AIRDROP OPTIMIZER: Your Multi-Agent Autonomous System for Crypto Rewards

Hello world! We are a team from Brazil, the land of Carnival, samba, and incredible festivals! We found a solution to passively earn crypto while celebrating life: AI agents that work for you!

The Brazilian Crypto Dilemma

In Brazil, we have over 200 festivals yearly! During Carnival alone, we're offline for 5 days. Add São João, Rock in Rio, New Year's Eve at Copacabana... the party never stops!

But while we're living our culture, the crypto world doesn't stop for anyone.

- 200+ festivals per year
- Carnival: 5 days offline
- São João: 30 days of parties
- Rock in Rio, Lollapalooza...
- $1.2B unclaimed airdrops
- 1000+ campaigns monthly
- Perfect timing required
- You snooze, you lose!

Over $1.2 billion in airdrops go unclaimed because people are... well, LIVING! So we thought: What if AI agents could trade while we dance?
