

160 million

The Problem!

the problem

Decreased effectiveness of meetings

Wasting around 50% of the employees time

Difficulty summarizing meetings

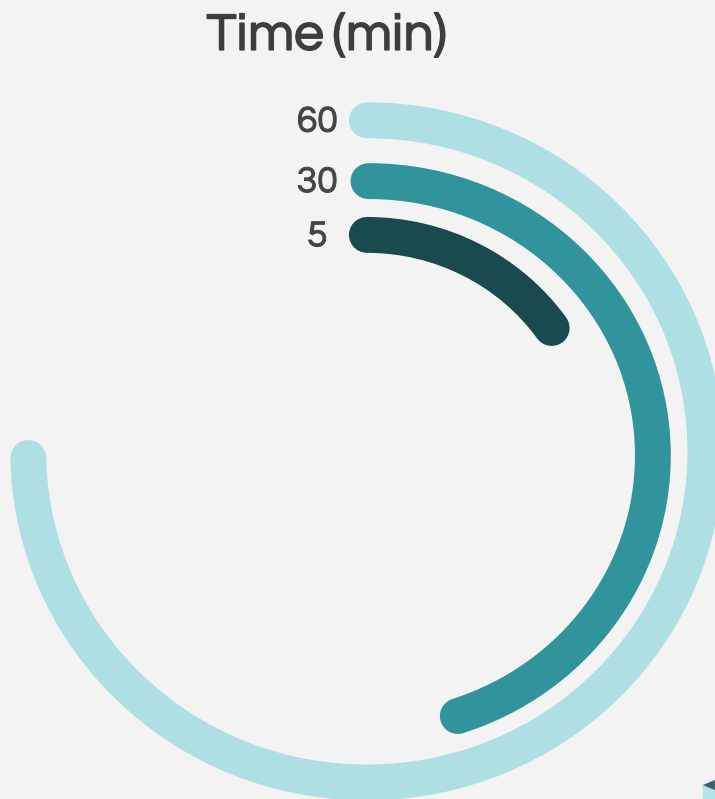

Difficulty setting tasks after the meeting

Meeting summarization

- Full summary of the presentation
- Highlights bullet pointes
- Stays in context

- Meeting Time
- Time lost Without AOUN
- Time lost With AOUN

What does Aoun offer?

Define meeting tasks

- Assign in meeting tasks by context
- Assign deadline for timed tasks

Meeting performance

- Analytics website to analyse cumulative meetings and Measure meeting productivity
- Give an improving points

Security

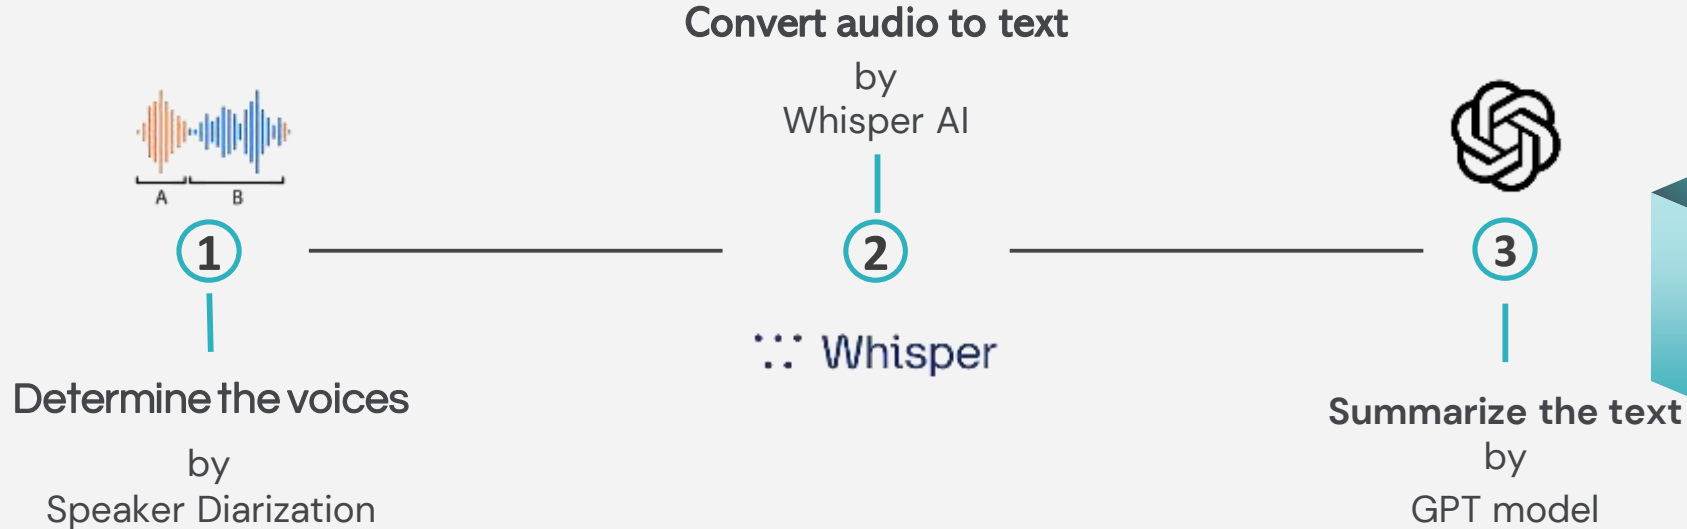

- in house data storage
- In house computing

Product demo

How meeting summarization work?

