What is the Problem?

HR processes such as (Talent hiring and development, Resignation process, Performance report, Onboarding and Orientation ....etc) are manually implemented and governed which affects the efficiency, quality, and entire productivity of HR department and any related department across the organization.
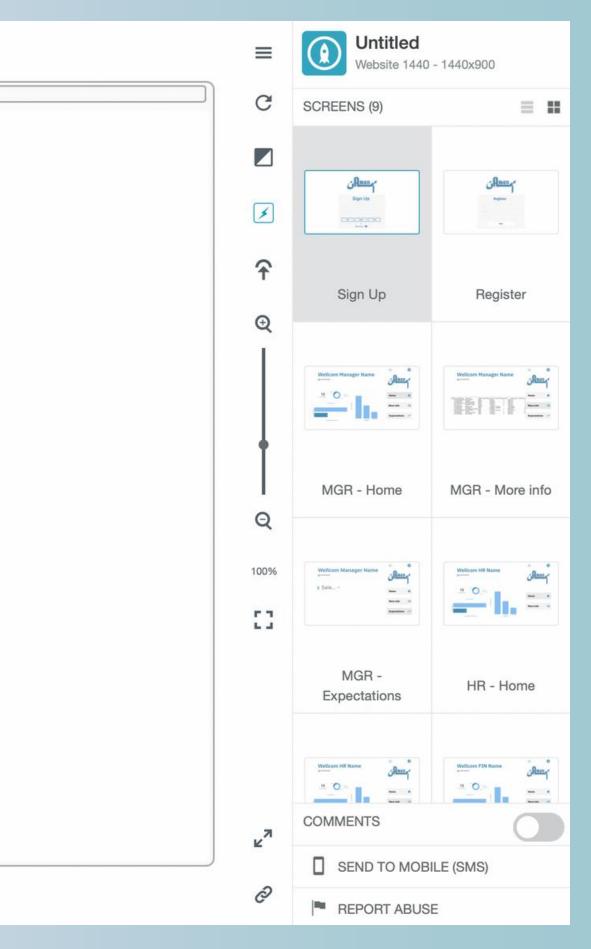

أمَان Aman

Aman Provide Excellent services that will save time and present reports

Aman supports the decision maker and serves the human resources department and the finance department to display data efficiently

How Aman make money?

A website that collects employee data and provides forecasting of employee performance and salary could generate revenue :

1. Subscription model

2. Commission-based model

3. Data licensing model

4. Advertising model

5. Affiliate model

Future improvement Plan

Thank you
