

ShopWiz – Smart Shopping with AI

Presented at the RAISE YOUR HACK by Hackspec

Team Members: Nabil Thange , Sujal Solaskar , Tanish Soni

Website Demo: <https://shopwz.vercel.app/>

The Frustration of Traditional E-commerce

Traditional e-commerce platforms often lead to frustrating experiences. They are:

Crowded and Cluttered

Overwhelming interfaces with too many options and distracting elements.

Click-Heavy Navigation

Requiring multiple clicks to find desired products, leading to user fatigue.

Lacking Intuition

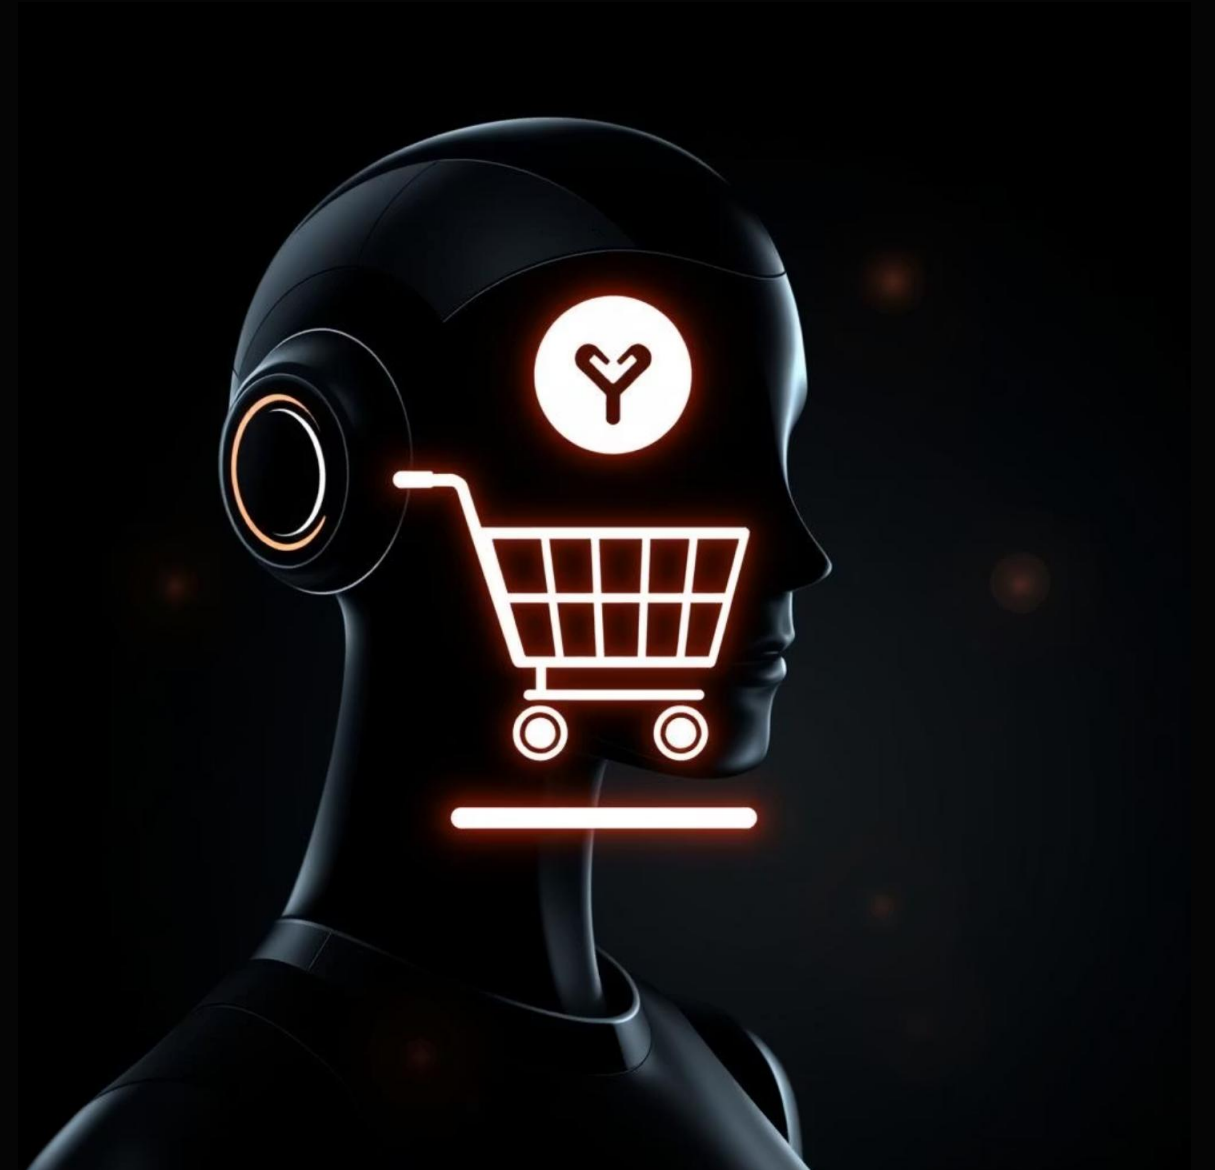

Limited natural language interaction, forcing users to adapt to the system, not vice-versa.

Users demand faster, more intuitive shopping, mirroring human conversation rather than a rigid search bar.

ShopWiz: Your AI Shopping Companion

ShopWiz revolutionizes online shopping with a smart, voice-first e-commerce platform powered by advanced AI agents. Imagine browsing, searching, and interacting with products using natural language, just like conversing with a knowledgeable shopkeeper.

Our intuitive UI combined with an intelligent AI assistant significantly reduces friction, creating a seamless and futuristic shopping journey. Experience the future of retail, today!

Key Features That Redefine Shopping

Voice & Chat Assistant

Interact naturally to find products, ask questions, and complete purchases.

Dynamic Product Filtering

Effortlessly refine searches with agent-driven commands like "show me red shoes under ₹1000."

Clean & Responsive UI

A sleek, user-friendly interface that adapts seamlessly to any device.

Intelligent Recommendations

Personalized product suggestions and smart categorization based on your preferences.

Add to Cart & Purchase

Simulate the entire shopping journey, from selection to checkout, via the AI agent.

The Tech Behind ShopWiz

Frontend Powerhouse

- **React.js:** For a dynamic and responsive user interface.
- **Tailwind CSS:** For efficient and customizable styling.

AI Brain

- **OpenAI GPT / LangChain:** Driving our intelligent conversational agents.

