

# Montimage Anti-Phishing Email Service

AI-Powered Multi-Analyzer Email Security Platform

# Executive Summary

## Comprehensive Solution

AI-powered anti-phishing platform with multi-analyzer architecture for superior detection

## Multiple LLM Providers

Leverages OpenAI, Google Gemini, Groq, and Ollama for flexible, redundant protection

## Growing Market

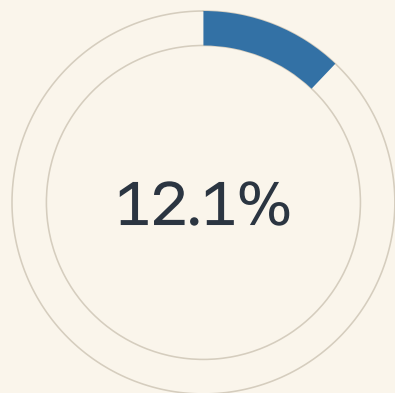

Targeting rapidly expanding email security sector (\$3.4B → \$9.1B by 2033)

## European Expertise

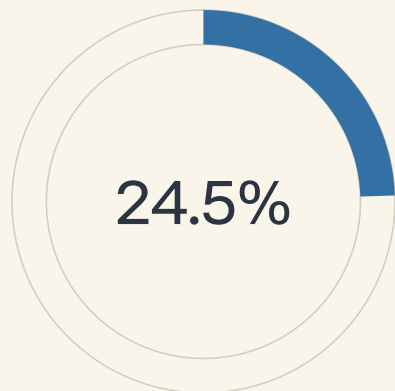

Developed by Montimage, a French cybersecurity SME with proven industry experience

# Market Opportunity

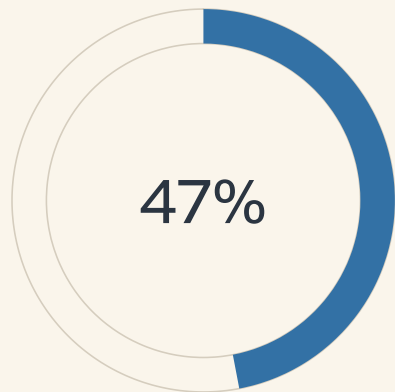

CAGR Growth

Email security market expanding from \$3.4B (2024) to \$9.1B (2033)

