

Speech Spark by Diana Serpoianu and Jessica Sophia Wong

 **Everyone wants a voice. But no one has time to write.**

You're a keynote speaker. A content creator. A pastor. A CEO.

You have something to say — but zero time to research, structure, or ideate.

Now imagine this:

You upload your past talks, sermons, transcripts, or YouTube videos.

You select a trending topic: *“Kate Middleton opens up about cancer.”*

You get — in seconds — a **fully personalized structure** for your next 20-minute speech.

- If you're a priest: you get matching scripture references
- If you're a motivational speaker: you get psychological + emotional insights
- If you're a business speaker: you get market analogies, peer-reviewed insights
- If you're a creator: you get a viral angle matched to your past style
- If you're... anyone with something to say: you get your idea, ready to go

This is not a content generator. This is a personal prompt engine.

Trained on *you*. Powered by *context*. Tuned to *what matters now*.

Introducing: Speech Spark

The first AI-powered inspiration engine that makes your next speech

faster, smarter, and unmistakably yours.

- Knows your voice
 - Understands your audience
 - Tracks trending topics
 - Pulls references from real sources (Scholar, YouTube, Gutenberg, etc.)
 - Builds a structure that aligns with your goals, brand, and time limit
-

You still write it. We just give you the blueprint.

Your voice, amplified by intelligence.

Forget writer's block. Forget recycling ideas.

Start building speeches that *actually* land.

This is the AI co-creator for every speaker who wants to lead, not echo.

Coming out of the hackathon. Built to go global.

60-Second Verbal Pitch

Everyone wants a voice. But no one has time to write.

You're a keynote speaker. A thought leader. A creator. A CEO. You've got something meaningful to say — but no time to research, structure, or plan.

What if your next speech started with a blueprint built just for you?

Introducing **Speech Spark** — the AI-powered inspiration engine that helps you structure, shape, and spark your next talk.

- Upload your past work: sermons, videos, articles, lectures
- Choose a trending subject (like Kate Middleton's cancer announcement or Bezos' wedding)
- Get a 20-minute speech framework — complete with topic angle, tone fit, and real references (from YouTube, Google Scholar, Project Gutenberg, etc.)
- Tailored to your voice, your field, your goals — not generic AI copy

You still write it. But now you start ahead.

This is your voice — enhanced, accelerated, and relevant.

Speech Spark: Because the world doesn't wait for writer's block.