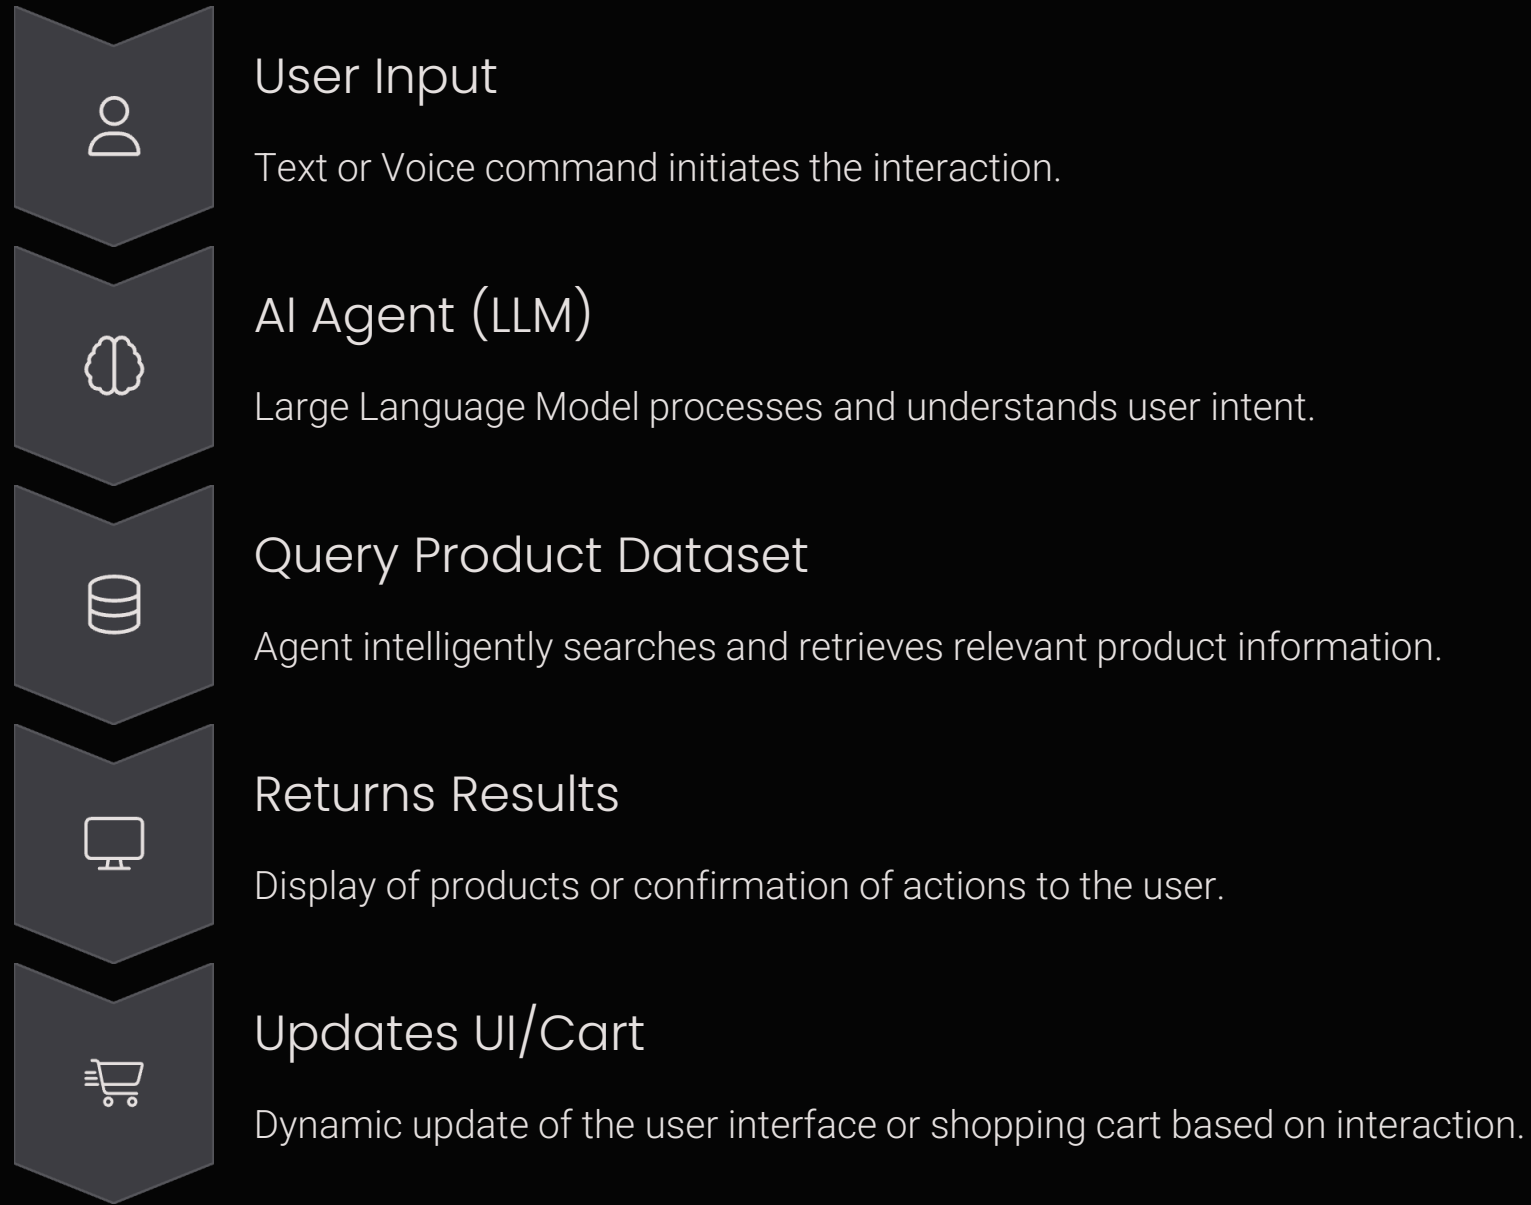

Hosting & Voice

- **Vercel:** Seamless deployment and global scalability.
- **Web Speech API:** Enabling intuitive voice input for a hands-free experience.

Data Management

- **Local JSON / Custom API:** Efficient product data handling for rapid prototyping.

Architecting the Conversational Flow

Optional: Stores context and offers smart, proactive suggestions for a richer experience.

Our Journey Ahead: Future Scope

E-commerce Backend Integration

Connecting with real APIs like Stripe and Shopify for live transactions.

Full Voice-to-Text & Speech Output

Enhancing the voice experience with advanced input and natural speech responses.

Multi-Turn Conversations with Memory

Enabling the AI to remember context for more fluid and intelligent interactions.

Smart Receipts & Order Summaries

Automated, intelligent post-purchase documentation for users.

PWA + Mobile-First Optimizations

Delivering a seamless, app-like experience across all mobile devices.
