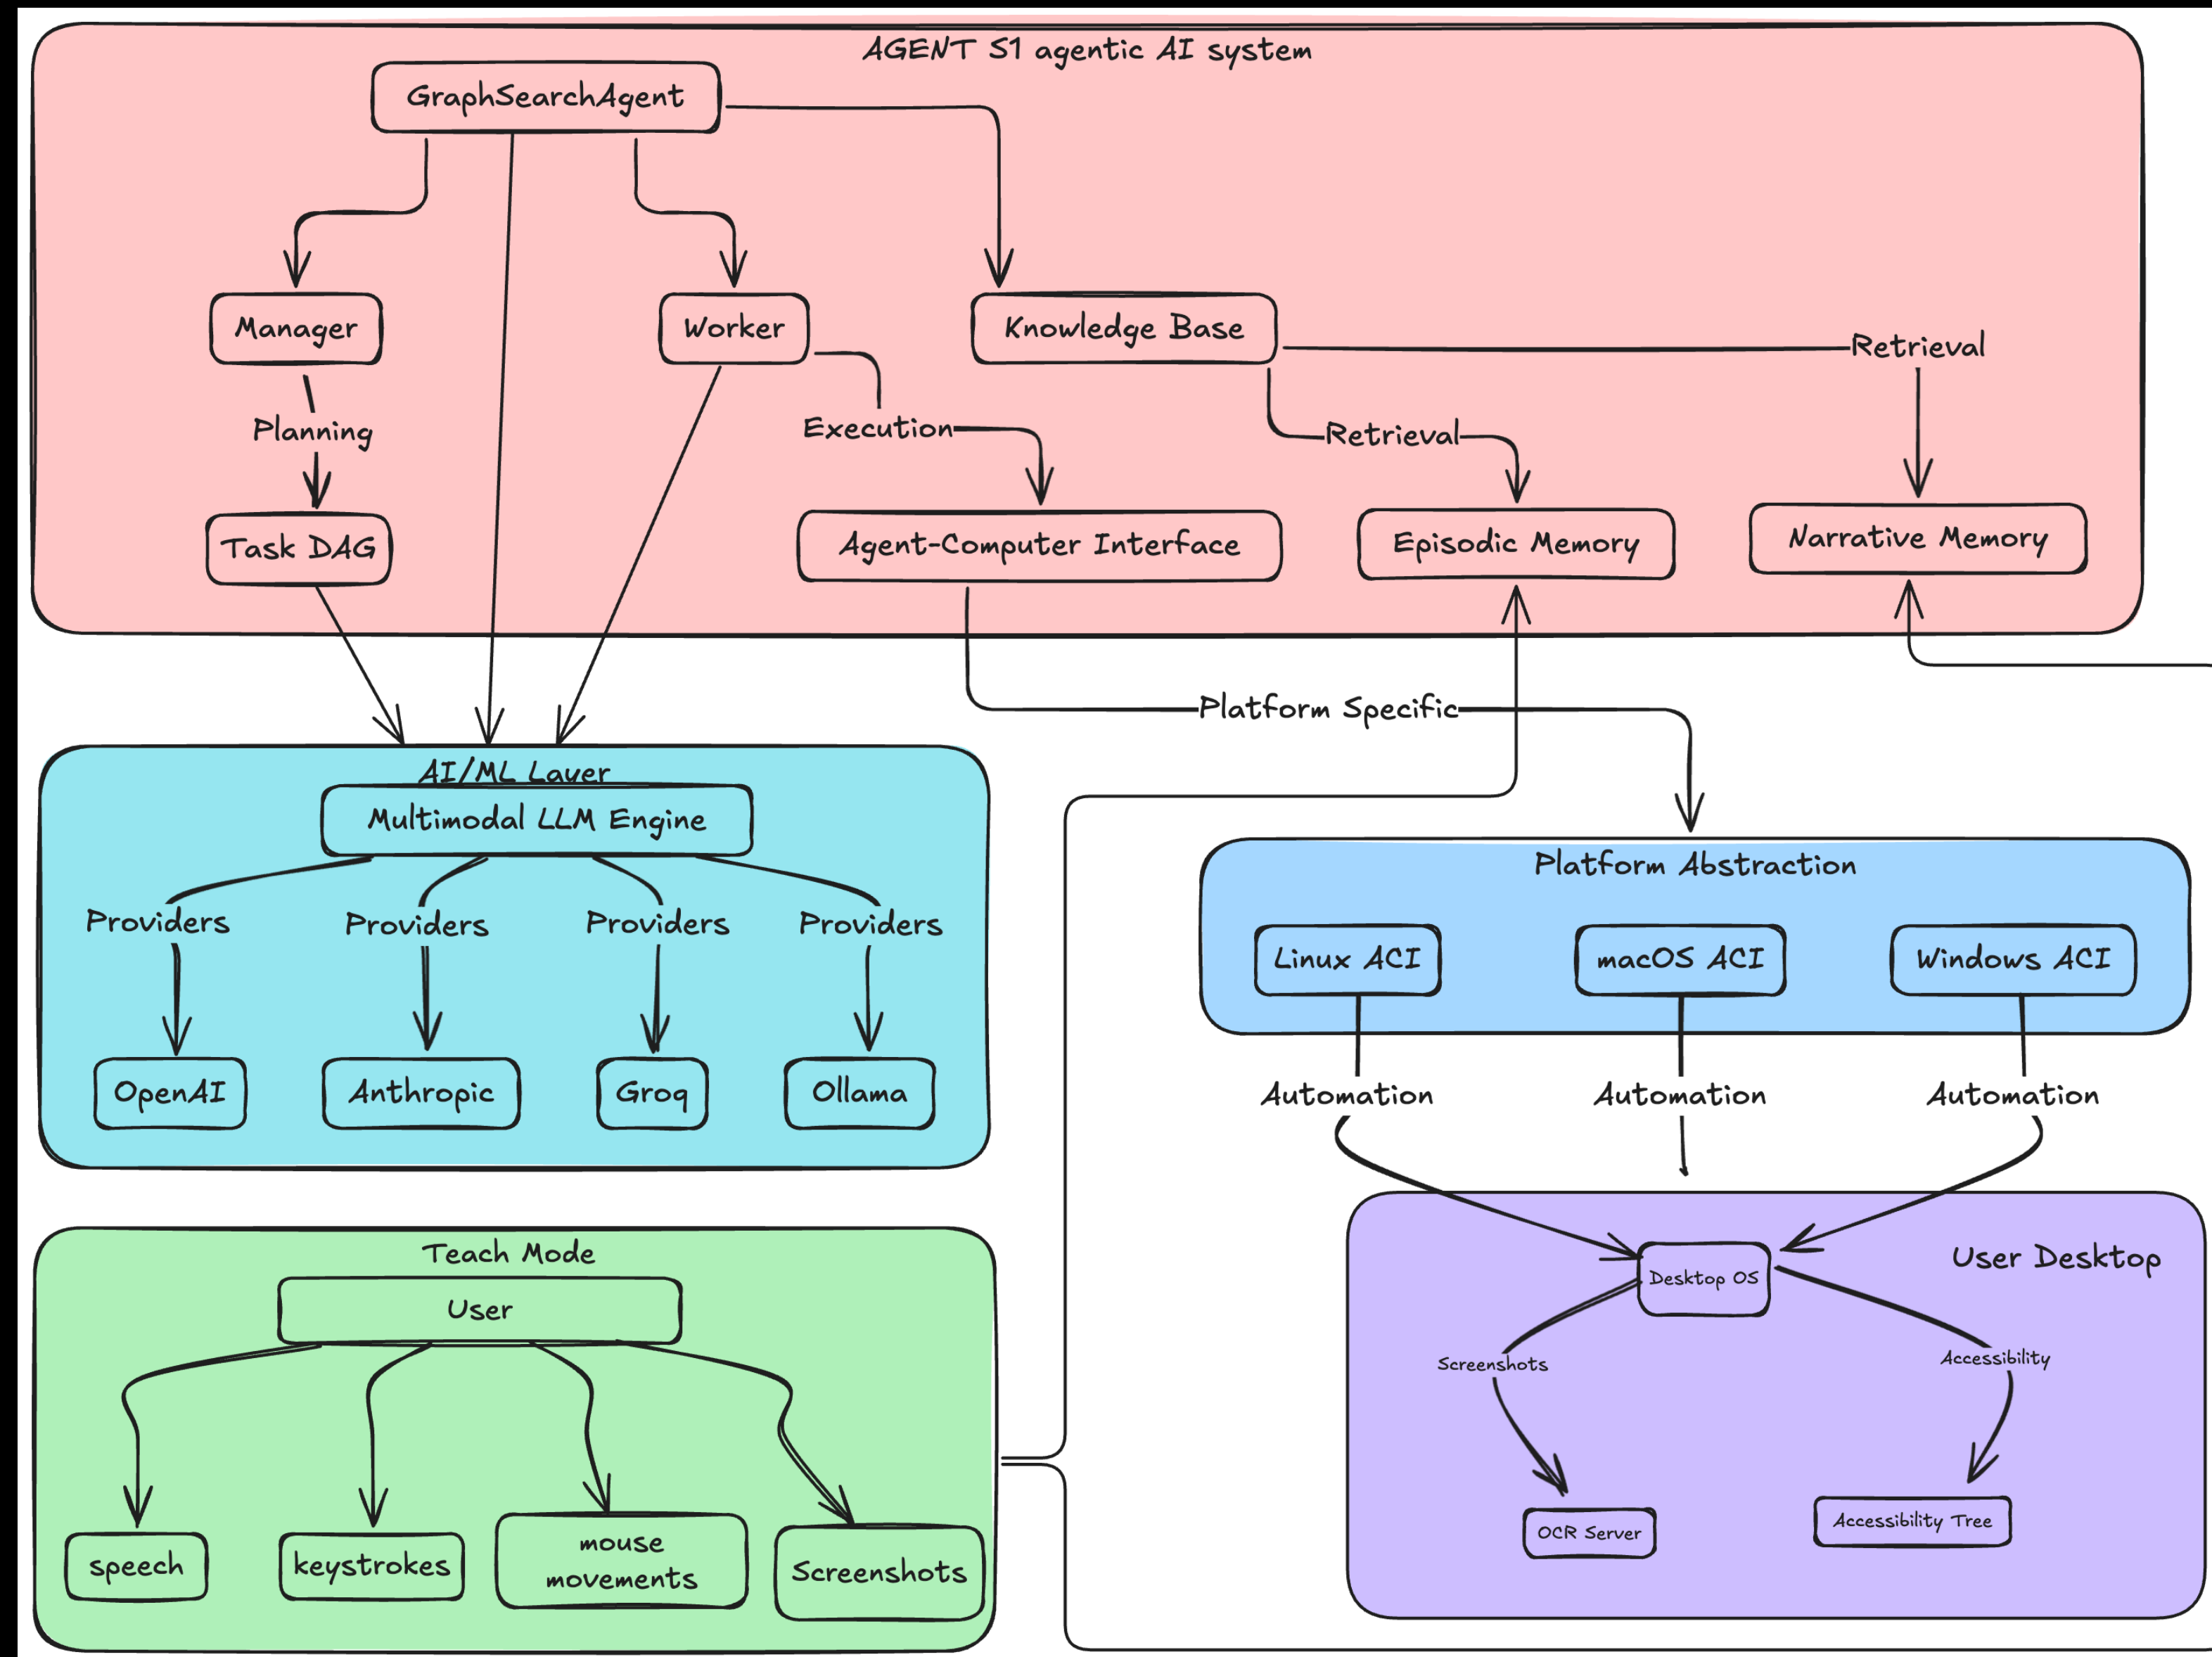

Online Models served using groq API (llama-3.3-70b-versatile and llama4-maverick)

