

# Our philosophy

“Our philosophy is that AI should be developed, designed, accessed, utilized and most importantly understood by everyone. But why? Because AI will have an impact on everyone whether as a social impact, an economic impact or an environmental impact and even a political impact.”

# What is NeuralWize?

Individuals

We are a platform that enable

Enterprises

Harness the value and power of artificial intelligence and digital transformation through its AI applications, AI models and AI customized solutions.

# Problem

- AI applications are complex to be designed, developed and deployed
- AI models are extremely complex to be developed, trained and deployed
- AI development is an expensive process
- AI development requires experts
- AI deployment is time consuming
- AI requires continuous training
- AI can't be accessed nor deployed by everyone
- Arabic language needs a specific type of training.

# Solution

Easy | cost-effective | not time consuming | no programming needed pre-built AI applications for:

- individuals use
- SMEs or corporates use

Well defined | well trained | easy to access models | cost-effective | smart AI models that can be accessed and utilized through NeuralWize APIs

# Products

## NeuralWize applications (Platform for AI apps)

- Intelligent documents understanding (Mojeeb)

## NeuralWize models

- Natural Language processing models through APIs

```
find ./saudi -name '*.txt' -exec \  
curl --request POST \  
  --url http://127.0.0.1:8000/file-upload \  
  --header 'accept: application/json' \  
  --header 'content-type: multipart/form-data' \  
  --form files="@{" \  
  --form meta=null \;
```

# Our Demo

Mojeeb is an AI application that utilizes the power of Bert models to allow users to have document analysis and understanding applications with a powerful and state-of-the-art processing capabilities for Arabic language.

ما هي عاصمة السعودية؟

## النتائج:

ونظراً لأهمية مدينة **الرياض** ANSWER ولاحتمائها على كثافة سكانية عالية وامتداد عمراني سريع فقد تمت...  
المباشرة فيها كمرحلة أولى لتطبيق النظام البريدي الحديث ،حيث تم الانتهاء من الترميز والعنونة إلكترونياً على  
أن تبدأ عملية التوزيع خلال الفترة القادمة وسيتم تطبيق النظام على المدن الأخرى على مراحل لاحقة في

# Mojeeb is not ChatGPT

- Mojeeb is an extractive tool that look up documents through NLP model developed and trained by NeuralWize
- At this stage Mojeeb is able to extract answers from uploaded documents related to the history of Saudi Arabia, Absher related government services and many of documents related to the 2030 vision.
- During Mojeeb's operation it is not connected to any third party API
- Mojeeb can be used on a localhost, meaning any user can have the solution on premises without the need to put their personal or private data at risk when placed on the cloud like other NLP solutions.
- Mojeeb is familiar with Arabic language, and trained specifically for Arabic language applications.

# Team

**Ahmed**

Business development specialist 6+ years corporate experience, Products and services specialist.

CEO

**Hussam**

Machine learning engineer skilled in deep learning techniques, experienced in IBM Watson, NLP and NLU services.

CTO

**Mojeeb**

Skilled AI assistance with professional NLP capabilities and a good listener.

GA

# Go-to market

To achieve our penetration goal  
NeuralWize will demonstrate the value of  
its products and services through:

- Free demos for potential customers
- Partnerships with institutions in the private and public sector on digitalization projects

# Value

- Easy to access
- Easy to utilize
- Cost-effective
- Not time consuming
- Doesn't require development
- Customized acquiring plans
- State-of-the-art AI Models utilized for Arabic language.
- Anyone can be part of it

**THANK YOU**