Future thoughts

Document summarization

- Integration with GPT-4
- Share files with ease

Live context verifier

- Search for information mentioned in the meeting (Live)
- Give an over view for search inquiry's

Recognize Employees voices

- Connect each voice with employee name and employee tasks

Future Integrations

Summarization

- Google Workspace (Gmail, Docs, meet, Calendar)
- Microsoft office (Teams, docs, outlook)

Tasks

- Trello
- Jira
- Google workspace

International Competitors

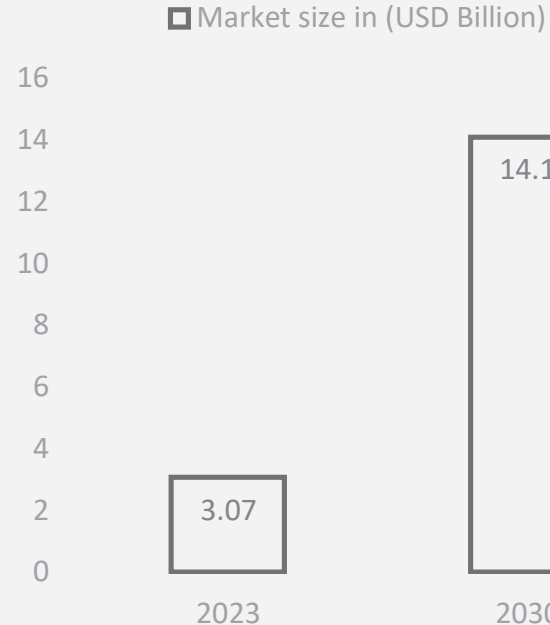

Fireflies (USA)

- Only in English
- Low security
- Stores costumers meetings
- only online meeting
- Hard to integrate

Microsoft (USA)

- Only in English
- Low security
- Stores costumers meetings
- only online meeting

MENA Market

- **There is no direct competition**
- The market is open
- No support for Arabic language globally

Choose the **plan** that suits you!

We Have Plans and Prices That Fit Your Business Perfectly.

Starter Plan

Free

What's Inside

- ✓ 10 Mins
- ✓ only on the app
- ✓ 4 Requests per month
- ✓ only one user.

Premium Plan

49SR

monthly

What's Inside

- ✓ 150 Mins
- ✓ Notion, Slack, trello, Zoom, Google workspace
- ✓ 50 per month
- ✓ only one user

Organizations Plan

Custom

What's Inside

- ✓ 150 Mins
- ✓ Notion, Slack, trello, Zoom, Google workspace
- ✓ Unlimited
- ✓ Custom

What we want ??

Better voice recognition

- Better voice for Arabic language

Computing power

- We have lack of GPUs

Better API with GPT-4

- GPT-3.5 limit us to a maximum of 30 min meeting

One more thing...

Product demo

Summary:

The meeting discussed an upcoming multi-aspect Hackathon. Aimed at fostering an AI builder community and supporting the creation of AI startups, a 2.5 billion Saudi Riyals development fund was introduced to aid entrepreneurs and active tech companies. The hackathon plans to select the top 20 projects for investment at the pre-seed and possibly seed stage, each receiving a non-refundable 150,000 Riyals grant based on meeting milestones. Moreover, a \$160 million investment fund is anticipated for these projects. Emphasis was placed on university students to build their own startups, with programs in place to provide salary and tech support. Future hackathons were announced.

Product demo

Important information:

1. Brainstorm and Develop Innovative Ideas: Each team should come up with a unique idea that addresses a problem or creates a new opportunity in the field of AI.
2. Plan and Design the Prototype: After an idea has been established, the team should plan and design a prototype solution. This might involve software, algorithms, data analysis techniques, etc.
3. Build the Prototype: This involves the actual creation of the solution - programming, testing, debugging and finalizing the prototype for presentation.
4. Prepare the Pitch: Each team should prepare a compelling presentation that explains their idea, the problem it solves, and how their solution works.

Product demo

Efficiency:

Clarity: 7/10 - Purpose outlined but could have been more succinct.

Engagement: 8/10 - Good audience engagement.

Brevity: 6/10 - Presentation was long, needed condensing.

Language: 7/10 - Appropriate, but occasionally confusing.

Structure: 6/10 - Lacked sequential flow.

Call to Action: 8/10 - Clear participant direction.
