the Problem

The difficulty and cost of creating and designing teachers and trainers bots based on AI LLM.

Making it easy means solving common education and training problems.

The Best Teacher

VS

ChatGPT

.Custom user interface - MVP

Provide information in an interactive manner - MVP

Dashboard to create and customize Teachers- coming

.You can choose the teaching style that suits you - coming

.ability to easily include custom books and data - coming

.Student testing and evaluation - coming

And more is - coming.

Generally intelligent

but not customized to do these tasks

the business model

As a SaaS

**We will take the money. From organizations, companies and individuals.
Who uses the service to create a teacher or trainer.**

Specifically:

- = exchange for additional features in the Create and Customize service.**
- = And in return for hosting and operating teachers.**

the Future

- 1- Complete development of core features.
- 2- launch the service.
- 3- continue to build additional features
