

FUTURE OF BUSINESS FLOW

AYAZ

What is AYAZ?

A unified AI assistant for Google Workspace. Your corporate buddy to handle the hassle for you. One Interface, Many Apps.

The Problem:

- SMBs juggle multiple apps (4-5 daily).
- Context-switching kills productivity (~96 mins/day lost).
- Result: Missed info, duplicated effort.

How AYAZ Works

1

Supervisor Agent

Orchestrates user interactions, delegates tasks.

2

Specialized Workers

Mini-agents for Gmail, Calendar, Drive, using Google APIs.

3

Seamless Workflow

Parses requests, triggers agents, coordinates results.

4

Shared Context

Agents combine info (email + calendar data) seamlessly.

Simplifying Workflows for SMBs

One-Stop Productivity

Complex tasks in one go (e.g., draft contract & schedule meeting).

Faster Scheduling & Email

Auto-find optimal times, send invites (saves hours).

Document On Demand

Fetch/update files without leaving chat (summarize, update).

Reduce Human Error

Fewer missed meetings, forgotten attachments.

Empower Teams

Non-technical staff automate admin work.

Competitive Landscape

Zapier

No-code automation; limited by predefined triggers, lacks real-time AI.

Reclaim.ai

Smart scheduling for Google Calendar; limited to calendar functions.

Notion AI

AI tools within Notion; confined to Notion ecosystem.

Duet AI & Microsoft 365 Copilot

AI within individual apps; lack unified cross-platform automation.

Unique Selling Points

Unified Interface

Single command across Gmail, Calendar, Drive.

AI-Driven Automation

LLMs understand intent, execute multi-step actions.

Deep Google Integration

Leverages Google's smart features and APIs.

Modular & Extensible

OpenAI SDK, easy to add tools (Slack, CRMs).

Strategic Benefits for SMBs

Save Time & Money

Automates tasks, reduces labor costs.

Boost Productivity

Minimizes app-switching, improves focus.

Ensure Consistency

Standardized processes, reduces errors.

Grow Efficiently

Scales with team, maximizes Google Workspace ROI.

Future Development & Vision

Smarter Over Time

Learns from user behavior, OCR, file uploading.

AI Advancements

Continual upgrades with latest AI models, fine-tuning.

Broader Integration

Support for third-party tools (CRM, Slack), voice/chatbot.

Join the Journey

Be an early adopter, shape AYAZ as AI coworker.

Business Model

Currently not open for public use. Selected offices for testing and case study preparation. Charged for token use only during testing phase.