Teach mode using speech to text, mouse movements and keyboard clicks

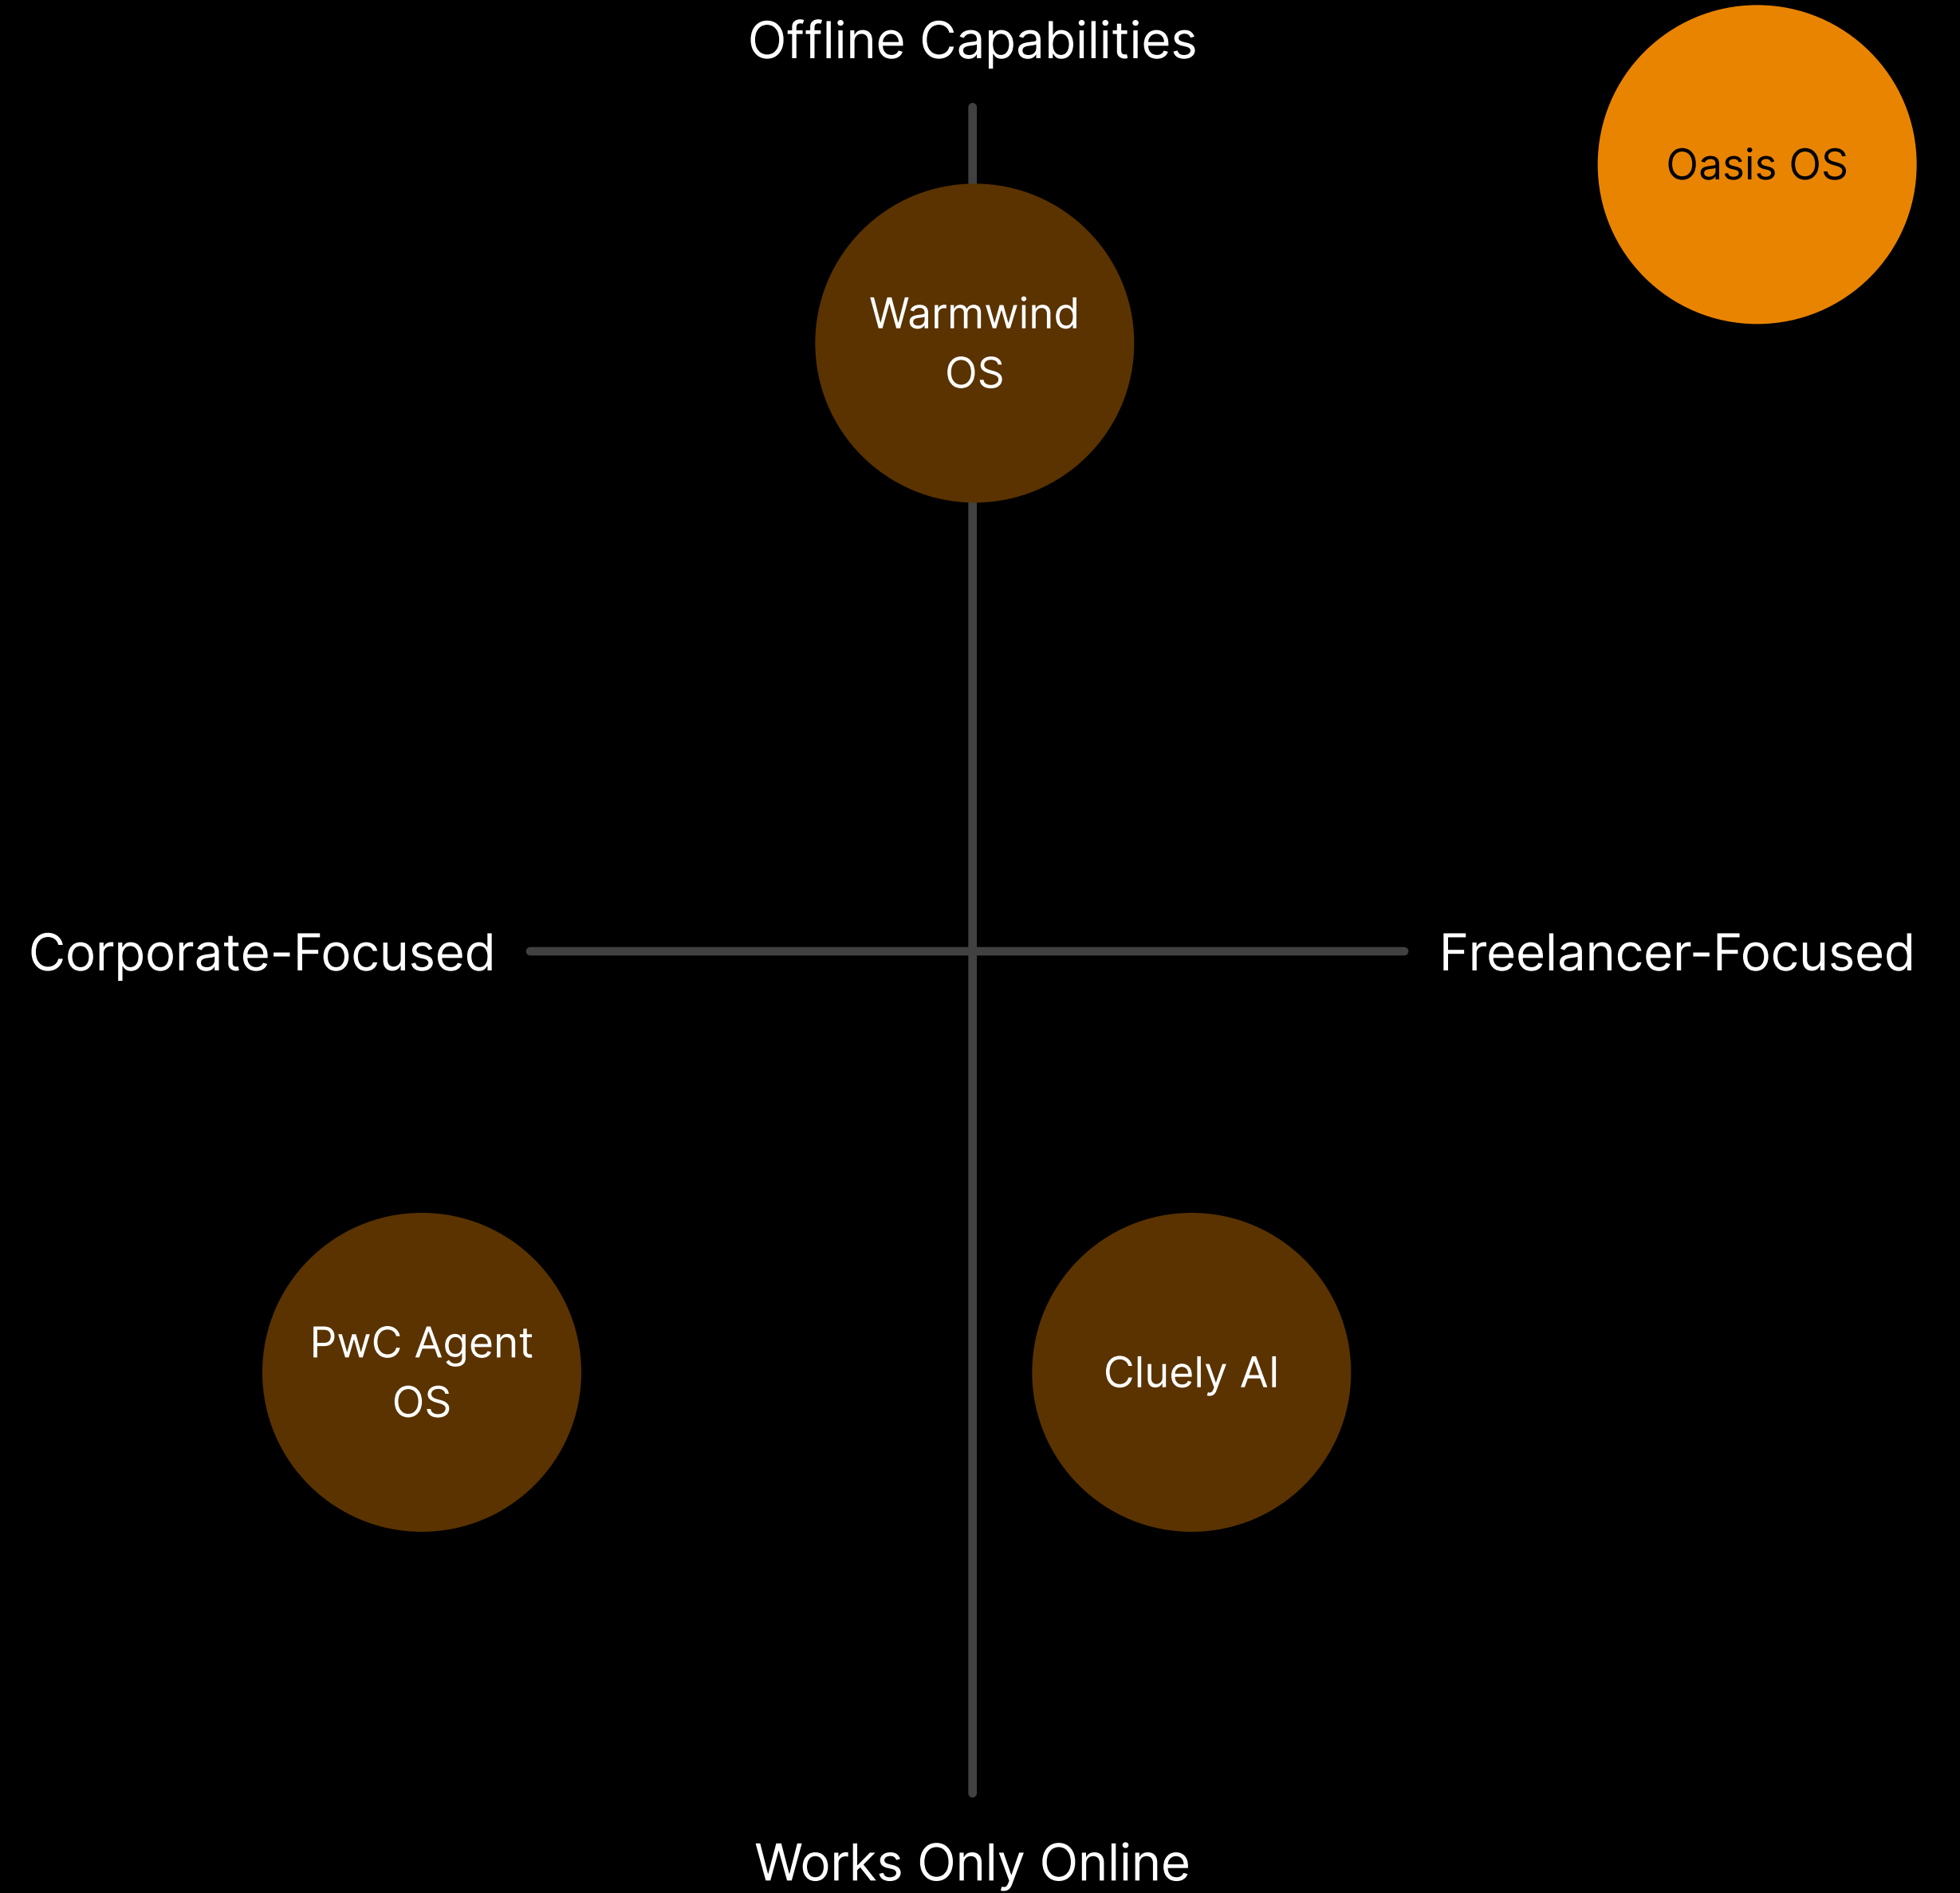

Offline Edge Gen AI served using ollama (using llama3.2-vision)

ARCHITECTURE

BENCHMARK

Oasis OS is the only offline
freelancer-focused solution

MARKET POTENTIAL

\$14 B

\$9.6 B market for creative productivity tools, growing to \$14 B by 2030

Statista & Grand View Research, 2023

70M+

Freelancers are 70M+ globally and growing fast

Upwork Future Workforce Report, 2023

84%

84% of consumers say they care about privacy and want more control over their data

Cisco Consumer Privacy Survey 2023
