HOW DOES IT WORK

Our goal is to make a content-focused platform that gives a neat summary of long and content, (without fillers) And this is just the first step!

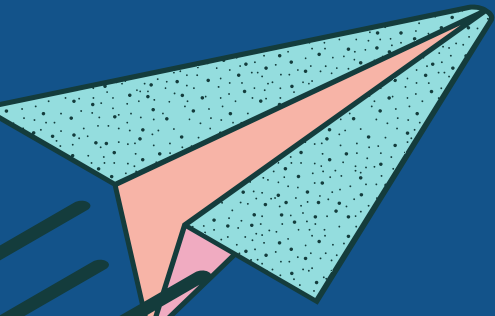

NOW

- **During the hackathon we developed the summarization tool that gives a brief description**
- **It's deployed on Streamlit**

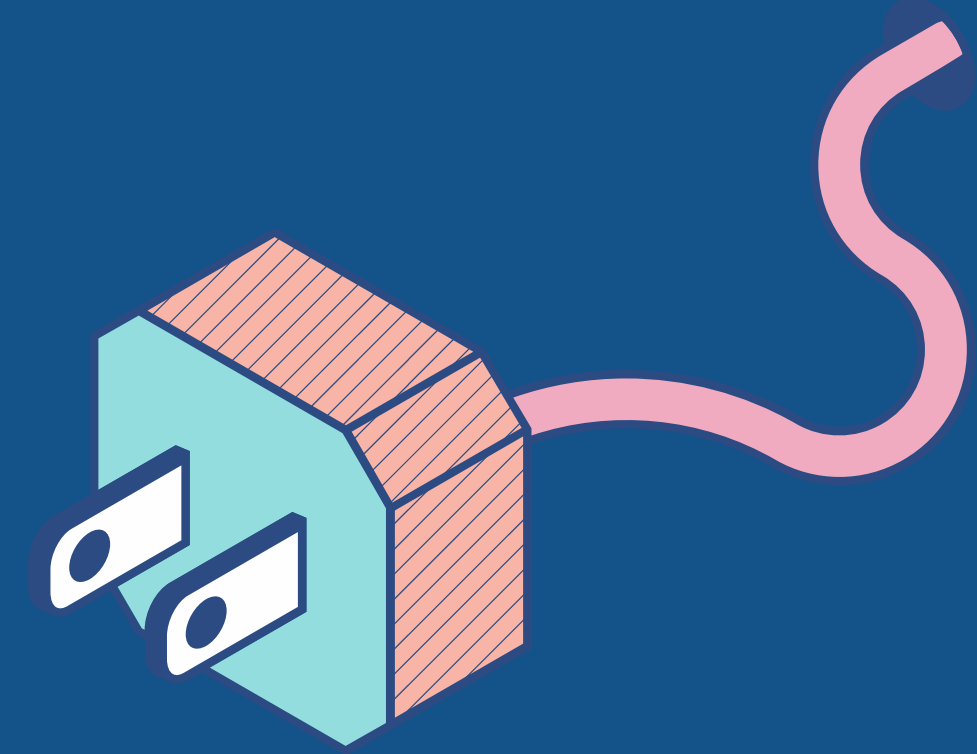

LATER

- **Will be a reliable platform that gives the user a fully extensive summary of the content**
- **The tool will be an extension for fast access**
- **Audio-only will be supported**
- **Pricing will be determined**