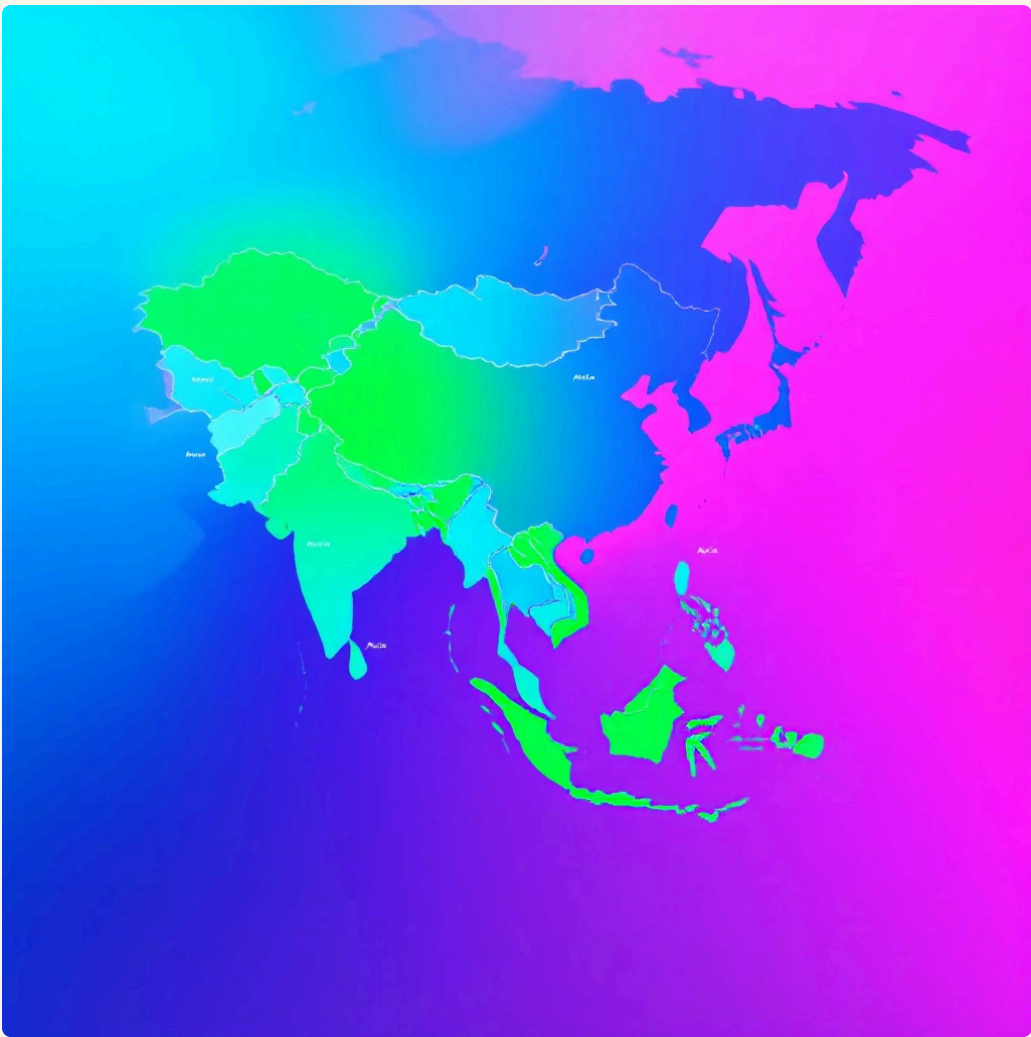

AI Security Growth

AI-powered fraud detection solutions growing at accelerated rate

Market Disruption

Percentage of market held by smaller players, presenting opportunity

North America leads with 32.7% market share, while Asia Pacific is the fastest-growing region (45% by 2028)

# Current Threat Landscape

3.4B

Daily Phishing Emails

Representing 1.2% of all email traffic  
worldwide

4000%

AI Attack Increase

Explosive growth in AI-driven attacks  
since 2022

91%

Email Attack Vector

Percentage of cyberattacks using  
email as primary entry point

56%

Filter Failure Rate

Traditional filters miss over half of  
advanced phishing attempts

# Montimage Anti-Phishing Email Service

## Multi-Analyzer Architecture

Comprehensive threat detection with multiple specialized analysis engines

## LLM-Powered Analysis

Leverages state-of-the-art language models for sophisticated threat detection

## Automatic Processing

Seamless handling of forwarded emails with critical information extraction

## Customizable Reports

Flexible HTML and plain text report templates tailored to organizational needs

## Multiple LLM Support

Integration with OpenAI, Google Gemini, Groq, and Ollama for reliability

## Real-Time Protection

Instant analysis with URL checking and comprehensive content inspection

# Key Features & Benefits

## Multi-LLM Integration

Unique support for 4 major LLM providers ensures redundancy and optimal analysis capabilities

## Advanced AI Architecture

Specialized analyzers work in concert to achieve significantly higher detection accuracy

## Customizable Solutions

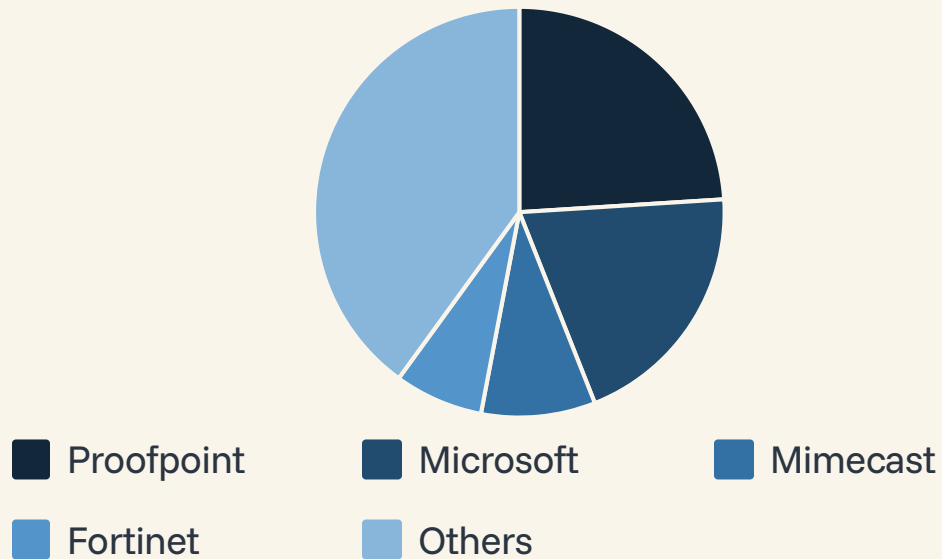

Flexible reporting capabilities adapt to diverse organizational requirements and workflows

## Real-time Processing

Instant analysis of forwarded emails with comprehensive threat assessment in seconds

# Competitive Landscape

## Montimage Advantages

- Multi-LLM flexibility vs. single-vendor dependency
- Advanced AI architecture with specialized detection
- European data sovereignty compliance built-in
- Open architecture design avoids vendor lock-in
- Cost-effective solution with rapid deployment

# Target Market Segmentation

## Geographic Focus

- Europe (GDPR compliance emphasis)
- North America expansion planned

## Industry Verticals

- Healthcare and Finance (high-value targets)
- Government and Education (compliance needs)

The underserved SMB segment represents a significant opportunity with fewer established competitors.

# Growth Projections & Market Potential

24.5%

AI Security CAGR

Projected growth rate through 2033  
for AI-driven security solutions

\$12.1B

Email Security Market

Projected annual spending on email  
security solutions by 2028

\$1.2B

Addressable Market

Multi-LLM email security segment  
size providing immediate opportunity

\$50M

Revenue Potential

Upper bound of projected annual  
revenue within 3-5 years

European market expected to reach €2.4B in  
email security spending by 2025, with strong SMB  
sector growth at 15% annually.
